The British Election Study at the University of Essex

Technical Paper 1981:2 Questionnaire Continuity Guide

The British Election Study (BES) at the University of Essex was started as a research project in 1974 to continue the series of election surveys previously conducted by David Butler and Donald Stokes. The Essex University project is wholly funded by the Social Science Research Council. Mr Ivor Crewe and Professor Bo Sarlvik have been Directors since 1974. Dr David Robertson (now at St. Hugh's College, Oxford) joined the project as a Director in 1975. At different stages in the project the Directors have been assisted by the following Senior Research Officers: Mr (now Professor) J.Alt, Mr A.Fox, Mr N.Day and Mr R.MacDermid. The British Election Study has conducted interview surveys of eligible voters following the general elections of February 1974, October 1974 and May 1979. The series of studies also includes a mail questionnaire survey conducted after the Referendum on Britain's membership of the EEC in 1975. In accordance with the SSRC grant conditions, the data gathered by these surveys are deposited with the SSRC

Survey Archive at the University of Essex and made available to academic researchers for further analysis.

* * *

This technical paper has been constructed to provide a comprehensive guide to the text of questions selected for interviews conducted in the series of election surveys, from 1963 to present. Not all questions were asked in each and every study undertaken in that period. The continuity guide enables the researcher to select variables that can be

analysed overtime. As is shown in the following pages, questions have been grouped under sectional headings. These are further subdivided to give more detail of particular aspects dealt with. The questions themselves are presented on the left-hand side of the page and in several cases are preceeded by a phrase in block letters. This was not included within the actual text but provided the interviewer with an instruction, dependent upon the respondent's answer to the preceeding question, as to which question to proceed to. Inclusion of this instruction in the guide gives the reader some indication of the selective processes necessarily undertaken whilst the interview was in progress.

On the left-hand side of the page each question is followed by a row of figures, and in many cases accompanied by symbols (referred to in the section entitled 'symbols'). These signify variations in question wording in the individual interview surveys conducted after the general

elections. From the 1963 to the 1970 columns, the question numbers denote those questions asked of respondents in the Butler and Stokes Panel series. The following columns refer to surveys conducted by the British Election Study.

The surveys carried out by the British Election Study at the University of Essex are described in the project's Technical Paper 1981:1.

It should be noted that the questionnaire types used in the October 1974 study were designated as questionnaire types 'A', 'B' and 'C'. Type 'B' is the most comprehensive version and was used for respondents in the cross-section sample who had not been interviewed in the February 1974 survey. The 'A' questionnaire was used for respondents in the cross-section sample who had been interviewed in February 1974 and is a somewhat abridged version of the 'B' questionnaire. The 'C' questionnaire was used for a special booster sample in Scotland.

* * * *

QUESTIONS ARE GROUPED UNDER THE FOLLOWING HEADINGS:

Pages 1 - 3	ATTENTION TO THE MEDIA AND POLITICS
4 - 6	INTEREST, DISCUSSION, POLITICAL PARTICIPATION
7 - 10	PARTISANSHIP, POLITICAL ANTECEDENTS, PARTISANSHIP OF ASSOCIATES
11 - 18	ELECTORAL BEHAVIOUR
19 - 22	ELECTION CAMPAIGNS, COALITION AND DEMOCRATIC RESPONSIVENESS
23 - 26	KNOWLEDGE OF M.P.S AND CANDIDATES
27 - 33	THE PARTIES
34 - 35	PRESSURE GROUPS
36 - 38	SOCIAL CLASS
39 - 41	TRADE UNION MEMBERSHIP
42 - 58	POLITICAL ISSUES
59	FOREIGN RELATIONS
60 - 65	COMPOSITE QUESTIONS
66 - 73	THE ECONOMY
74 - 81	BACKGROUND DATA

SYMBOLS

!	Slight textual variation in question wording in different years.
+	Asked of random half sample
?	Duplication of question number
*	1970 Surveys only. The asterisk indicates that the question was asked of some but not necessarily all respondents in 1970. A question number in the 1970 column indicates that the question was asked of respondents in the Butler and Stokes panel series which ended in 1970; ie the question number refers to the questionnaire published by ICPR in "Study of Political Change in Britain 1963-1970" Volume II Questionnaires and notes.
	February 1974 only.
SW	Only asked in Scotland and Wales
	October 1974 only.
A	Only asked of 'A' Series respondents
B	Only asked of 'B' Series respondents
C	Only asked of 'C' Series respondents

ATTENTION TO THE MEDIA AND POLITICS.

							PANEL	X-SEC	

constituency either, how would you vote? 47(f)

IF WOULD STILL PREFER LIBERALS Suppose that there was a straight fight between the Conservatives and Labour in this constituency, how would you vote? 47(g)

IF DON'T KNOW WHICH PARTY WOULD VOTE FOR Well, are you leaning towards one of the parties? Which party is that? 47(h)

(iii) Past Voting:

Questions on respondents' voting histories have been asked in all surveys. Normally at least two previous elections have been covered. In addition, between 1963 and 1969 questions were asked about the first election in which the respondent voted where this was different from the two previous elections. The precise question wording changed of course from year to year and in order to save space the voting history questions

have been summarised in the following table. The general format of the previous vote questions was as follows:

"Thinking back to the election in ...., when ..... led the Conservatives (first became Prime Minister)
and ..... led the Labour Party, do you remember whether you voted then ?"
IF YES "Do you remember which party you voted for ?"
IF DID NOT VOTE OR DON'T KNOW "Do you remember whether you preferred one of the parties to the other
then ? Which party was that ?

Taking just the General Elections since the end of the Second World War, have you voted for the same party or for different parties?	44									
IF SAME PARTY Which party is that?	44									
Can you tell me which General Elections seem you you to have been especially important? Any others? Did you vote in that election? Which party did you vote for in that election?	53									

Local Election Voting

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
						PANEL	X-SEC		
Talking to people around the country, we've found that a great many people weren't able to vote in the local elections early this May (earlier this Spring) How about you? Did you vote in the local elections this year or did something prevent you from voting?	45(a)	54(a)							
IF VOTED How did you vote? Which party was that?	45(b)	54(b)							
Do you always vote that way in local elections?	45(c)								
Were there any issues in the local elections this year that were especially important to you?	45(d)								
What were they?	45(e)								
Only about half the people voted in the Scottish regional and district elections last May. How about you - did you vote in this year's regional and district elections? IF YES And could you say for which party or candidate you voted?									52(S)C
In many areas there were local district elections on the same day									

the General Election was held. Were there local district elections where you live? 44(a)

Did you vote in one of these local district elections as well as in the General Election? 44(b)

Did you vote for any of the candidates on this list? Some people were able to cast votes for more than one local candidate, if they lived in places where more than one local councillor had to be elected from each ward, so you should mention as many different parties as you voted for.
Did you vote for:
One or more Conservative candidates 44(c)
One or more Labour candidates
One or more Liberal candidates
One or more Scottish National Party candidates
One or more Plaid Cymru (Welsh Nationalist) candidates
One or more Ratepayers' candidates
One or more Independent candidates
Other candidates (SPECIFY):

ELECTION CAMPAIGNS, COALITIONS AND
DEMOCRATIC RESPONSIVENESS.

Labour) couldn't win. Would you have rather seen (Labour/Conservative) form a government? 40(i, o) 44(h, t,n) 48(h, n)

IF SAYS LIBERALS DON'T STAND HERE
How good a chance would you say they would have if they did stand

here? Very good, fairly good, not very good, no chance. 49(c)

(ii) Party Activity in the campaign

Would you say the Liberal's campaign here in this constituency was very active, fairly active, or not very active? 9(b)

Would you say the Scottish National Party's campaign here in this constituency was very active, fairly active or not very active? 10(b)

Did any of the parties canvass at your home during the election campaign? 45(a)

IF YES Which party called? 45(b)

(iii) Election Campaigns and Political Problems

Do you think that the recent election campaign generally gave the people the facts about the problems facing the country? 12 12 5

How much do you think the election will help to solve the major problems that the country is facing - a great deal, a little, or not at all? 11 11

Now that you know the outcome of the election, what are the good things that you think will happen as a result of the election? What other good

things? And what are the bad things you think will happen as a result of the election? And what other bad things? 13(a,b) 12(a,b)

(iv) Coalitions

	BUTLER AND STOKES					CREWE AND SARLVIK	
	1963	1964	1966	1969	1970	FEB74	OCT74	MAY79
				PANEL	X-SEC			
Some people think it is best if the Government is formed by one party only. Others think it is best if the Government is formed by more than one party. Leaving aside the situation we have at present, do you in general think it is:								
Much better to have a Government formed by one party								
Somewhat better to have a Government formed by one party								
Somewhat better to have a Government formed by more than one party								
Much better to have a Government formed by more than one party								
Don't know								50(a)
When you were deciding about voting, how important was the readiness of the parties to join in with the others in a Government - the most important single thing, fairly important, or not very important?								50(b)

Leaving aside the actual result of the election, which kind of Government would you personally most like to have? If the Government you would most like to have is not on this card, just say what it is.
Would you like:
A Government formed by the Conservative party alone
A Government formed by the Conservative and Liberal parties together
A Government formed by all parties
A Government formed by both the Labour and Liberal parties
A Government formed by the Labour party alone — 51(a)

And what kind of government do you feel would be the next best? — 51(b)

Still looking at this card and going back to before you knew the election result, which party or coalition did you think was most likely to become the Government? — 51(c)

(v) Democratic Responsiveness

What mark would you give the National Front?									54

FEELING THERMOMETER

The Conservatives	73	*	
The Labour Party	73	*	
The Liberal Party	73	*	
The Scottish National Party		73	*

On this card are listed some choices of opposite words or phrases and I'd like you to say how much each one applies to a party. I'm going to ask you about the Conservative party and the Labour party. The first choice is between 'keeps its promises' and 'breaks its promises'. You can say whether a party very much keeps

its promises, somewhat breaks its promises or very much breaks its promises.

a) In which box would you put the Conservative party?

b) In which box would you put the Labour party?

c) In which box would you put the Liberal party? (OCTOBER 1974 ONLY)

Keeps its promises - Breaks its promises	9	11AB
Divides the country - Unites the country	9	11AB
Bloody minded - Reasonable	9	11AB
Good for one class - Good for all classes	9	11AB
Extreme - Moderate	9	11AB
Capable - Not capable	9	11AB
Stands firm - Gives way	9	11AB
Does what is best for their own party - Does what is best for the country	11AB	

Here is a list of twelve words and phrases you might use to describe political parties, and between each pair is a measuring stick of seven squares. Taking the first pair of words - i.e. 'Out of date/Modern' as an example, the square on the extreme left would mean that the party concerned is very out of date, the next square would mean it was fairly

out of date and so on. The words at the top of your card will help you to choose the square you think is appropriate. Now will you tell me which square you would use to describe the(Conservative party)(Labour)(Liberal)?

