Read Me: Replication of "The Effects of Education on Financial Outcomes: Evidence from Kenya"

All analyses were implemented in Stata 14.2

Stata do files:

- "0 prepare_base_files.do": creates all datasets, from raw data sources, used in the analysis
- "1 main_tables_figures.do": reproduces all the results presented in the main paper
- "2 figure1_map.do": produces the map presented as figure 1 in the main paper
- "3 appendix_tables_figures.do": reproduces all results presented in the online appendix

Stata data files:

- "FinAccess_Retail_2006_public.dta", "FinAccess_Retail_2009_public.dta", "FinAccess_2016_data_final_anonymized.dta": FinAccess survey files downloaded from https://dataverse.harvard.edu/dataverse/finaccesshousehold
- "KE census 1999.dta", "KE census 2009.dta": 1999 and 2009 Kenyan census data, downloaded from https://international.ipums.org/international/
- "KEHR70FL.dta": Individual-level file from the 2014 Kenyan DHS, downloaded from https://dhsprogram.com/data/dataset/Kenya_Standard-DHS_2014.cfm?flag=0
- "finchild.dta": Data from 1997 Welfare Monitoring System (WMS) which can be obtained from the Kenya National Bureau of Statistics (KNBS). Data requests must be made to Director General, Kenya National Bureau of Statistics, P.O Box 30266-00100 Nairobi, Kenya, Tel +254-20-317583,317586,317588,317612,317622, 317623,317651, Fax 254-20-315977 Email: director@knbs.go.ke
- "KEN_adm2.XXX": GIS files for location of counties in Kenya, downloaded from https://gadm.org
- Create a subfolder named "input_data" to save all above files before running do files.

Stata ado files:

- "cgmwildboot2.ado": program for calculating wild bootstrap clustered p-values. Modified version of "cgmwildboot.ado" to allow for correct weighting with fewer than 10 clusters and easier exporting of results. Original available from https://sites.google.com/site/judsoncaskey/data

NOTE: Output tables significant stars are outputted for traditional clustered standard errors. When the wild bootstrap clustered p-values were more conservative, the correct number of significance stars was updated manually.
