Q1 **Fake documents crossing from the Western Balkans**

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

Germany, Italy, France

Q3

Which are the most popular transit countries?

Greece, Bulgaria, Monte Negro, North Macedonia, Kosovo, Serbia

Q4 **Land route**

Which is the most popular mode of transport

Page 6: Modus operandi employed regarding the following issues

Q5 **[0 - 100)**

What is the total number of people involved in this risk scenario?

Q6

What means of transport are used to cross the borders from the country of origin?

Personal vehicle, Bus, Airplane, Truck, Train

Q7

What is the country of origin and what is the destination country?

Turkiye, B&H, Kosovo, Serbia, China

Q8

What kind of documents are employed for entering/transiting the countries?

Passport, ID, Residence permit, Visa

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

Smugglers, English

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

There are no related crime in this sence

Q11

Other related issues

none

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

3rd country where the documents were procured, mainly more expensive way of irregular border crossing, documents with less efficient protection elements, means of transport

Q13

Vulnerable Groups

n/a

Q14

Operational Activities

Implementation of operational activities in accordance with risk profiles

Q15

Route Factors

n/a

Q16

Other individual variables

n/a

Page 8: Push factors

Q17

Social factors

low social benefits, limited access to health care

Q18

Political factors

Human rights violations or persecution

Q19

Environment and Health

droughts, floods, earthquakes

Q20

Conflict

wars in Ukarain, Gaza

Q21

Economy

Reduction of business opportunities, increased unemployment

Q22

Other

n/a

Page 9: Pull factors

Q23

Economy

greater employment opportunities, higher incomes

Q24

Social Factors

high social benefits

Q25

Political factors

high level regulated legal system

Q26

Environment & Health

easier access to the healthcare system

Q27

Other

n/a

Page 10: Human Security Factors

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

age, gender and sexual orientation, racial and ethnic identity, nationality, political beliefs

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

n/a

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

ability to cover up the traces and stay undetected for a long time

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

low number of attempts

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

financial gain

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

providing fraudulent documents

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

larger number of intercepted perpetrators

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

n/a

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

n/a

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

n/a

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

n/a

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

n/a

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

n/a

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

n/a

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

Q1 **Irregular Migration from the Eastern Borders Route**

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

Germany, France

Q3

Which are the most popular transit countries?

Estonia, Latvia, Lithuania, Poland

Q4 **Land route**

Which is the most popular mode of transport

Page 6: Modus operandi employed regarding the following issues

Q5 **[0 - 100)**

What is the total number of people involved in this risk scenario?

Q6

What means of transport are used to cross the borders from the country of origin?

passenger cars

Q7

What is the country of origin and what is the destination country?

origin KAZ, KGZ, UZB through Russia, destination Estonia, Finland

Q8

What kind of documents are employed for entering/transiting the countries?

working permits, working visas

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

closed social media platforms, local language- not familiar with the sites

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

don't know

Q11

Other related issues

mostly migrants misuse visas and enter through BCP's, sometimes they cross the river illegally, put that is 1-3 cases a year

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

person's interests, religion, sexual inclinations

Q13

Vulnerable Groups

sexual minority, religious groups (Jehova witnesses), children

Q14

Operational Activities

law enforcement activities are restricted

Q15

Route Factors

accessibility, financial resources, landscape features, surveillance activities, route length

Q16

Other individual variables

men, 20-40 years old, lower income, low education level

Page 8: Push factors

Q17

Social factors

discrimination

Q18

Political factors

political decisions - LGBT is forbidden, Jehova witnesses is a terrorist organization

Q19

Environment and Health

no accessibility to healthcare, low development countries

Q20

Conflict

war-zones, fear of mobilization, fear for his/her life

Q21

Economy

low salaries, no work

Q22

Other

no social benefits in countries

Page 9: Pull factors

Q23

Economy

social benefits, higher salaries, financial aid

Q24

Social Factors

tolerance, sensibility, receptivity, your ethnic community in the destination country