	Do you think that the Labour party's ties to the trade unions are too close, about right, or not close enough?					122	61			
	Do you think that the Labour Party is too willing to listen to the trade unions or not willing enough? Or that things are about right?							57(a)		

Do you think that the Conservative Party is too willing to listen to the trade unions or not willing enough? Or that things are about right? 57(d)

How willing is the Labour Party to listen to self-employed people with small businesses? 57(b)

How willing is the Conservative Party to listen to self-employed people with small businesses? 57(e)

And how willing is the Labour Party to listen to business and industry? 57(c)

How willing is the Conservative Party to listen to business and industry? 57(f)

There has been some talk recently about Communists in trade unions. Which of the statements on this card comes closest to what you yourself feel?

Communists should be banned from holding official positions in trade unions
Even though Communists should not be banned something must be done to reduce their influence in trade unions
There is no need to worry about Communists in trade unions because their influence is rarely important.
Communists have some influence in trade unions and it is generally good.
Don't know/No view 59

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
				PANEL	X-SEC				
Have you changed your mind about this in the last year or two? That is were you close before to one of the other views on this card? If YES which view is that?					60				
Think about when you were deciding about voting. How important to you ....was the question of Communists in trade unions - the most important single thing, fairly important, or not very important?					61				
And when it comes to dealing with Communists in trade unions, which of the parties do you think is best?					62				
In general, how good a job would you say the trade unions are doing for the country as a whole - very good, fairly good, not very good, or no good at all?							59		
And how good a job do you think the trade unions do for their own members - very good, fairly good, not very good, or no good at all?						60			
SOCIAL CLASS									
Do you think of yourself as belonging	69(a)	67(a)	67(a)	74(a)	67	123(a)	70BC	73	

| | | |

When you were growing up, would you say your family was middle class or working class? 70 126 72BC 79

Most people say they belong either to middle class or to the working class. Do you ever think of yourself as being in one of these classes? 65(a) *(a) 69(df) +? * 67(a) + * 74(a) +

Which class is that? 65(b) 69(b) 67(b) +74(b)

What sort of people would you say belong to the middle class? 67(a)

What sorts of jobs do middle class people have? 67(c)

What sort of people would you say belong to the working class? 67(b)

What sort of jobs would you say working class people have? 67(d)

When you first meet someone, how aware are you of their social class? Would you say you usually notice their social class, sometimes notice, or never really notice? 77

What about friends. How easy do you think it is to have friends in other social classes? Which of the answers on this card comes closest to what you feel?
It would be hard to have friends who belong to other social classes
It might be a little difficult to have

friends who belong to other social classes									
There is no difficulty about having friends who belong to other social classes								78	
How wide are the differences between social classes in this country, do you think? Do you think these differences have become greater or less or have they remained about the same?							*		
Would you say you were about average (chosen class) or that you are in the upper or lower part of (chosen class)?	65(d) g,e,c)	69(d) e,c,g)	*67(d, c,e,g)				67(d,

Why is that?	73(r)		*							
IF DOES NOT HAVE A JOB Does anyone in this household belong to a trade union?	73(s)									
Who is it that belongs?	73(t)									
Which trade union is that?	73(u)									
How much interest would you say (member) has in how trade union people are getting along in this country? Does (member) have a good deal of interest in it, some interest or not much interest?	76(f)									
Do you think that trade union members										

vote mainly for one party or are they fairly evenly divided between the parties? 76(g)

IF ONE Which party is that? 76(h)

Why do you think they vote mainly for that party? 76(i)

IF A MEMBER At your place of work how many people who are doing your kind of job are members of a trade union - all of them, most of them, or only some of them? 73(d) 83(e)

IF ALL OR MOST At your place of work do you have to be a member of a trade union to do your job? 73(e) 83(f)

And now how about where you work - how good a job would you say your own trade union is doing for you and your family - very good, fairly good, not very good, or no good at all? 62(a)

Do you think that your own trade union at the place where you work is too ready to take industrial action or not? 62(b)

POLITICAL ISSUES.

The following section contains questions on a number of issues

important in British politics over the last ten to fifteen years. They are subdivided as follows.

(1) Defence and Nuclear Weapons

(2) Devolution

(3) The Environment

(4) The European Economic Community

(5) Immigration (and Enoch Powell)

(6) Law and Order

(7) Nationalisation

(8) North Sea Oil

(9) Rhodesia

(10) The Royal Family

(11) Strikes, Industrial Relations and Trade Union Power

(12) Unemployment

(13) Incomes Policies

(14) The Welfare State (including Housing)

(15) System Support

(16) Women as Members of Parliament and Prime Ministers

(17) Miscellaneous Issues

(1) DEFENCE AND NUCLEAR WEAPONS

There's a lot of talk these days about nuclear weapons. Which of these statements comes closest to what you yourself feel should be done? If you don't have an opinion just say so.
(i) Britain should keep her own nuclear weapons, independent of other countries,
(ii) Britain should have nuclear weapons only as a part of a western defence system, (iii) Britain should have nothing to do with nuclear weapons under any circumstances,

	BUTLER AND STOKES				CREWE AND SARLVIK				
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
(iv) Don't know.	19	22(a)	19(a)		20				
Which party would be more likely to keep nuclear weapons for Britain, the Conservatives, or Labour, or wouldn't there by any difference between the parties on this?		22(b)	19(b)		21				
How do you feel about the reduction of Britain's military strength?									26(j) 26(h)
(Gone too far)							AB		

(II) Devolution

There has been a lot of discussion recently about giving more power to Scotland/Wales. Which of the statements on this card comes closest

to what you yourself feel should be done?

1. Keep the governing of Scotland/ Wales much as it is now — 63 SW — 26(k) C
2. Make sure the needs of Scotland/ Wales are better understood by the government in London
3. Allow more decisions to be made in Scotland/Wales
4. Scotland/Wales should be completely able to run its own affairs.

Could you say which statement comes closest to the view of the Conservative party? — 64 SW — 26(l) C

The Labour Party? — 65 SW — 26(m) C

The Liberal Party? — 66 SW — 26(n) C

Scottish Nationalists/Plaid Cymru? — 67 SW — 26(o) C

was the question of more power for Scotland/Wales - the most important single thing, fairly important, or not very important? — 68 SW

And when it comes to more power for Scotland/Wales do you prefer any of the parties? — 69 SW

People have different views about the

need for a separate Scottish Assembly.

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
How about you? Which of the views on this card comes closest to what you yourself feel? Are you:									
Very much in favour of a separate Scottish Assembly									
Somewhat in favour of a separate Scottish Assembly									
Somewhat against a separate Scottish Assembly									
Very much against a separate Scottish Assembly							26(p) C		
And which of these do you feel is closest to the view of the Conservative party?								26(q)	
							C		
The Labour Party?							26(r) C		
The Liberal Party?								26(s)	
							C		
The Scottish National Party?								26(t)	
							C		
After the recent referendum, opinion is still divided on whether or not to set up an elected assembly for Scotland. By an 'elected assembly' we mean a special parliament in Scotland for dealing with Scottish affairs. Which of the following statements comes									

closest to your view?

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
Scotland should become completely independent									
There should be an elected assembly for Scotland									
Some other way should be found to make sure the needs of Scotland are better understood by the Government in London									
Keep the governing of Scotland much as it has been								33	

And next, thinking about Wales, which of the following statements comes closest to your view about an elected assembly for Wales?

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
Wales should become completely independent									
There should be an elected assembly for Wales									
Some other way should be found to make sure the needs of Wales are better understood by the Government in London									
Keep the governing of Wales much as it has been								34	

And when you were deciding about voting, how important was the general question of the form of government for Scotland - the most important single thing, fairly important, or not very important?

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
								26(u)	
							C		

When it comes to the question of the form of government for Scotland do you prefer any of the parties? Which one? — 26(v) C

Some people think that the government is too much centralised in London. Others are quite content with things as they are. What do you think? — 77 80

Shifting power from London to the regions and local authorities? (should be done) — 27(l)

And now thinking about the major regions in England, such as the South-west or the North-east, which of the following statements comes closest to your view?
There should be an elected assembly for each major region in England
Some other way should be found to make sure the needs of each major region in England are better understood by the Government in London
Keep the governing of the major regions in England much as it has been — 35

(III) The Environment

Getting rid of pollution like dirt in the air and rivers? (Most important Problem) — 27(g)

More effort to protect the countryside

and our finest buildings (should be done) 27(m)

Have you heard anything about Dr. Beeching's proposals for changing the railways? 30(a)

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79

Do you think these changes should be made in the railways? 30(b)

Why is that? 30(c)

(IV) EEC

Were you generally glad or sorry that Britain didn't go into the Common Market, or don't you have an opinion on that? 17

Are you generally glad or sorry that Britain is in the Common Market or don't you have an opinion on this? 20(a) 33

If the question of going into the Common Market comes up again, do you think that Britain should go in, stay out, or dont you have an opinion on that? (If stay out or don't know) Do you think its right for Britain to negotiate to find out what the terms are? 18 27(a) 26(a) 32(a) 30

It is sometimes said that Britain should try to change the terms of

entry into the Common Market and if this is not successful, get out. Which of the following statements on this card comes closest to what you feel should be done?

