Understanding Society

Last year members of your household kindly agreed to be interviewed for *Living in Britain*, a study conducted by researchers at the University of Essex. The study has now been renamed as *Understanding Society* and because it is concerned with how people's lives change over time, we would very much like to interview you and your household again.

Understanding Society covers important subjects such as our health, our opinions, our families and our work. The findings from *Understanding Society* will help us build up a detailed picture about the lives, experiences, behaviours and beliefs of people across the UK in the 21st century and provide an important understanding of diversity within the population. It will help us understand the long term effects of social and economic change in the UK and assist in future decision-making.

Your household's help in the past was very much appreciated and we would like you and your household to take part in the next stage of the study, which is being carried out by NatCen. An interviewer will be in touch with you to arrange a convenient time for an interview that should last around half an hour.

As a token of our thanks, your gift voucher for this year's interview is enclosed.

If you have children aged 10 – 15 we hope you will allow them to complete a short self-completion questionnaire about their hobbies, friends, school-life and hopes for the future. Each child will receive a £3 gift voucher as a thank you for completing the questionnaire.

This year, the questionnaire is available on-line at http://youth.natcen.ac.uk Details for your child(ren) to use to login and complete their questionnaire can be found on the back of this letter. Parents can also access a copy of the questionnaire on-line.

If your household's contact details have changed please let us know by calling Freephone **0800 252 853** or emailing **contact@understandingsociety.org.uk** For more information on the survey visit **www.understandingsociety.org.uk/participants**

Your participation is completely voluntary but we hope you will find the time to help us with this important study and that you enjoy taking part.

Yours,

.....

Nick Buck

Director, *Understanding Society*

Understanding Society

Last year members of your household kindly agreed to be interviewed for *Living in Britain*, a study conducted by researchers at the University of Essex and you may have completed a short questionnaire for the study. The study has now been renamed as *Understanding Society* and because the study is concerned with how people's lives change over time we would very much like to interview you this year. It is particularly important to follow the movement of young people from school and into college, university or paid work so we do hope you will take part.

Understanding Society covers important subjects such as our health, our opinions, our families and our work. The findings from *Understanding Society* will help us build up a detailed picture about the lives, experiences, behaviours and beliefs of people across the UK in the 21st century and provide an important understanding of diversity within the population. It will help us understand the long term effects of social and economic change in the UK and assist in future decision-making.

Your household's help in the past was very much appreciated and we would like you and your household to take part in the next stage of the study, which is being carried out by NatCen. An interviewer will be in touch with you to arrange a convenient time for an interview that should last around half an hour.

As a token of our thanks, your £10 gift voucher for this year's interview is enclosed.

If your household's contact details have changed please let us know by calling Freephone **0800 252 853**
or emailing **contact@understandingsociety.org.uk**
For more information on the survey visit

Your participation is completely voluntary but we hope you will find the time to help us with this important study and that you enjoy taking part.

Yours,

Nick Buck
Director,
Understanding Society