Q25

Political factors

same-sex marriages, religious freedom

Q26

Environment & Health

free healthcare, higher living standards, developed healthcare

Q27

Other

relatives in destination countries, large group of persons who speak the migrant's language

Page 10: Human Security Factors

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

age 20-40, gender male, citizenship KAZ, KGZ, UZB, RUS

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

usually no situational vulnerability, health is ok, attitude ok, availability to food and water ok

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

refugee detentions centers are open- persons can leave anytime, lack of police controls in transit countries

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

no complex activities, mediocre skills, can't stay undetected for a long time, usually one resource

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

fear, hope, usually 1-3 attempts, mostly financial resources needed

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

freedom of religion, financial gain, healthcare

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

advertisements/stories of an illegal route/ modus operandi, providing fraudulent documents or original documents (work permits), finding means of transportation/ route, contacts, accommodation

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

growth of different nationalities in the country, occupying law enforcement resources

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

there is no integration in the community, the emergence of ghettos, unrest between ethnic groups

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

lack of preparedness, limited resources, lack of knowledge

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

political decisions, poor living conditions

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

countries policy makers - migration policy- open or not.

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

public sector - police, border guard, social services; financial system, healthcare, education

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

don't understand the question

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

the collapse of border control - no barriers between countries, free flow of migrants, no border guards, no understanding of persons (how much, were, when) coming into the country

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

short-term impact - exhausting the social and law enforcement resources, no mental support for the migrants - may act unpredictably; long term - migrants are dependent of social services, highly acceptable to influences - don't really understand the question

#5

Page 1

Q1 **Irregular Migration from the Eastern Borders Route**

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

Finland, Sweden

Q3

Which are the most popular transit countries?

Lithuania, Latvia, Estonia

Q4 **Land route**

Which is the most popular mode of transport

Page 6: Modus operandi employed regarding the following issues

Q5 **[100 - 200)**

What is the total number of people involved in this risk scenario?

Q6

What means of transport are used to cross the borders from the country of origin?

First air, then land.

Q7

What is the country of origin and what is the destination country?

IND, SYR, EGY etc. and destination is Scandinavia and Central Europe.

Q8

What kind of documents are employed for entering/transiting the countries?

To RUS/BLR they come with passport and visas

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

arabic, english

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

the are some indication that smugglers tell migrants to use violence against border guards.

Q11

Other related issues

nothing

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

Push factors from destination countries

Q13

Vulnerable Groups

children, women

Q14

Operational Activities

Usually organized

Q15

Route Factors

Depending on RUS/BLR border guard

Q16

Other individual variables

nothing

Page 8: Push factors

Q17

Social factors

economic situations, lobby work by smugglers

Q18

Political factors

could be, gay situation in Russia

Q19

Environment and Health

could be, earthquake

Q20

Conflict

yes, war in UKR, in SYR etc

Q21

Economy

yes, that is always a factor

Q22

Other

nothing

Page 9: Pull factors

Q23

Economy

good economic situation

Q24

Social Factors

communities in region

Q25

Political factors

not as main factor

Q26

Environment & Health

not as main factor

Q27

Other

nothing

Page 10: Human Security Factors

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

Mostly young man

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

exposure to torture, availability of food/water/sanitation facilities,

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

experience of push-backs, asylum protection system not functional in transit countries

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

willingness to leave home country

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

hope for a better life

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

financial gain,

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

ecruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

Prevention, risk preparation

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

the share of Russian citizens in migration is still low

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

i am not sure

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

vulnerability depends on the situation of the border guard and also on the behavior of the Russian/Belarusian border guard

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

risk assessments influence positively

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

social

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

i am not sure

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

depends on the number of cases

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

falling between the cracks of the asylum system

Page 1

Q1 **Human Trafficking through the Central Mediterranean**

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

Italy, Malta

Q3

Which are the most popular transit countries?

Libya, Tunisia

Q4 **Water route**

Which is the most popular mode of transport

Page 6: Modus operandi employed regarding the following issues

Q5 **[> = 300)**

What is the total number of people involved in this risk scenario?

Q6

What means of transport are used to cross the borders from the country of origin?

