Making Electoral Democracy Work

README – Version 2 release (April 2018)

This new version (V2) of the MEDW aggregated dataset brings two minor changes when compared to the original version (V1):

1) It adds weights that were missing for some samples in V1.

2) It updates variables SD6D & SD6E (cca 80 respondents whose answers do not match their reported age are now set as missing/DK).

We thank Alexander Morin-Chassé & Andrés Santana for their helpful suggestions.
