This repository contains code (Stata do files) to replicate the results in the paper titled "***The Effect of Financial Resources on Fertility: Evidence from Administrative Data on Lottery Winners***."

Please execute the code following the folder and file numbering.

Below are brief descriptions of each folder:

- 1_pre_work: This folder contains code to clean the raw data and construct variables.
- 2_build_data: This folder contains code for sample selection, data preparation, and construction.
- 3_population: This folder contains code to construct the population data as well as compute the weights of the sample to reweight it to represent the population.
- 4_analysis: This folder contains code that produces each table and figure.

People with questions about the data or code can contact the authors at:

- Tzu-Ting Yang: ttyang@econ.sinica.edu.tw
- Yung-Yu Tsai: ytsai@nccu.edu.tw
