Republicans are more hypocritical
user1

I would say there is more contradiction in messages and statements made by Republicans often using a message like â€œmy body my rightsâ€ to try to assert the view of not wearing masks or being vaccinated when it is rather intended for the issue of reproductive rights
user2

Yes Republicans seem to contradite themselves all the time
user1

I love the "my body my rights" for mask, but when it comes to abortions they could care less about my body and my rights
user1

They use this language to try to spread their message for being anti-vax/anti-mask while at the same time do not support and fight against a women/person with uterusâ€™s right to make choices about their own bodies.
user2

They also seem to want to fight the facts and science
user1

I support a person having the freedom to make their own decisions when it comes to medical protections however what I think many republicans fail to acknowledge and recognize is that the mask is Not About protecting themselves but rather itâ€™s about protecting the safety and health of others
user2

Regardless of whether they â€œbelieveâ€ in COVID.
user2

If you want the right to wear or not wear an mask and to get vacinated or not, seems to me you can't make decsions about weather or not I should have to have a child that I may not want or that may kill me to have.
user1

Yes they absolutely want to always fight the facts and science
user2

These same "Pro Life" white men would be the 1st to make their girlfriends or mistresses have an abortion
