WB
China
Panel A: Outcome and treatment measurement
Conflict threshold BRD>=5
Conflict threshold BRD>=25
Inverse hyperbolic sine of BRD
Population-weighted aid
Inverse hyperbolic sine of aid
Panel B: Selection on the local level
Control for press freedom
Control for pre-trends
Lagged dependent variable
Control for other selection concerns
Both donors
Panel C: Clustering
Regional clustering
Country-year clustering
Country clustering
Panel D: Modifiable area unit problem
Aggregation level: ADM2
Panel E: Alternative estimators
Negative binomial
Poisson
Panel F: Heterogeneity
Low ethnic fractionalization
High ethnic fractionalization
Coalition: excluded
Coalition: included
Autocracy
Democracy