It is alright for Britain to stay in the Common Market on the present terms

Britain must stay in the Common Market, but should try to change the terms

Britain must change the terms and should leave the Common Market unless they improve

Britain should get out of the Common Market — 20(b) 34 20(a)

Have you changed your mind over this in the last year or two? That is, were you closer before to one of the other views on this card? Which? — 20(c) 35(a)

Could you say which statement comes closest to the view of the Conservative party? — 20(d) 36 20(b)

The Labour party? — 20(e) 37 20(c)

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74 PANEL	FEB74 X-SEC	OCT74	MAY79
The Liberal party?						20(f) 38		20(d)	
The Scottish National party?								20(s)C	

Which party would be more likely to

take Britain into the Common Market if the question comes up again, the Conservative or Labour or wouldn't there be any difference on this? 27(b) 26(b) 32(b) 31

Some people think that Britain should be more willing to go along with the economic policies of other countries in the Common Market. Others think that we should be readier to oppose Common Market economic policies. Which of the following statements comes closest to your views

Britain should be more willing to go along with the economic policies of other countries in the Common Market
Very strongly in favour
Fairly strongly in favour
Mildly in favour 27(a)
There is no need for any change
Britain should be readier to oppose Common Market economic policies - mildly in favour/fairly strongly in favour/very strongly in favour

And now we would like you to think about where the parties stand on this issue. Firstly, which of the statements comes closest to the view of the Conservative party? 27(b)

And which statement comes closest to the view of the Labour party? 27(c)

Think about when you were deciding about voting. How important to you... was the question of the Common Market - the most important

single thing, fairly important, or not very important?						20(g)	39	20(e)		
When you were deciding about voting, how important was this question of Britain's attitude to the Common Market's economic policies - extremely important, fairly important, or not very important?										27(d)
And when it comes to Britain and the Common Market do you prefer any of the parties? Which party?						20(h)	40	20(f)		
	BUTLER AND STOKES					CREWE AND SARLVIK				
	1963	1964	1966	1969	1970	FEB74 PANEL		FEB74 X-SEC	OCT74	MAY79
And when it comes to the question of Britain's attitude to the Common Market's economic policies, do you prefer any of the parties? IF YES: Which party?										27(e)
On some issues people feel that they understand the problems that are involved, while on others they tend to feel that they don't really understand the problems. How well would you say that you understand the problems of Britain and the Common Market? Very well, fairly well or not very well?						20(i)	41	20(g)		
Do you think a referendum should be held on the question of Britain and the Common Market?								42		
Which if any of the parties do you feel is most likely to hold a										

referendum on the Common Market? 43

In a couple of years time do you think that Britain will still be in the Common Market, or that Britain will get out? 20(h) AB

If "Still be in": Will staying in the Common Market make Britain better off or worse off, or will things stay about the same? 20(i) 44(b) AB

If "Get out": Will leaving the Common Market make Britain better off, worse off, or will stay the same? 20(j) 45 AB

Do you think being a member or the Common Market will make Britain better off, worse off, or will things stay about the same in the next few years? 28

(V) Immigration

Do you think that too many immigrants have been let into this country or not? 25 33(a) 35(a) 33(a) 42(a) 23 29(a)

How strongly do you feel about this - very strongly, fairly strongly, or not very strongly? 33(b) 35(b) 33(b) 42(b) 24 29(b)

Is it a problem around here? 33(c) 35(c) 33(c) 42(c) 25 29(c)

How well do you think the last Conservative government generally handled the problem of strikes - very															

well, not very well or not at all well?	24			
If the Labour party had been in power how well do you think they generally would have handled the problem of strikes - very well, fairly well, not very well or not well at all?		25		
Now let's take strikes and other industrial disputes. Do you think that the number of strikes and disputes is likely to stay about the same, or go up, or down in the next year or so?		71		
How well do you think the recent Labour government generally handled the problem of strikes - very well, fairly well, or not at all well?		16(a)	17(a)!	
If the Conservative party had been in power how well do you think they would have handled the problem of strikes - very well, fairly well, not very well, or not at all well?			16(b)	17(b)!
Looking back over the last six months, do you think the number of strikes has gone up, gone down, or stayed about the same?		16(e)		
Have you personally been badly affected as a result of any strike in the last year?			18	
Giving workers more say in the running of the place where they work?				

(Should be done) 27(h)

Do you think that big business has too much power in this country or not?	23!	26	25	28	29	29		60	56(b)
Do you think that the trade unions have too much power or not?	26	24	21	25	24	28		59	56(a)

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
What do you yourself think should be done about the problem of strikes?		81							

	PANEL	X-SEC
Some people think there should be stricter laws to regulate the activities of trade unions, whereas others think that there is no call for stricter laws. Which statement comes closest to your view?		
There should be stricter laws to regulate the activities of trade unions - very strongly in favour/fairly strongly in favour/mildly in favour		
It doesn't really matter either way		
There is no call for stricter laws to regulate the activities of trade unions - mildly in favour/ fairly strongly in favour / very strongly in favour		67(a)

And now we would like you to think about where the parties stand on this

issue. Firstly, which of the statements comes closest to the view of the Conservative party? 67(b)

And which statement comes closest to the view of the Labour party? 67(c)

When you were deciding about voting, how important was the question of laws to regulate the activities of trade unions - extremely important, fairly important or not very important? 67(d)

And when it comes to this question of regulating the activities of trade unions do you prefer any of the parties? 67(e)

(XII) Unemployment

Some people think that the best way to tackle unemployment is to allow private companies to keep more of their profits to create more jobs. Others think it is mainly up to the Government to tackle unemployment by using tax money to create jobs.

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
						PANEL	X-SEC		

Which statement comes closest to your views?

The best way to tackle unemployment is to allow private companies to keep more profits to create more jobs - Very strongly in favour, fairly strongly in favour, mildly in favour 25(a)
It does not matter much either way
It is mainly up to the Government to tackle unemployment by using tax money to create jobs - mildly in favour, fairly strongly in favour, very strongly in favour.

And now we would like you to think about where the parties stand on this issue. Firstly which of the statements comes closest to the view of the Conservative party? 25(b)

And which statement comes closest to the view of the Labour party? 25(c)

And when it comes to the question of tackling unemployment do you prefer any of the parties? IF YES which party? 25(d)

(XIII) Incomes Policies

There has been a lot of talk about how wages and salaries should be settled. Some people think that the Government should set firm guidelines. Others think that the Government should leave it to employers and trade unions to negotiate wages and salaries alone.
Which of these statements comes closest to your view?
The Government should set firm

guidelines for wages and salaries - very strong in favour, fairly strongly in favour, mildly in favour.
Things should be left as they are
The Government should leave it to employers and trade unions to negotiate wages and salaries alone - mildly in favour, fairly strongly in favour, very strongly in favour

66(a)

And now we would like you to think about where the parties stand on this issue. Firstly, which of the statements comes closest to the view of the Conservative Party?

66(b)

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79

				PANEL	X-SEC			
Now we would like you to think about how well the Conservative and Labour parties handle different problems. You can say whether you think the Conservative party is much better, the Conservative party is somewhat better, there is no real difference between the parties, the Labour party is somewhat better or the Labour Party is much better.								
How well do you think the Conservative and Labour parties handle the question of housing?					17(e)			
When you were deciding about voting, how important was the matter of housing - the most important single thing, fairly important, or not very important?						17(f)		
Some people say that council house tenants get things too easy, others disagree. What do you think?		76						
Giving council house tenants the right to buy their houses? (Important that the Government should do)							38(m)	

(XV) System Support

Some people think that changing our whole political system is the only way

to solve Britain's problems. Some think the system should be changed to give ordinary people much more say in what goes on. But others think the system should be changed so that the country's political leaders have much more power and authority to get on with the job without interference. Which of these statements comes closest to your view?
Ordinary people should have much more say in what goes on - very strongly in favour/fairly strongly in favour/ mildly in favour.
The political system should not be changed much. 13(a)
The Country's political leaders should have much more power - mildly in favour/fairly strongly in favour/ mildly in favour.

And now we would like you to think about where the parties stand on this issue.

OCT74 MAY79

PANEL X-SEC

Firstly, which of the statements comes closest to the view of the Conservative party? 13(b)

And which statement comes closest to the view of the Labour party? 13(c)

From time to time the Government asks everybody to help the country. For example, not so long ago the Government asked us to save energy.

How prepared do you think people are to help the country, even if it means making some personal sacrifice?
Nearly all people would help.
Most people would help.
Some people would help.
Very few people would help. 70

And how about yourself? What view would you take if the Government made an appeal that might call for some personal sacrifice?
I would not consider it.
I might try to help.
I would usually try to help.
I would always try to help. 71

Now we would like to turn to some of the things that people do when they feel strongly about decisions made by politicians and public officials.
If there was anything you felt strongly about, how likely is it that you would do some of the following things to get the authorities to change their mind - very likely, quite likely, it would be fifty-fifty, I might or I might not, It's not very likely, I certainly would not?
Contact your M.P. 68(a)
Take part in a sit-in or occupation of a building or institution? 68(b)
Go on a protest march, so long as it was legal? 68(c)
Join others in refusing to pay rates, taxes or rents? 68(d)

Write to a newspaper? 68(e)

	BUTLER AND STOKES					CREWE AND SARLVIK

Go on a protest march even if it had been banned by Police?						68(f)	
Attend a public meeting?						68(g)	
Try to block traffic?						68(h)	
Help collect signatures for a petition?							68(i)
Help others trying to disrupt a march or meeting to which you object?							68(j)
Do you think that by going on protests and demonstrations people are more likely or less likely to get their own way with the authorities, or do you feel it makes no difference?						69	
(XVI) Women as Members of Parliament and Prime Ministers							
Leaving aside your general party preference, do you think it makes any difference if an MP is a man or woman?							
It makes absolutely no difference.							
A woman MP is better than a man.							
A woman MP is not as good as a man.						32(a)	
(XVII) Miscellaneous Issues							

Do you generally like to see things modern and up to date or do you think that well-tried, traditional things are better? 27

Do you think that Britain gave up her Empire too fast, or not? 29 24 28

Compared to other European countries, do you feel that Britain is relatively well governed, relatively badly governed, or is it about average? 66(a)

Foreign Relations.

