Evan Schulz
Internal Revenue Service

The data repository for "On the Nature of Entrepreneurship" includes the following files (found at the Harvard Dataverse https://doi.org/10.7910/DVN/SSRRMX):

- **Public_Release_Data.zip**: Data reviewed by the IRS to ensure that no confidential information is disclosed. The data in this zip-file are comma-separated-value (csv) files that were designed to be loaded into the LaTeX manuscript and online appendix via the datatool package. The underlying data in Public_Release_Data.zip can also be viewed online at the data repository as "tab" files. The **tab files** have names corresponding to results in the main paper and online appendix.
- **OnlineAppendix.pdf**: This file was created at the IRS and includes all of the supplementary material, for example, results for more disaggregated subpopulations. The underlying data are in the Public_Release_Data.zip and can be visualized at our website or via a portable package described next.
- **Visualize_the_OTNOE_Data.zip**: Portable csv and html files that allow readers to visualize the results reported in the main text and the online appendix.[1] Included in the zip file are the instructions shown below to either view it directly via a server at the University of Minnesota or to port the files and create a website on a local device.

Visualizing the data and main results:

- Access it directly here
- Download Visualize_the_OTNOE_Data.zip and run locally:
  1. Open a terminal (on Linux or Mac) or powershell (on Windows)
  2. Extract files:
     - On Windows:
       Expand-archive -Path "Downloads\Visualizing_The_OTNOE_Data.zip" -DestinationPath
     - On Linux or Mac:
       unzip ~/Downloads/Visualizing_The_OTNOE_Data.zip" -d ~/Downloads
  3. Check if python available
     - On Windows:
       python –version
     - On Linux or Mac:
       python3 –version
  4. Install python if needed by clicking here
  5. Run local server:
     - On Windows:
       cd Downloads\Visualizing_The_OTNOE_Data
       python -m http.server 8000
     - On Linux or Mac:

[1] The files were created by our talented research assistants Margaret Xiao and Isaiah Dalzell, who are students at the University of Minnesota. We want to thank the Heller Hurwicz Economics Institute for funding this project.

```
cd ~/Downloads/Visualizing_The_OTNOE_Data
python3 -m http.server 8000
```

6. After seeing "Server HTTP on :: port 8000 (http://[::]:8000/) ..."
   - Open a browser
   - Enter: http://localhost:8000/OTNOELive.html in search panel
7. When finished, type Command +C or Ctrl +C in the terminal/powershell
