Replication Data for: Picture This: Social Distance and the Mistreatment of Migrant Workers

Toman Barsbai, Vojtěch Bartoš, Victoria Licuanan,
Andreas Steinmayr, Erwin Tiongson, and Dean Yang

The dataverse contains all data and code to replicate the results in the paper. The file contains two folders.

- **field_experiment** – all data and code for the field experiment
- **online_experiment** – all data and code for the online experiment

Each folder contains a self-explanatory 00_README.txt file. In each folder, we prepared a master .do file. After changing a directory path in each of the master .do files to your working directory, the code runs automatically and produces all the results. It also automatically loads all non-native packages. We tested the code using Stata 18.

Important is to maintain the following structure of folders (on separate pages):