Air from the country of origin and sea from the transit country Libya or Tunisia

Q7

What is the country of origin and what is the destination country?

Country of origin Bangladesh, destination Libya and Italy

Q8

What kind of documents are employed for entering/transiting the countries?

Passport

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

Bangladeshi first make arrangements with Bangladeshi Smuggling networks in Bangladesh. These networks are referred by victims as travel agents

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

The 'Agents' in Bangladesh are connected with other smuggling networks in Libya

Q11

Other related issues

Most of the Bangladeshi pay for a work package that is arranged from their home country which they pay around 400,000-600,000 Taka

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

Economic situation in their home country

Q13

Vulnerable Groups

Males 18-45, seeking emlployment

Q14

Operational Activities

NA

Q15

Route Factors

Flight availability and price

Q16

Other individual variables

NA

Page 8: Push factors

Q17

Social factors

poor education

Q18

Political factors

corruption and lack of accountability of thee state

Q19

Environment and Health

Draught

Q20

Conflict

NA

Q21

Economy

Unemployment, lack of job opportunity

Q22

Other

NA

Page 9: Pull factors

Q23

Economy

Employment opportunities

Q24

Social Factors

Feeling Safe

Q25

Political factors

NA

Q26

Environment & Health

Access to Healthcare

Q27

Other

Access to fundamental rights, asylum

Page 10: Human Security Factors

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

18-45, Male

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

NA

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

NA

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

The Network are very organised and linked between two countries (Bangladesh and Libya). In Bangladesh these network pretend that they offer work opportunities to attract the victims

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

NA

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

financial gain, labour exploitation

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

recruiting migrants, providing a package (flights, employment and accomodation)

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

Pressure on the external border

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

Irregular Secondary Movements

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

lack of cooperation by third countries

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

NA

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

NA

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

Financial, Security

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

NA

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

NA

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

Loss of life due to unseaworthy vessels

Q1 **Irregular Migration from the Eastern Borders Route**

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

UK, Germany, France

Q3

Which are the most popular transit countries?

Lithuania, Latvia, Poland

Q4 **Land route**

Which is the most popular mode of transport

Page 6: Modus operandi employed regarding the following issues

Q5 **[> = 300)**

What is the total number of people involved in this risk scenario?

Q6

What means of transport are used to cross the borders from the country of origin?

vehicle, aircraft

Q7

What is the country of origin and what is the destination country?

Origin:syria, iraq, india, pakistan, nepal - Destination: UK, germany, France

Q8

What kind of documents are employed for entering/transiting the countries?

original:russian visa, passport. Fake: ID, passports

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

all detailed guides and contacts are provided by smuggler in private messages.

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

no

Q11

Other related issues

no

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

no

Q13

Vulnerable Groups

women with children

Q14

Operational Activities

no

Q15

Route Factors

routes are chosen and planned by smygglers

Q16

Other individual variables

no

Page 8: Push factors

Q17

Social factors

not mapped

Q18

Political factors

not mapped

Q19

Environment and Health

not mapped

Q20

Conflict

not mapped

Q21

Economy

low standard of life, pooreness,

Q22

Other

not mapped

Page 9: Pull factors

Q23

Economy

benefits, high standard of life, no need to work for a living

Q24

Social Factors

big communities

Q25

Political factors

not mapped

Q26

Environment & Health

not mapped

Q27

Other

not maped

Page 10: Human Security Factors

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

males 20 to 40

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

not mapped

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

negative border crossing experience as a factor is indicated

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

high organizing (and recruiting) skills, money transfer skills, potential money lowdering and corruption

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

physical profit (money)

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

physical profit (money)

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

very simple smuggling network consist of 3 levels: high- organizer (residenting outside EU), middle - recruiter of drivers, organiser of border crossings, low - recruited drivers fo migrants

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

positive - increasing of situational awareness for authorities, mapping push/pull factors

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

not mapped

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

not mapped

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

not mapped

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

not mapped

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

not mapped

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

not mapped

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

not mapped

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

asylumseekers collect big money for smugglers and can be victims of scams. Smugglers guide them to risky physical conditions

Respondent skipped this question

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?