Now we would like to ask you about the relationship between Britain and some other countries. First, the United States. How much of the time would you say Britain can depend on the United States to look at world politics the same way as we do?

	BUTLER AND STOKES					CREWE AND SARLVIK		
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
						PANEL	X-SEC		
Most of the time they look at world politics the same as Britain									
More often than not they look at world politics the same as Britain									
Sometimes they look at world politics the same as Britain									
More often than not they look at world politics different from Britain									
Most of the time they look at world politics different from Britain									

Don't know/no view 76

And how much of the time would you say Britain can depend on Russia to look at world politics the same as we do? 77

And.....France..? 78

And.....Germany...? 79

And.....Australia...? 80(?)

Think about the last few years, do you think the United States is closer to our views now, or is it further away , or do you think there has been any real change? 80(?)

And what about Russia? Do you think Russia is closer....any real change? 81

How close do you feel Britain's ties with America should be, very close, fairly close, not very close? 21 31 38

Composite Questions.

The following are the complete texts of questions which combine shorter questions on a number of different substantive areas. Parts of these questions may also appear in other sections of the guide with a note referencing the full question text found here.

E.G. "How do you feel about the attempts

to ensure equality for women? (GONE TOO FAR)"

Most Important Aims of Government
together with most important government
problem (GOVERNMENT SHOULD DO)

Gone Too Far (PROTEST BATTERY)

Feeling Thermometer

Feelings about LIfe (FUTURE BATTERY)

Important Government Problem (GOVERNMENT SHOULD DO)

What do you yourself feel are the most

	BUTLER AND STOKES					CREWE AND SARLVIK

							PANEL	X-SEC	
important problems the Government should do something about? Anything else?	16(a)					19(a) *			
FOR EACH OF FIRST THREE PROBLEMS MENTIONED:									
What would you like to see the Government do about this?	(16(b) (e)(F)					19(b) * (d)(f)			
Which party would be the most likely to do what you want on this, the Conservatives, Labour, the Liberals or wouldn't it make much difference?	16(c) (e)(g)					19(c) * (e)(g)			
What issues did you feel were important in this election?	16								

I am going to read out a list of things
that some people believe a government
should do. For each one you can say
whether it is:
Very important that it should be done:
Fairly important that it should be done;
It doesn't matter either way;
Fairly important that it should not be done;
Very important that it should not be done;
Now, using one of the answers on this card
what is your view about putting more
money into the health service? 27(a) 38(a)

Establishing comprehensive schools in
place of grammar schools throughout
the country. 27(b) 38(b)!

Sending coloured immigrants back to
their own country? 27(c) 38(c)!

Increasing state control of land for
building? 27(d) 38(d)

Giving more aid to poor countries in
Africa and Asia? 27(e) 38(e)

Taking tougher measures to prevent
crime? 27(f)

Giving stiffer sentences to people who
break the law? 38(l)

Bringin back the death penalty? 38(f)

Getting rid of pollution like dirt in
the air and rivers? 27(g)

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74		FEB74	
OCT74 MAY79									
					PANEL	X-SEC			
Going ahead with further expansion of the nuclear power industry?							38(n)		
Giving workers more say in the running of the place where they work?						27(h)	38(g)		
Taking tougher measures to prevent Communist influence in Britain?							27(i)	38(h)	
Spending more money to get rid of poverty in Britain?					27(j)	38(i)			
Redistributing income and wealth in favour of ordinary working people?						27(k)	38(j)		
Shifting power from London to the regions and local authorities?							27(l)		
More efforts to protect the countryside and our finest buildings?						27(m)	38(k)		
Maintaining separate schools for Roman Catholics?					27(n)				
Giving Council house tenants the right to but their own houses?							38(m)		
Withdrawing British troops from Northern Ireland immediately?							38(o)		
Reducing the power of the House of Lords?							38(p)		

Looking at this list, could you say
what the most important general aim
of a government should be?
Promoting private enterprise
Protecting individual liberty
Maintaining law and order
Protecting the weakest and worse off
Achieving equality among people
Raising everybody's standard of living
Don't know 28(a)

And the next most important? 28(b)

And which of the things mentioned on
the card is least important? 28(c)

Gone Too Far (PROTEST BATTERY)

Now we would like your views on some
of the general changes that have been
taking place in Britain over the last
few years. For each of the changes you

	BUTLER AND STOKES					CREWE AND SARLVIK	
	1963	1964	1966	1969	1970	FEB74	FEB74
OCT74 MAY79							

much too much too far; gone a little
can say whether you feel it has: gone
much too far ; gone a little
too far; is about right; not gone quite
far enough; not gone nearly far enough.

How do you feel about the attempts to
ensure equality for women? 26(a) 26(b)
.....moves to go easier on people who
break the law? 26(b)
.....the right to show nudity and sex

in films and magazines? 26(c) 26(c)
.....people showing less respect for
authority? 26(d)
.....people challenging authority 26(d)
.....recent attempts to ensure
equality for coloured people? 26(e) 26(e)!
.....police being firm when they
handle demonstrations, sit-ins and
things like that? 26(f)
.....the change towards modern
methods in teaching children at
school nowadays? 26(g) 26(f)!
.....the availability of abortion on
the National Health Service? 26(h) 26(g)
.....the welfare benefits that are
available to people today? 26(i) 26(a)
.....the reduction of Britain's
military strength? 26(j) 26(h)!

Feeling Thermometer

There is a slightly different way that I want to ask you how you feel towards certain places or people. This card has what we call a 'feeling thermometer'. If you don't know too much about one of the places or people that I'm going to ask you about, or don't feel particularly warm or cold towards them, then you should place them in the middle, at the 50 mark. If you have warm feelings towards them you should give them a score somewhere between 50 and 100 depending on how warm your feeling is. On the other hand, if you don't feel very favourable towards them you should place them somewhere between the 0 and the 50

mark. First of all, I would like to ask you your feelings towards the Queen and the Royal Family on the thermometer according to your feeling about it?

(i) Queen and Royal Family
(ii) Unofficial strikes
(iii) The B.B.C.

BUTLER AND STOKES CREWE AND SARLVIK

Feelings about Life (FUTURE BATTERY)

Now we would like to know a little about how you feel about some things which are a part of everybody's lives. You see the card gives you some words to choose from which might describe your feelings about different things: Very happy; happy; satisfied; mixed feelings; not satisfied; unhappy; very unhappy.

Could you tell me the one which best describes how you feel about....

	BUTLER AND STOKES					CREWE AND SARLVIK		
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
The way young people are thinking and acting these days?					118				
Your house/flat?				118					
The things you can afford to have?					118				
Politics in Britain today?					118	67			
This neighbourhood as a place to live?						118	67		
Life as a whole?				118	67				
Your job (includes job of housewife)						118			
Your chances of changing things you									

don't like?	118	67			
The political parties?		118	67		
The standards and values of today's society?	118	67			
What you local government is doing?		118	67		
The chances of getting ahead in Britain?		118	67		
What the Government is doing for people like you?	118	67			
People sometimes talk about whether or not there will be a really serious economic depression in Britain in the next ten years, with widespread poverty, as in the thirties. Thinking about the possibility of an economic depression in the next ten years would you say it is - very likely to happen, fairly likely to happen, not very likely to happen, or very unlikely to happen?				72(a)	
How likely do you think it is that in the next ten years there will be such a serious breakdown in law and order in our cities that the police can no longer protect lives and property?				72(b)	
And how likely do you think it is that there will be a revolution in Britain in the next ten years?				72(c)	
And how likely do you think it is that there will be serious race riots in Britain in the next ten years?					72(d)

And how likely do you think it is that there will be a general strike, as in the twenties, in the next ten years? 72(e)

And how likely do you think it is that there will be widespread political terrorism in our cities in the next ten years? 72(f)

THE ECONOMY

(i) General

Speaking more generally, how satisfied

	BUTLER AND STOKES					CREWE AND SARLVIK	
	1963	1964	1966	1969	1970	FEB74	FEB74
OCT74 MAY79				PANEL	X-SEC		
are you with the (Labour) government's handling of Britain's economic affairs?		42	22	46			
Do you think that Britain's economic difficulties are mainly the fault of the Labour Government or the last Conservative Government.	43	24(a)	47				
Britain has had a lot of economic difficulties in the last few years What measures do you think are needed to put the country right economically? Anything else?		23					
What do you think Britain has to do to pay her way internationally? Is there anything else?		43					

	Looking back over the last six months, would you say that the state of Britain's economy has stayed about the same, got better, or got worse?			65(a)	
	Looking back over the last year or so, would you say that the state of Britain's economy has stayed about the same, got better, or got worse?				37(a)
	And what do you think will be the state of Britain's economy in the next few years - will it stay about the same, get better or get worse?	61	117	65(b)	37(b)
	All in all would you say that the country is in very good shape, fairly good shape, poor shape, or that something is very wrong.				14
	Compared with other European countries, do you feel that Britain's industry and commerce is relatively well run, relatively badly run or is it about average?			66(b)	
(ii)	Rising Prices				
	Some people say that prices will go on rising no matter who's in power. Others think that the Government can do a lot to check rising prices. What do you think?	*			
	Some people say that prices will go on rising no matter what any Government tries to do. Would you agree or disagree?	15(d)	18	14(d)	

Looking back over the last year or so

	BUTLER AND STOKES					CREWE AND SARLVIK		
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74 MAY79
				PANEL	X-SEC			
do you think that your income has fallen behind prices, kept up with prices or has gone up by more than prices?						63(a)	36(a)	
Looking ahead to next year, do you think your income will fall behind prices, keep up with prices or go up by more than prices do?					115	63(b)	36(b)	
There has been a lot of talk about who is to blame for rising prices. Using one of the answers on this card, could you say how much to blame you think each of the following are? Very much to blame, somewhat to blame, not at all to blame or don't know? The Conservative Government? Big Business? The Labour Party? The Common Market? The Trade Unions? The World Situation? Shops and Supermarkets?					20			
Which party would you say would be best at keeping prices steady, The Conservatives or Labour or wouldn't there be any difference between them on this?				*				
How well do you think the last Conservative Government (Labour) handled the problem of rising prices - very well, not very well, or not well at all?					15(a) 15	14(a)	16(a)	
If the Labour party (Conservatives) had been in power at the time, how well do								

you think they would have handled the problem of rising prices - very well, fairly well or not well at all? 15(b) 16 14(b) 16(b)

On some issues people feel that they understand the problems that are involved, whilst on others they tend to feel that they don't really understand what the problems are. How well would you say you understand the problems of rising prices - well, fairly well or not well at all? 15(e) 19 14(e)
BC

Think about when you were deciding about voting. How important to you ... was the issue of rising prices - the most important single thing, fairly important, or not very important? 15(c) 17 14(c) 16(c)

Finally, which of all the parties do you feel had the best ideas on rising prices? 14(f)C

People have put forward different ideas

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
				PANEL	X-SEC				

for tackling rising prices. Many times these ideas mean giving something up. This card shows some of the things we may have to put up with in order to curb rising prices.

