Appendix L – Board Action Codes

Code	Definition
1	Original – An original appeal action is an appeal where there has not been a BVA decision entered concerning the issue(s) certified for appellate review.
2	Supplemental – A supplemental action occurs after the Board has entered its decision. The Board may find it necessary to enter a supplemental action to address relevant evidence not cited in its initial decision. When so determined, the Board will publish another decision to supplement the initial decision. The second decision will address only the omitted portion of its initial decision and will not alter the original determination.
3	Post-remand – A post-remand action occurs when an appeal is returned to the Board's docket following evidentiary development resulting from a Board remand order.
4	Reconsideration – Reconsideration of a final Board decision can be granted at any time by the Board on motion by the appellant or his or her representative or on the Board's own motion based on substantiation of an allegation of obvious error of fact or law, upon discovery of new and material evidence in the form of relevant records or reports of the service department concerned; or upon allegation that an allowance of benefits by the Board has been materially influenced by false or fraudulent evidence submitted by or on behalf of the appellant. *See* 38 C.F.R. § 20.1000. Regardless of the ruling on motion, upon dispatch of the ruling, the record will reflect type action "4".
5	Vacate – A vacate action is appropriate when the Board vacates a previous decision upon request of the appellant, representative, or on its own motion. A vacatur is appropriate when an appellant has been denied due process or was allowed benefits based upon false or fraudulent evidence. The Board's order to vacate its decision does not finalize the appeal; it merely sets it aside. There are two end results for a vacate action: 1) a vacate action can result in a standalone disposition to vacate the previous decision and a de novo action with a final or remand disposition will always follow; or, 2) the other end product for a vacate action is when the Board vacates a previous decision and issues a remand or final disposition within the same decision. In situations such as this, a de novo action will not follow.
6	*De Novo* Review – The term *de novo* refers to a legal review conducted a second time, as if there had been no former review. A de novo action may be entered on the docket following a decision to vacate.
7	Court remand – Under 38 U.S.C.A. § 7266, a decision of the Board granting less than the complete benefits sought on appeal can be appealed to the U.S. Court of Appeals for Veterans Claims (CAVC) provided the Notice of Disagreement(NOD) was filed with the regional office on or after November 18, 1988. A Notice of Appeal (NOA) must be filed with the Court within 120 days from the date of mailing of the Board's decision to the Appellant. If the case appears on the Court's docket and the Court vacates the Board's decision, the file is returned to the Board for an appropriate disposition and entered in VACOLS as a Court remand action. Type action "7" is also used for Court remand appeals remanded by BVA and that are returned to BVA post remand.
8	DOR – When an Appellant disagrees with a final BVA decision, he/she can exercise his/her right to file an appeal with CAVC. Prior to April 1, 2008, when that occurred, the Office of General Counsel would obtain the claims folder from the regional office (RO) and forward it to the Board to issue a Certified List (a document which designated the record with all evidence used to deny the issue) signed by the presiding VLJ. CAVC modified their Rules of Practice for any NOA filed after April 1, 2008. The modification to the Rules of Practice no longer requires BVA to issue a Certified List.
9	CUE – Effective November, 27, 1997, Congress mandated Public Law (P.L.) 105-111 that (in essence) stated a prior BVA decision is subject to revision on the grounds of clear and unmistakable error (CUE) if evidence establishes an error, then the prior Board decision will be reversed or revised. CUE claims are significantly different because the Board retains original jurisdiction (it is a claim rather than an appeal as BVA is the first adjudicator body to review the claim). A CUE claim has never been reviewed at the regional level. CUE claims are also different because no new evidence can be considered in the claim that was not a part of the evidence file at the time of the Board decision for which the CUE claim is based. There are no hearing testimony options available for the appellant unless a motion is filed. An Appellant (or representative) can file one CUE claim - once a CUE decision is rendered, there are no more available re-filing opportunities with the Board. If the CUE decision is adverse to the appellant, the Appellant can appeal the adverse decision to CAVC.
P	Post Decision Development – Not in use, but retained for historical purposes.
