REPLICATION FILES FOR

"ATTITUDES ON THE SIZE OF UNEMPLOYMENT BENEFITS: IDEOLOGY AND NUMBERS"

January 2019

This document describes the files needed to reproduce the results reported in the article *"Attitudes on the Size of Unemployment Benefits: Ideology and Numbers"* (Accepted for publication in *Scandinavian Political Studies*).

The replication files are as follows:

1. **Benefits_study1.dta**: Raw survey data from experiment 1 (Stata format: .dta)
2. **Benefits_study2.dta**: Raw survey data from experiment 2 (Stata format: .dta)
3. **Benefits_study1_stata15.do**: A Stata do-file, used to produce all of the empirical results from experiment 1 reported in the article (Stata format: .do)
4. **Benefits_study2_stata15.do**: A Stata do-file, used to produce all of the empirical results from experiment 1 reported in the article (Stata format: .do)

To reproduce the results:

1. Download and save all replication files in "C:\Attitudes_on_Benefits" (if saved elsewhere, minor adjustments may be needed in the Stata do-file)
2. Run the Stata do-file **Benefits_study1_stata15.do**, which uses the datafile **Benefits_study1.dta**
3. Run the Stata do-file **Benefits_study1_stata15.do**, which uses the datafile **Benefits_study1.dta**

- Please note, exact layout of figures differs from published version (only in layout, not in content).