1 More taxation
2 More unemployment
3 Strict wage controls
4 Less money for schools, roads and

and many other things

In order to tackle rising prices, which of these would you be least willing to accept? 15(a)

And which do you feel to be second worse? 15(b)

Now, in order to tackle rising prices which of these would you be most willing to accept? 15(c)

Let's talk about prices for everyday goods. Let us say you spent a pound in the shops a year ago. What do you think you would have to pay to get the same goods today? 113 62(a)

And what about a year from now? What do you think you will have to pay to get those same goods in a year's time? 114 62(b)

(iii) Unemployment and Rising Prices

Some people say that if you have full employment you can't keep prices steady. That is, the country can have full employment or steady prices but not both. Do you think this is true? 40(a) *

Why is that? 40(b)

Suppose it were true, that you couldn't keep unemployment down and prices steady, which of the two would you rather have? 41 *

We'd also like your opinion about handling the problems of unemployment and rising prices. Do you think that having everyone employed makes it more difficult to hold prices steady, or don't you think that having everyone employed makes it more difficult to hold prices steady? If you don't have an

	BUTLER AND STOKES					CREWE AND SARLVIK	
	1963	1964	1966	1969	1970	FEB74	FEB74
OCT74 MAY79							
			PANEL	X-SEC			
opinion on this just say so.			*				
Suppose the Government had to choose between keeping everyone in employment and holding prices steady, which do you think it should choose?			*				

(iv) Unemployment

People talk about unemployment. Have you or anyone in your immediate family been worried about losing their job in the last year or so? 74 *

Would you say unemployment is a special problem in this area? 75 *

Now thinking about the last year or so, would you say that unemployment at present is about the same, higher than it was or lower than it was a year ago? 116

Think about when you were deciding about

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
				PANEL	X-SEC				
voting. How important to you..... was the issue of unemployment? The most important single thing, fairly important or not very important?						17(b)			
Think about when you were deciding about voting. How important to you then was the matter of unemployment - extremely important, fairly important, or not very important?						19(c)			
Was anyone in your family put on the recent three-day week?				89	153				
Do you think that unemployment over the next year will go up, go down or stay about the same?						64			
Have you been unemployed or had great difficulty in getting a job in the last year or so?				90	154	83(a) BC			
Has anyone in your family been unemployed or had great difficulty getting a job in the last year or so?					91	155	83(b)		
Have you yourself or anyone else in your family been unemployed or had great difficulty in getting a job in the last year or so?							20		
Now we would like you to think about how well the Conservative and Labour									

parties handle different problems. You can say whether you think the Conservative Party is much better, the Conservative Party is somewhat better, there is no real difference between them, the Labour Party is somewhat better or the Labour Party is much better.
How well do you think the Conservative and Labour parties handle the question of unemployment? 17(a)

How well do you think the recent Labour Government handled the problem of unemployment - very well, fairly well, not very well or not at all well? 19(a)

If the Conservative Party had been in power how well do you think they would have handled the problem of unemployment - very well, fairly well, not very well, or not at all well? 19(b)

(v) Wages and Salaries

How do you think people who have skills or carry responsibility ought to be paid? Should they be paid a lot more than others, a bit more, or should no-one be paid much more than average? 58

There has been a lot of talk recently about how to keep wage increases within a reasonable and fair limit. Some think that a voluntary agreement between the Government and the trade unions is the most effective way to

do this. Would you agree? 23(a)

We would like to ask some questions about people's salaries and wages. First, think about the average level of pay for people in you (your husband's) kind of job. Would you say the pay for your (your husband's) kind of job is fair, a bit less than fair or much less than fair? 24(a)

Do you think that any political party would do more than the others to help people in your (husband's) kind of job to get a fair wage or salary? Which? 24(b)

Here is a card with three boxes. Box A stands for the kind of jobs that are

BUTLER AND STOKES CREWE AND SARLVIK
1963 1964 1966 1969 1970 FEB74 FEB74
OCT74 MAY79

PANEL X-SEC

usually paid a bit more than yours (your husband's). Box B stands for jobs that are usually paid about the same as yours (your husband's). Box C stands for jobs which are usually paid a bit less than yours (your husband's). Let's think about Box A and Box B....Over the last few years, do you feel these boxes have come closer together, or moved further apart, or stayed about the same? 25(a)

Now let's think about Box B and Box C .... Over the last few years do you feel that these boxes have come closer together, moved further apart, or

stayed about the same? 25(b)

What do you think has happened over the last few years to the wages for your (your husband's) kind of job compared to wages for other jobs? First think of those jobs usually paid a bit more than yours (your husband's). Do you think that-
Wages for your kind of job have been catching up on better paid jobs?
Or have you just stayed the same?
Or have you been slipping behind? 65(a)

And what about jobs usually paid less than yours (your husband's) -
Have they started catching up yours?
Or have they stayed the same?
Or are they slipping behind your kind of job? 65(b)

Now let's take wage controls. Do you think that in the next year or so legal controls on wages will stay about the same, get tougher or ease off? 72

And what would you personally like to happen with wage controls - that things stay the same, that legal controls get tougher or that legal controls ease off? 73

There has been a lot of talk about how wages and salaries should be settled. Some people think that the Government should set firm guidelines. Others think that the Government should leave it to employers and trade unions to negotiate wages and salaries alone.

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
						PANEL	X-SEC		
Which statement comes closest to your view - The Government should set firm guide-lines for wages and salaries - very strongly in favour, fairly strongly in favour, mildly in favour. Things should be left as they are. The Government should leave it to employers and trade unions to negotiate wages and salaries alone - mildly in favour, fairly strongly in favour, very strongly in favour.									66(a)
And now we would like you to think about where the parties stand on this issue. Firstly , which of the statements comes closest to the view of the Conservative Party?									66(b)
And which statement comes closest to the view of the Labour Party?									66(c)
When you were deciding about voting, how important was the question of how wages and salaries should be settled - extremely important, fairly important or not very important?									66(d)
And when it comes to how wages and salaries should be settled, do you prefer any of the parties?									66(e)
Think about when you were deciding about voting. How important to you									

was the question of wage controls - the most important single thing, fairly important, or not very important? 74 23(b)

And when it comes to the control of wages do you prefer any of the parties? Which one? 75 23(c)

Some people say there's got to be some control over wage and salary increases if the national economy is to be got right. Others are against any control of wages and salaries. Which do you tend to agree with? 42(a) * 31

Why do you feel that way? 42(b)

(vi) Personal Economic Well-Being

We are also interested in how well off people are these days. How about you? Compared with.... ago are you and your family better off now, worse off, or have you stayed about the same? 34(a) 37 39 36 43 57(a)

	BUTLER AND STOKES					CREWE AND SARLVIK	
	1963	1964	1966	1969	1970	FEB74	FEB74
OCT74 MAY79				PANEL	X-SEC		

Why is that? 34(b)

Compared with a year or two ago, are you or your family much better off now, a little better off now, about the same, a little worse off or much worse off now? 111

Now looking over the next (three or four years) do you think that you will be better off, worse off, or will you stay about the same?	35(a)	38	40	37	44	57(b)
Why is that?	35(b)					
Do you think that what the Government does makes any difference to how well off you are?	36(a)		41	35	45(b)	56
Has (did) the Conservative (Labour) government made you better off, worse off or hasn't it made any difference?		36(b)		41(b)	38	45(b) 58
If a Labour Government comes in would you be better or worse off, or won't it make much difference?	36(c)					
Looking ahead do you think that the Labour Government will make you better off, worse off or won't it make much difference?		41(c)				
If a Conservative Government had come in would it have made you better or worse off or wouldn't it have made much difference?		41(d)	39(a)	45(c)		
Now that a Conservative Government has come in, do you think that it will make you better or worse off or won't it make much difference?				*		
Do you think the fact that Labour won the election will make any difference to how well off you are?	39(a)					

Why is that? 39(b) 39(b)

Now we would like to ask whether you think that what the last Conservative Government did with the economy has made you better off or not. Which of these statements comes closest to what you feel? The last Conservative Government did: a) a lot to make me better off, b) a little to make me better off, c) nothing to make me better

	BUTLER AND STOKES					CREWE AND SARLVIK			
	1963	1964	1966	1969	1970	FEB74	FEB74	OCT74	MAY79
						PANEL	X-SEC		

or worse off, d) a little to make me worse off, e) a lot to make me worse off, or don't know? 112

BACKGROUND DATA

Background data on sex, marital status, date of birth and occupations of respondents and various members of their households have since 1974 been incorporated into the body of the questionnaire. Prior to this the information was treated as facesheet data. No attempt has been made to incorporate this facesheet data in the continuity guide, but complete copies of the facesheets for 1963, 1964, 1966 and 1970 appear as appendices.

THE BRITISH ELECTION STUDY AT THE UNIVERSITY OF ESSEX

PROJECT DIRECTORS: I. Crewe, B. Särlvik, D. Robertson

TECHNICAL PAPER 1982:1

THE SURVEY OF THE MAY 1979 GENERAL ELECTION - THE SURVEY DESIGN THE SAMPLE AND THE FIELDWORK, WITH A NOTE ON SAMPLING ERROR

by Neil Day

Note: This Technical Paper can be obtained from:

SSRC Data Archive, University of Essex, Wivenhoe Park, Colchester, CO4 3SQ.

