Replication Data: Segregation and Clustering of Preferences Erode Socially Beneficial Coordination

Vasconcelos, Vítor V. (University of Amsterdam)
Constantino, Sara M. (Princeton University)
Dannenberg, Astrid (University of Kassel)
Lumkowsky, Marcel (University of Kassel)
Weber, Elke (Princeton University)
Levin, Simon (Princeton University)

This folder contains the files needed to replicate the experimental analyses of the paper. The online experiment was conducted in February 2021. Participants were recruited on the prolific platform (https://prolific.co/). The experiment was programmed in oTree (Chen et al. 2016).

Files:

- **01_replication_codebook.pdf**, Description of the variables in the dataset.
- **02_replication_data.dta**, Dataset that contains observations from all 750 participants.
- **03_replication_dofile.do**, Stata do-file containing the commands needed to replicate the analyses shown in the Tables S4 – S9 of the SI.
