Project Code: BYUC0030
Project Name: AFS Survey
Prepared for: Jeremy Pope
Interviews: 3000
Field Period: August 08, 2022 - August 15, 2022
Project Manager: Sara Sermarini - sara.sermarini@yougov.com

YouGov interviewed 3167 respondents who were then matched down to a sample of 3000 to produce the final dataset. The respondents were matched to a sampling frame on gender, age, race, and education. The frame was constructed by stratified sampling from the full 2019 American Community Survey (ACS) 1-year sample with selection within strata by weighted sampling with replacements (using the person weights on the public use file).

The matched cases were weighted to the sampling frame using propensity scores. The matched cases and the frame were combined and a logistic regression was estimated for inclusion in the frame. The propensity score function included age, gender, race/ethnicity, years of education, and region. The propensity scores were grouped into deciles of the estimated propensity score in the frame and post-stratified according to these deciles.

The weights were then post-stratified on 2016 and 2020 Presidential vote choice, and a four-way stratification of gender, age (4-categories), race (4-categories), and education (4-categories), to produce the final weight.

Variable List

caseid	Case ID
weight	Gen Pop Weight
consent	Consent
PAR006_treat	PAR006 treatment
FAMTAX007_treat	FAMTAX007 treatment
ED019_7_treat	ED019_7 treatment
