Replication Data: Determining the credibility of commitments in international climate policy by:

Victor, David G. (UC San Diego)
Lumkowsky, Marcel (University of Kassel)
Dannenberg, Astrid (University of Kassel)

This folder contains the dataset and corresponding do-files to reproduce the main results from the paper "Determining the credibility of commitments in international climate policy" and from the Supplementary Information. The survey data was collected between September 2020 and January 2021 using an online questionnaire on QuestionPro. External data was matched based on the home country indicated by the respective respondent. Sources for external data are listed in the SI.

Files:

- 01_MAIN_TEXT_DATA.dta, Dataset that contains all observations and variables to reproduce results of the main paper.
- 02_MAIN_TEXT_DO.do, Stata do-file containing the commands needed to replicate the results of the main paper.
- 03_SI_DATA.dta, Dataset that contains all observations and variables to reproduce results of the SI.
- 04_SI_DO_1.do, Stata do-file containing the commands needed to replicate the results of the SI (except Tables S19-S20, Figures S2-S5).
- 05_SI_DO_2.do, Stata do-file containing the commands needed to replicate the results from Tables S19-S20 and Figures S2-S5 of the SI.
- 06_REPLICATION_CODEBOOK.pdf, Description of the variables in the dataset and the relevant survey questions