1. The May 1979 Election Survey

This book focuses upon the May 1979 election and most of the data are drawn from the national interview survey conducted after that election. The 1979 survey is, however, also part of a series of surveys directed by the British Election Study at the University of Essex from 1974 to 1979. These surveys, furthermore, are in many ways a continuation of a previous series of surveys covering the general elections from 1964 to 1970 conducted by David Butler of Nuffield College, Oxford and Donald Stokes, then at the University of Michigan. The research project at the University of Essex was started in 1974 with Ivor Crewe and Bo Särlvik as directors; in 1975 the project was joined by David Robertson as a third director of the project. The project is funded by the Social Science Research Council; the University of Essex has made an important contribution by providing computing facilities and computing time, office space and administrative support.

The series of surveys include national interview surveys after each of the two general elections of 1974, a mail questionnaire survey conducted after the referendum on Britain's membership of the EEC in June 1975 and, finally, the May 1979 election survey.

The basic sample of respondents was drawn from the 1974 electoral registers and consisted of 3,400 individuals in a sample of constituences in Great Britain (Northern Ireland is not included in these studies). As far as was possible the individuals in this sample were contacted again for interviews in the October 1974 survey, by mail questionnaires in the 1975 referendum study, and for interviews in the 1979 survey.

A survey study which consists of 'waves' of interviews with the same sample of individuals at different points of time is known as a panel study. The obvious advantage of a panel study is that it becomes possible to study individual change over time in depth. The disadvantage is that the panel sample remains the same, whilst the population - in our case the electorate - changes because of mortality, the entry into the electorate of new age cohorts and residential mobility. Each of the interview surveys in the British Election Study series was therefore designed as a combination of a panel study and a survey covering a representative cross-section of the electorate at the time of each election. Already by the October 1974 election the sample was supplemented so as to include voters who had reached voting age since the election in February 1974. By 1979, a sample of names drawn from electoral registers in 1974 was obviously out of date as a representative cross-section of the electorate. It was therefore necessary to combine the panel component of individuals in the original 1974 sample with an additional component of individuals selected so as to ensure that the 1979 sample as a whole would form a representative cross-section of the electorate in that year. The sampling technique used for that purpose is described in the next section.

The data base generated by our series of surveys thus contains two types of samples : one representative cross-section sample for each of the three elections in February 1974, October 1974 and May 1979, as well as panel samples consisting of individuals who were interviewed in two or more of these surveys. The purpose of this Technical Paper is only to provide the information about the surveys that may be of interest to readers of the investigators' publications and for those who want to use the data for secondary analysis.

In accordance with the conditions for the grant awarded by the Social Science Research Council (SSRC), the data sets yielded by these surveys are deposited with the SSRC Survey Archive at the University of Essex. The data sets are made available through the Archive for further analysis in scholarly research. The Archive also supplies code books and other documentation needed by secondary users.

The interviews for the May 1979 election survey were carried out by Research Services Limited. The cross-section survey fieldwork in the February 1974 election study was conducted by British Market Research Bureau (BMRB), while Social & Community Planning Research was in charge of the fieldwork for the October 1974 election study. The British Election Study group at the University of Essex wrote and designed the questionnaires for all of these surveys and was also actively involved in the drawing of samples, monitoring of fieldwork and briefing of interviewers in collaboration with the fieldwork agencies. Coding of the questionnaires, data preparation and all the analysis was carried out at the University of Essex.

2. The Sample Design

The sample of individuals for the February 1974 election survey was based on BMRB's 'Master Sample' of 200 constituencies. The 618 constituencies south of the Caledonian canal were grouped into 11 regional strata (standard regions). Within each region, constituencies were divided into three groups: conurbations, urban areas, and rural areas. Within each area group constituencies were arranged in descending order according to the percentage Labour vote in the 1970 general election. Using this list, the 200 constituencies were selected systematically within regions with probability proportionate to population size. Within each constituency, one polling district was selected, likewise with probability proportionate to population size. Within each polling district 17 names were drawn from the electoral register through systematic sampling. The procedure was designed so as to yield 3,400 individuals forming a representative cross-section sample of the electorate.

For the reasons already given, this sample of individuals could not by itself form a representative sample of the 1979 electorate. The electorate had changed in the intervening five years because of the entry of electors who had come of voting age since 1974, and because of mortality and migration. The sample needed to be supplemented so as to include electors who had become eligible to vote since 1974 and so that it would reflect the changes caused by residential mobility and new building development during that period. Conducting fieldwork with a five year old sample also involves a practical problem. Many of the respondents in the 1974 sample would have moved to new addresses by 1979.

It was known from previous experience that a substantial proportion of these persons would prove impossible to trace and that one could expect a very high fieldwork cost for the relatively small number of successfully completed interviews with those movers who could be contacted at new addresses.

To overcome these problems it was decided to adopt (with modifications) a sample design for long-running panel studies which had already been employed by Research Services Limited.[1)]

Essentially, the 1974 sample was treated as a sample of addresses in the 1974 register, although the individuals in the 1974 sample were always included in the 1979 sample if they still lived at their 1974 address. A supplementary sample was furthermore drawn from the 1979 electoral register for the same polling districts (or their nearest geographical equivalent if boundaries had been changed). The addresses thus obtained were compared with the 1974 register. Those that already existed as household addresses in 1974 were deleted and those remaining therefore constituted a supplementary address sample of new housing in the district. As a part of this procedure one person at each supplementary address was selected as a respondent in the 1979 sample.

The addresses in the 1974 sample together with the new supplementary sample formed our 1979 sample of addresses. For each of these addresses was compiled a list of the persons who were living at the address and eligible to vote at the time when the appropriate electoral register was established. These lists were transcribed on fieldwork forms used by the interviewers; the forms had one line per person on the list and a number of blank lines for additional names. The interviewers first task at the contacting of an address was to update this list by deleting names of persons who no longer lived at the address and by adding the names of electors who had come of age

since 1974 or had moved into the dwelling since that time. (Obviously this would often mean that an entirely new household had replaced the one that lived at the address in 1974.) On the forms for 1974 addresses the line for the 1974 respondent was always marked with an asterisk. As explained above, the procedure when the 1979 supplementary sample was drawn was such that one person at each such address was selected as a respondent in the sample and this was also indicated by an asterisk on the appropriate name. Asterisks were furthermore placed against three of the blank lines on which the interviewers were instructed to write additional names if appropriate. The intervals between the lines with asterisks was determined by the sampling procedure. The interviewer was instructed to interview each of the persons whose names were written on a line with an asterisk, provided that the person was still living at the address. Thus persons in the 1974 sample of individuals were interviewed whenever possible, and the same was the case for one preselected person in each household on the addresses in the supplementary sample.

In addition, newly enfranchised persons and new residents were included if their names were written on a line with an asterisk. It should be noted that in some instances more than one person at the same address could be interviewed (however, the number of such cases is not large).

The effect of this procedure was, firstly, that panel individuals who had moved away from an address could be replaced by a new person living at the address and, secondly, that voters at 1974 households who had reached voting age, as well as any new inhabitants at our sample addresses had a predetermined probability of being included in the sample.

The sample of addresses over-represented households with a larger number of electors in comparison with small households (in proportion to the size of the household); this bias was corrected by adjusting the intervals between the asterisks accordingly. This enumeration method thus ensured that the 1979 cross-section sample was representative of electors who had moved into the sample addresses and also of members of the 1974 households who had come of voting age after that year. The end-result of this procedure was to generate a self-weighted cross-section sample of the 1979 electorate, which included a panel component of electors who still lived at the same address as in 1974.

Out of the original 3,400 names in the February 1974 sample, a total of 1,756 remained in the 'effective' fieldwork sample for the 1979 survey. Most of those excluded from the sample were people who had moved to another address (these were 'replaced' unless the property was empty or had been demolished, 232 persons had died, and there was also a small loss due to miscellaneous reasons such as failing to identify 1974 addresses. The sampling of the 1979 electoral registers yielded the direct selection of 198 names from the registers. A total of 1153 persons were added to the sample as a result of the enumeration made by the interviewers, either as replacements for respondents who had moved away, or as new voters in the household. The total effective 'in scope' sample comprised 3,107 individuals.

3. The Fieldwork

Polling day was 3 May 1979. During the days immediately before and after the election, interviewers were briefed at regional conferences about the fieldwork procedures and trained in the use of the questionnaire. Interviewing began on 5 May.

The fieldwork was monitored continuously, and interviewers were instructed to report back when they were unable to complete an interview either because the intended respondent had refused to participate or for some other reason. Whenever it was deemed justified, such addresses were re-contacted after an explanatory letter about the purpose of the study had been sent to the person to be interviewed. In total, 641 cases were re-issued in this way and interviews were obtained with about a third of these persons.

On average the interviews lasted for 78 minutes.

Well over one third of the interviews were done within a fortnight after the election, about 60 per cent by the end of May and about 90 per cent by 21 June.

4. The Response Rate

Not all of the 3,107 persons in the effective sample could be interviewed during the fieldwork. The 'loss' was caused by a variety of circumstances; some individuals refused to grant an interview, others said they were too busy on the occasions when they were contacted. In some instances, the person to be interviewed was never at home when the interviewer called (although a minimum of four calls were made), and there were also a number of respondents who were too ill, senile or incapacitated to be interviewed. About 60 per cent of the loss consisted of persons who were actually contacted by an interviewer but definitely refused to be interviewed.

The percentage of successfully completed interviews in different components of the sample are given below:

	Per cent interviewed of all individuals in the category	Number of persons in each category
Panel individuals in the 1974 sample of names	57%	1756
Persons whose names had been selected from the 1979 electoral registers	70%	198
Persons whose names had been obtained by interviewers by enumeration of household members	65%	1153
Total effective (in scope) sample	61%	3107

It should be noted that the response rate for persons whose names had been added to the sample by enumeration of household members is based on the number of such names that the interviewer actually listed. This number of names is unavoidably somewhat lower than it would have been if all such enumeration had been complete and accurate in all instances. However, the interviewer could not always obtain the co-operation necessary to establish the list, and in other instances the list may not have been complete. We have no means of establishing how many names were missed in this way, but the efficiency in the fieldwork operation was such that it is not likely to be very big.

