Hi!
user1

I think republicans are more hypocritical because they are sometimes caught privately supporting things which they publicly oppose.
user2

Also, hi
user2

I think a lot of republicans are more hypocritical because they often cite wanting freedoms and small government but want the government more invovled in the censorship of Democrats, as well as supporting Russia's invasion
user1

Yes, thatâ€™s a good point. For example, claiming to support individual freedom but opposing abortion access or LGBT rights.
user2

Right, they want big government on those issues, but not on their guns or their free speech. They want no censorship, but wish to censor certain books from libraries in schools that might have lessons against bigotry or teach about slavery.
