Information about Copyrighted Content

Some instruments administered as part of this study may contain in whole or substantially in part contents from copyrighted instruments. Reproductions of the instruments are provided as documentation for the analysis of the data associated with this collection. Restrictions on "fair use" apply to all copyrighted content. More information about the reproduction of copyrighted works by educators and librarians is available from the United States Copyright Office.

NOTICE
WARNING CONCERNING COPYRIGHT RESTRICTIONS

The copyright law of the United States (Title 17, United States Code) governs the making of photocopies or other reproductions of copyrighted material. Under certain conditions specified in the law, libraries and archives are authorized to furnish a photocopy or other reproduction. One of these specified conditions is that the photocopy or reproduction is not to be "used for any purpose other than private study, scholarship, or research." If a user makes a request for, or later uses, a photocopy or reproduction for purposes in excess of "fair use," that user may be liable for copyright infringement.

Code Descriptors

Prohibition Status Codes range between 'Ø' and '9'. A 'Ø' indicates that no information indicating that the county was dry was obtained for that year. A '1' means that one source indicated the county dry in that year. A '2' means two sources, a '3' three sources, etc. A '9' indicates that the entire state which that county was part of was dry during the specified year. Blanks indicate that the county did not yet exist.

The ambiguity check is used to distinguish between counties with duplicate ICPSR codes. When two duplicate ICPSR codes are encountered, the first county, alphabetically, has an ambiguity check value of '1', the second '2', the third '3', etc. If the ICPSR code for the county is unique the ambiguity check value is 'Ø'.

ICPSR 08343

Prohibition Movement in the United States, 1801-1920

Variable Description and Frequencies

Note: Frequencies displayed for the variables are not weighted. They are purely descriptive and may not be representative of the study population. Please review any sampling or weighting information available with the study.

Summary statistics (minimum, maximum, mean, median, and standard deviation) may not be available for every variable in the codebook. Conversely, a listing of frequencies in table format may not be present for every variable in the codebook either. However, all variables in the dataset are present and display sufficient information about each variable. These decisions are made intentionally and are at the discretion of the archive producing this codebook.