Respondent skipped this question

Q41

Linkages and feedback loops What are the linkages between elements of the system, including feedback loops?

Respondent skipped this question

Q42

Tipping points What are the thresholds past which the system faces critical transitions (e.g., the collapse of border management, etc.)?

Respondent skipped this question

Q43

Humanitarian Impacts What are the possible humanitarian impacts that may affect people? What are the possible short-term impacts? (e.g. mental & physical health) What are the possible long-term impacts? (e.g. in the case of migrant smuggling: luck of trust, falling between the cracks of the asylum system)

Q1

In this section, three risk scenarios are given with their corresponding descriptions. Choose one of the following scenarios

Irregular Migration from the Eastern Borders Route

Page 5: Risk Categories

Q2

Which are the most popular countries of destination?

Respondent skipped this question

Q3

Which are the most popular transit countries?

Respondent skipped this question

Q4

Which is the most popular mode of transport

Respondent skipped this question

Page 6: Modus operandi employed regarding the following issues

Q5

What is the total number of people involved in this risk scenario?

Respondent skipped this question

Q6

What means of transport are used to cross the borders from the country of origin?

Respondent skipped this question

Q7

What is the country of origin and what is the destination country?

Respondent skipped this question

Q8

What kind of documents are employed for entering/transiting the countries?

Respondent skipped this question

Q9

What guides are employed to help people transit the country? What is the corresponding language used in social media platforms?

Respondent skipped this question

Q10

Other information or assistance related to promoting violence, harm or illegal activities.

Respondent skipped this question

Q11

Other related issues

Respondent skipped this question

Page 7: Individual variables that are related to this risk scenario

Q12

Context - Dependent factors

Respondent skipped this question

Q13

Vulnerable Groups

Q28

Individual/Embodied factors. What are the individual/personal characteristics of people involved in this risk scenario? (e.g. age, gender and sexual orientation, racial and ethnic identity, citizenship status (statelessness), etc.)

Respondent skipped this question

Q29

Situational factors. What is the situational vulnerability? (e.g. mental and physical health, attitudes towards health practitioners, procedures, authorities, exposure to torture, availability of food/water/sanitation facilities, etc.)

Respondent skipped this question

Q30

Structural factors. What is the structural vulnerability? (e.g. experience of push-backs, asylum protection system not functional in transit countries, policies requiring detention on arrivals, lack of cultural mediation/translation/interpretation, etc.)

Respondent skipped this question

Page 11: Threat Actors' Profile

Q31

Skills (or level of expertise) What are the skills of the threat actor? Does he have the ability to carry out complex activities? Does he use multiple types of resources? Does he have the ability to cover up the traces and stay undetected for a long time?

Respondent skipped this question

Q32

Motivations What are the motivations of the threat actor? What is the number of attempts? What are the resources allocated to each attempt?

Respondent skipped this question

Q33

Intentions What are the intentions of the threat actor? (e.g. financial gain, assisting people to cross national borders, exploitation of individuals, etc.)

Respondent skipped this question

Q34

Threat Steps What types of actions are carried out? (e.g. recruiting migrants, transporting migrants, providing fraudulent documents, bribing officials, providing food/water/shelter etc.)

Respondent skipped this question

Page 12: Impact Categories

Q35

Direct Impacts What were positive, negative and direct impacts resulting from the risk scenario analysis?

Respondent skipped this question

Q36

Indirect Impacts What were possible impacts that still didn’t manifest?

Respondent skipped this question

Q37

Drivers of vulnerability What processes or conditions influenced the negative impacts that occurred as a result of the risk scenario analysis?

Respondent skipped this question

Q38

Root Causes What are the underlying factors influencing these drivers of vulnerability?

Respondent skipped this question

Q39

Agents What decision-making entities influenced risk and impacts (positively and negatively) within the system and how?

Respondent skipped this question

Q40

Affected sectors or systems Which sectors (e.g. tourism, etc.) or systems (e.g. social, economic, financial, education, etc.) were affected?