The response rate in the 1979 survey is less than in the two surveys conducted in 1974 when over 70 per cent of the effective sample was interviewed. There is some evidence that there has been a general trend over at least the last decade for response rates in large scale probability sample surveys to decline.[2] In the case of this study, the special sample design adopted in order to ensure that the sample would include a panel component had an adverse effect on the response rate in two ways. Firstly, it was more difficult to obtain interviews with individuals, of whom many had been interviewed on two previous occasions and had also been contacted in a mail questionnaire study. As the table above shows, it is amongst the panel individuals in the sample that the response rate is lowest. Secondly, the enumeration technique employed in this study involved a procedure which interviewers had to carry out before they could even begin to ask for an interview; sometimes the effect was to make it more difficult to establish the kind of rapport needed to persuade the intended respondent to grant an interview. These were the obvious drawbacks that followed from the sample design.

But the advantages are equally obvious. The sample provides the basis for cross-sectional analysis as well as for panel analysis. As will be seen in the following section, the 'loss' caused by non-response has not distorted the representativity of our sample of interviewed respondents to any serious extent.

5. The Cross-Section Sample and the Electorate

As the purpose of the sampling procedure was to obtain a representative cross-section of the electorate, it is informative to compare the sample of interviewed respondents with the composition of the electorate. Such comparisons can be made with regard to certain attributes for which the distribution (in the appropriate age-groups) is known from census data. Other comparisons can be made with the aid of election statistics relating either to the total number of persons eligible to vote or the number of persons who participated in the election. Table A compares the sex and age composition of the cross-section sample and the national population in the relevant age-groups. Table B compares the distributions across regions of individuals who participated in the election in the cross-section sample and in the electorate as a whole. Table C shows the party division of the vote in the cross-section sample as well as in the electorate (excluding non-voters). In all these tables, the cross-section data pertains to the sample of individuals who were actually interviewed.

As is seen from these tables, the distributions in the cross-section sample coincide closely with those for the population and the voting electorate, respectively. As is almost always the case with sample surveys, the rate of participation in the sample of interviewed respondents is, however, higher than in the electorate as a whole. This is partly because some of the reasons for non-response (e.g., lack of interest, illness, being away from home during the period concerned) are also causes of non-participation in the election. The participation rate in the electorate (Great Britain) was 76.2 per cent. In the cross-section sample 82.3 per cent stated that they had voted, 14.3 per cent said they had not voted, and 3.4 per cent refused to disclose

whether they had voted or not.

Further and more detailed comparisons between the electorate and the cross-section sample as well as the panel sample may be found in the British Election Study's Technical Paper 1980:1 (A Comparison of Respondents' Characteristics with Known Population Parameters).

TABLE A DISTRIBUTION BY SEX AND AGE IN THE CROSS-SECTION SAMPLE IN THE ELECTORATE*

AGE	CROSS-SECTION SAMPLE			ELECTORATE*		
	Male	Female	Total	Male	Female	Total
	%	%	%	%	%	%
18-29 (20-29)**	18.6	19.8	19.2	22.1	19.4	20.7
30-59	58.9	54.9	56.8	53.3	48.2	50.8
60 +	22.5	25.3	23.9	24.6	31.9	28.4
Total per cent	100%	100%	100%	100%	100%	100%
No. of interviewed respondents	907	970	1877	..	..	

The percentage of male persons in the sample is 48.2; the corresponding percentage in the electorate was 47.6.

* Data Source for the Electorate : Mid-1975 Population Projections for the United Kingdom and Great Britain, (Office of Population Censuses and Surveys).

** The youngest age group in the distribution for the population, it should be noted, comprises ages 20-29 rather than 18-29.

TABLE B DISTRIBUTION OF INDIVIDUALS WHO PARTICIPATED IN THE 1979 ELECTION IN THE CROSS-SECTION SAMPLE AND IN THE ELECTORATE*

	CROSS-SECTION SAMPLE	ELECTORATE*
	%	%
Greater London	10.1	12.0
South	31.5	30.2
Midlands	16.9	16.5
North	27.7	26.5
Wales	6.0	5.4
Scotland	7.9	9.5

* The Electorate in England, Scotland and Wales

TABLE C PARTY DIVISION OF THE VOTE IN THE CROSS-SECTION SAMPLE AND IN THE ELECTORATE*

Party voted for	CROSS-SECTION SAMPLE	ELECTORATE*
	%	%
Conservatives	47.0	44.9
Liberals	13.8	14.1
Labour	37.6	37.7
Other Party	1.6	3.3

* The electorate in England, Scotland and Wales

6. Sampling Error

A sample is intended to provide a microcosm of the population being represented. Not even a correctly drawn probability sample can be expected, however, to give an exact representation of the population (in our case, the electorate) in all regards. What is obtained when we calculate, for example, the percentage of the sample with a certain attribute is an estimate of the 'true' percentage for the population. Using sampling theory one can calculate an interval around the percentage obtained from a sample which is such that one can state, with a specified degree of certainty, that the 'true' value is within that interval. The degree of certainty is known as the confidence level and is stated in the form of a probability. In survey research the 95 per cent confidence level is commonly used; it means that there is a 95 per cent probability that the 'true' value is within the confidence interval given for an estimate.

The confidence interval for a percentage P is given by the formula :

$$\text{confidence interval for } P = P \pm 2 \times d \times s_e \qquad (1)$$

For example, if P is 50% and the value of the expression to the right is 2, then the confidence interval is 48 - 52%.

The letter d in formula (1) stands for the square root of the 'design effect'. For a simple random sample, the value of d equals 1.0 (that is, there is no design effect). The design effect will be discussed later.

The letter s_e stands for the standard error of the estimate.

For a simple random sample the standard error is obtained by the formula :

$$s_e = \sqrt{\frac{P \times (100 - P)}{n - 1}}$$

The standard error will then be given in percentage units, as in the example above. In the above formula, P is the percentage for which the standard error is sought, while n is the number of individuals in the group of which the percentage is taken (i.e. the percentage base). The standard errors for P and (100 - P) are always the same; e.g., the standard error for 65% is the same as the standard error for 35%. As can be seen from the formula, the larger the size of the sample (n) on which the estimate is based, the smaller will the standard error become. The formula should also make it clear that the standard error (for a given sample size) is biggest when P is equal to 50% and decreases the more P differs from 50%.

The standard errors for percentage estimates based on a simple random sample are given below for selected values of P and sample sizes. The sample sizes chosen as examples actually include the numbers in the total 1979 sample, and the numbers of Conservative, Labour and Liberal voters rounded to the nearest hundred.

Standard error of estimate for simple random sample (percentages)

Per cent of sample	Sample size (n) 1900	700	600	200	100
50%	1.1	1.9	2.0	3.5	5.0
30 (or 70)%	1.1	1.7	1.9	3.2	4.6
10 (or 90)%	0.7	1.1	1.2	2.1	3.0

Our sample is a multi-stage stratified sample with a clustering of individuals in polling districts as primary sampling units. The clustering reduces the cost of interviewing very considerably. With a given budget for fieldwork costs, the sample could be substantially larger than that which would have been possible with an unclustered sample. The effect of a larger sample is to reduce sampling error. Stratification has the effect of reducing the sampling error. However, part of the gain from having a larger sample is offset by the fact that clustering increases the sampling error. The symbol d in equation (1) is a correction factor (normally with a value larger than 1.0) which corrects for the effect of clustering and stratification. In general, this will increase the confidence interval. (Actually, d is the ratio of the standard error for our sample to the standard error for a simple random sample of the same size). The value of the correction factor is not the same for all variables : it is higher for attributes that are unevenly distributed across

polling districts (such as living in a council house) and it is lower for attributes that are more evenly distributed (such as sex).

Calculations of the value of d for selected variables based on the original February 1974 sample gave, e.g., a value of 1.4 for the per cent voting for a major party or the per cent belonging to the middle class, and a value of 1.2 for the percentage holding a certain opinion on the EEC. For other variables, such as sex and age group, it was approximately 1.0, whilst it reached the value of 2.0 for the percentage living in a council house.[3] The value of d is also affected by the size of the subsample on which an estimate is based. Calculating the correction needed for design effect is therefore a complex matter. The reader who wants to have an idea of the appropriate confidence interval for a particular estimate is therefore advised to multiply the standard error for a simple random sample (as given in the table) by 2.8 rather than 2. For that purpose it should in general be sufficient to use the standard error for the nearest percentage and sample size given in the table above.[4]

In much of the analysis of survey data one is concerned with differences between groups in the sample. A table showing the relationship between two variables often comprises an array of groups which can be considered as ordered according to some criterion. The relationship between such a classification and a second variable can, for example, take the form that the proportion having a certain characteristic increases in a regular fashion from one group to the next.

The question that must then be asked is whether there are sufficient grounds to infer that such a difference of relationship also exists in the population from which the sample was drawn.

If this is the case, then the observation made about the sample is considered statistically significant. This does not, it should be noted, mean that it is necessarily substantively significant or interesting.

Statistical significance indicates only that one has established a basis for making inferences about the population - at a specified confidence level. It goes beyond this scope of this brief note to present the various methods of significance testing that can be used. Suffice it to say that the correction for design effect discussed above needs to be applied also, e.g., when testing the significance of a difference between two groups with regard to the percentage in each that has a given characteristic.[5)]

Notes

1) The basic procedures in this sampling design are described in : W.G. Blyth and L.J. Marchant, "A self-weighting random sampling technique", Journal of the Market Research Society, Vol. 15, No. 3. Mr. Blyth devised the adapted version of this sampling method which was used for the 1979 election survey.

2) See : "Response notes in sample surveys. Report of a Working Party of the MRS Research and Development Committee", Journal of the Market Research Society, Vol. 18, No. 3. July 1976.

