Shoreline, Lake Victoria, vector polygon, ~2015

Reference Information and Units:

Projection: ESRI: 102024 (http://spatialreference.org/)

GCS: WGS 1984

Resolution: 1:25000

File Naming Convention:

LakeVictoriaShoreline.shp

Data Origin:

Manual Digitization from Open-Source Imagery

Sensor:

Various

Code:

NA

Data Development/Processing:

This data represents the entirety of the shoreline, including the islands, of Lake Victoria digitized at a fixed 1:25,000 scale

A 20x20 fishnet was created and used to monitor progress and ensure the entirety of the lake was accounted for in the data set.
