Fotografiet visar en skolkåta. Barn till renskötande samer var under lång tid hänvisade till en särskild skolform, så kallade nomadskolor. Nomadskolorna inrättades 1913 och fanns kvar till 1960-talets början. Svenska myndigheter arbetade länge efter en princip att samer skulle leva åtskiljda från det övriga samhället, att de skulle fortsätta att leva enligt en traditionell livsstil till exempel genom att inte bosätta sig i hus. Det kallades "lapp ska vara lapp"-politiken (lapp var förr en benämning på samerna). Nomadskolan var en följd av detta. Den särskilda skolformen syftade till att renskötarna inte skulle bli bofasta. Barnen tvingades bo i

Fotografiet visar en skolkåta. Barn till renskötande samer var under lång tid hänvisade till en särskild skolform, så kallade nomadskolor. Nomadskolorna inrättades 1913 och fanns kvar till 1960-talets början. Svenska myndigheter arbetade länge efter en princip att samer skulle leva åtskiljda från det övriga samhället, att de skulle fortsätta att leva enligt en traditionell livsstil till exempel genom att inte bosätta sig i hus. Det kallades "lapp ska vara lapp"-politiken (lapp var förr en benämning på samerna). Nomadskolan var en följd av detta. Den särskilda skolformen syftade till att renskötarna inte skulle bli bofasta. Barnen tvingades bo i skolkåtor eller vara inackorderade hos främmande familjer. Nomadskolan hade en särskild läroplan. Barnen skulle främst få kunskap som var avpassad för nomadliv och renskötsel. Andra ämnen fick därför inte lika stor plats på schemat. Nomadskolan kritiserades hårt av samerna och en del föräldrar vägrade att sända iväg sina barn.

Idag går samiska barn i vanlig grundskola eller i särskilda sameskolor som följer samma läroplan men som ger större plats för den samiska blicken, rösten och berättelsen.

I Nordiska museets arkiv finns en omfattande samling av fotografier som berättar om samiskt liv.

i love sweden i want to live there when i grow up!!!!!!

Saddex 8y
Eveen Haddad How it ended up with this waterfall, and the national park, is not a good story. You see the end of the lake? There's since long time ago a huge dam, serving as a water magazine for hydroplants downstream with a total effect of 4,3 GW, a large number. And now 95% of the water flow is passing

Eveen Haddad How it ended up with this waterfall, and the national park, is not a good story. You see the end of the lake? There's since long time ago a huge dam, serving as a water magazine for hydroplants downstream with a total effect of 4,3 GW, a large number. And now 95% of the water flow is passing through a underground plant. Left is a stream of 6 m3/s, usually it was 160 m3/s. It's a shame, the lake system upstream was broken out of the national park.