3) These calculations were made by the then research officer of the British Election Study, Dr. J. Alt (now professor at Washington University, St. Louis). For further details of the calculations and the formulae employed, see : The British Election Study of October 1974. Methodological Report, by J. Spence, Social & Community Planning Research, 1975.

4) See also : C.A. Moser and G. Kalton, Survey Methods in Social Investigation, (Heinemann; 2nd ed. 1971), Chapter 5-8, esp. p.202.

5) If the percentages with a given characteristic within two sub-categories in the sample are different, the significance of that difference can be tested by :

$$2 \times d \times \sqrt{\frac{P_1(100 - P_1)}{n_1 - 1} + \frac{P_2(100 - P_2}{n_2 - 1}}$$

P_1 and P_2 are the percentages concerned, n_1 and n_2 stand for the number of individuals in the two groups respectively. The symbol d is the correction for design effect. The difference $(P_1 - P_2)$ is significant if it is as big as or bigger than the value obtained from the formula given above.

THE MAY 1979 GENERAL ELECTION STUDY QUESTIONNAIRE

This Technical Paper from the British Election Study at the University of Essex contains the Questionnaire used in the national interview survey of the May 1979 General Election.

The British Election Study is a research project which is funded by the Social Science Research Council The study of the 1979 election continues a series of electoral surveys which includes interview surveys conducted following the elections in February 1974 and October 1974 and the referendum on Britain's membership of the EEC in 1975. Each of these studies was designed so as to comprise a representative sample of the electorate in Great Britain at the time of voting. With the sample drawn for the February 1974 election survey providing the basis, the study is at the same time a panel study so that a "panel core" of the sample consists of individuals who have been contacted in all of these surveys.

All the surveys were carried out during a fieldwork period following the voting day

The format and contents of the questionnaire were designed by the Directors of the project, Mr I. Crewe, Dr D. Robertson and Professor B. Särlvik. At the time of the final designing of the questionnaire and the fieldwork, the directors were assisted by Mr N Day, Senior Research Officer, and Mr A. Gordon as Research Officer At an earlier stage, Mr A. Fox and Mr W. Aughterson participated in the designing of the study and the questionnaire as Senior Research Officer and Research Officer, respectively.

The interview fieldwork for the 1979 study was carried out by *Research Services Ltd.*

BRITISH ELECTION STUDY 1979

AREA CODE	ADDRESS SERIAL	PERSON IDENTIFIER (= STAR NUMBER)	(1)	FIGURES FROM O U O COLUMNS 1 AND 2 ON S I S (1 2)

DAY (DATE OF INTERVIEW)	MONTH	INTERVIEWER NUMBER

TIME OF BEGINNING INTERVIEW (USE 24 HOUR CLOCK, EG NOT '8 20 am' BUT '0820', NOT '4 15 pm' BUT '1615')

DO NOT INTERVIEW ANYONE WHO IS UNDER VOTING AGE (18 YEARS)

This study is part of some university research being conducted this year
For this study we need the answers to some questions which we are asking people all over the country

1 How closely did you follow the General Election campaign on television or in the newspapers or on the radio - very closely, fairly closely, not very closely, or hardly at all?

1 Very closely
2 Fairly closely
3 Not very closely
4 Hardly at all

1/71	M000057	Q13A) Some people think that changing our whole political system is the only way to solve Britain's problems. Some think the system should be changed to give ordinary people much more say in what goes on. But others think the system should be changed so that the country's political leaders have much more power and authority to get on with the job without interference.	1 Very strongly in favour of - people more say 2 Fairly strongly in favour of - people more say 3 Mildly in favour - people more say 4 The political system should not be changed much 5 Mildly in favour - leaders more power 6 Fairly strongly in favour - leaders more power 7 Very strongly in favour - leaders more power 8 Don't know 9 Unclassifiable 0 Not answered	416 416 162 481 56 148 108 83 6 17
1/72	M000058	Q13B) And now we would like you to think about where the parties stand on this issue. Firstly which of the statements comes closest to the view of the Conservative Party	1 Very strongly in favour of - people more say 2 Fairly strongly in favour of - people more say 3 Mildly in favour of - people more say	113 148 101

332	Record on education	
334	Record on race relations/immigration	56
336	Record on law and order	61
337	Record on Housing	61
340	Other very general social or domestic policy record	50
341	Record on Northern Ireland	
350	Record on managing relations with EEC	65
355	Other foreign policy record	62
356	Record on Defence Policy	
380 - 399	Scottish and Welsh Election Study codes	

The Parties' Policies or Likely Performance in the Future if Elected

Code	Meaning	Translation into 1974 code
400	General reference to likely performance in next government. If time reference is unspecific, code under next category	20
401	General reference to likely performance at an indefinite time or where time perspective is absent	20
410	Likely performance on tax cutting/ government expenditure level	35
412	Likely performance on incomes policy	42
414	Likely performance on inflation	33
416	Likely performance on rescuing large companies in trouble	30
417	Likely performance on nationalization	30
418	Likely performance on controlling trade union matters	40
420	Likely performance on unemployment	34
425	Likely performance on other very general economic policy	30
430	Likely performance on social services and benefits	50
431	Likely performance on pensions	
432	Likely performance on education	
434	Likely performance on race relations/ immigration	56
436	Likely performance on law and order	61
437	Likely performance on housing	
440	Likely performance on other very general social or domestic policy	50
441	Likely performance on Northern Ireland	
450	Likely performance on managing relations with the EEC	65
455	Likely performance on other foreign policy	62
456	Likely performance on defence policy	
80-499	Scottish and Welsh Election Study codes	

IDEOLOGY AND GROUP LINKAGE - CODE SERIES 700 and 800

The first, 700 series, codes are for statements that a party DOES have the quality, whether this is a reason for liking or disliking it. The second, 800 series, codes are for comments that it LACKS the quality, again whether this leads to liking or disliking the party.

Code	Meaning	Translation into 1974 code
700	Party is 'Left' or 'Left wing'	21
705	Party is, practices Socialism	21
710	Party supports Working Class	71
715	Party supports organised Labour/ Trade Unions	72
720	Party is "Right' or 'Right wing'	21
725	Party stands for Individualism, Individual Liberty, Freedom	21
730	Party supports laissez-faire, stands for Capitalist spirit	21
735	Party supports, stands for Middle/Upper Class	73
740	Party stands for Patriotism, the traditional way of life, morality, etc	26*
750	Party is Centrist, practises moderation, etc.	21
760	Other general sense of support for a group or sector	74
765	General notion of party being for 'the likes of me', 'people like me'	74
770	Other very general ideological/value attribution	90
780 - 799	Scottish and Welsh Election Study codes	

* this is the olny translation that worries me.

IDEOLOGY AND GROUP LINKAGE (Continued)

800 series has identical format to 700, except that each reference is to a lack of a certain quality, identity, or standpoint. Let me repeat the point here, as it is easily missed. There are two questions to be considered when coding in this area :

A Is the attribute or its absence/opposite being commented on? If the former, then it is a 700 series code; if the latter, an 800 series code.

B Is the attribution/witholding of attribution being expressed as a reason for liking or disliking the party? The answer to the latter tells one under which question to code it.

However, the translations for the 800 series are different in the following respects :

810 = 75

815 = 76

835 = 77

860 = 78

865 = 78

Code	Meaning	Translation into 1974 code
800	Party is not 'Left' or 'Left wing'	21
805	Party is not, does not practise Socialism	21
810	Party does not support Working Class	75
815	Party does not support organised Labour/ Trade Unions	76
820	Party is not 'Right' or 'Right wing'	21
825	Party does not stand for Individualism, Individual Liberty, Freedom	21
830	Party does not support laissez-faire, does not stand for Capitalist spirit	21
835	Party does not support, stand for, Middle/ Upper Class	77
840	Party does not stand for Patriotism, the traditional way of life, morality, etc.	26*
850	Party is not Centrist, does not practise moderation, etc.	21

(800 series codes continued over

IDEOLOGY AND GROUP LINKAGE (Contnued)

Code	Meaning	Translation into 1974 code
860	Other general sense of dislike for a group or sector	78
865	General notion of party not being for the 'likes of me', 'people like me'	78
870	Other very general ideological/value dislike	90
880 - 899	Scottish and Welsh Election Study codes	

NON-CODED RESPONSES

Code	Meaning	Translation into 1974 code
900	Not coded because unintelligible	97
910	Not coded because highly specific response for which no code provided	97
920	Not coded because too vague or broad to fit any category	97
930	No answer provided at all but question was asked by interviewer	98
940	Question not answered because not asked by interviewer	00
950	Family/primary group 'always for/against the party	81

1. THE BRITISH ELECTION STUDY AT THE UNIVERSITY OF ESSEX

The British Election Study (BES) at the University of Essex was started as a research project in 1974 to continue the series of election surveys previously conducted by David Butler and Donald Stokes. The Essex University project is wholly funded by the Social Science Research Council.

Mr Ivor Crewe and Professor Bo Särlvik have been Directors since 1974. Dr David Robertson (now at St Hugh's College, Oxford) joined the project as third Director in 1975.

The British Election Study has conducted interview surveys following the general elections of February 1974, October 1974 and May 1979. This series of studies also includes a questionnaire survey conducted after the Referendum on Britain's membership of the EEC in 1975.

At different stages in the project the Directors have been assisted by the following Senior Research Officers : Dr J. Alt (now at Washington University, St. Louis), Mr A. Fox, Mr N Day (now at Melbourne State College) and Mr R MacDermid.

Fieldwork for one or more of the surveys has been carried out by :

* British Market Research Bureau
* Social and Community Planning Research/Centre for Sample Surveys
* National Opinion Polls, Market Research Limited/ Social Science Unit
* Research Services Limited

In accordance with the SSRC grant conditions, the data yielded by these surveys are deposited with the SSRC Survey Archive at the University of Essex and made available to academic researchers for further analysis.

This paper contains a general description of the surveys carried out from 1974 to 1979. The BES Technical Paper series includes additional papers on methodological topics. Technical reports prepared by the fieldwork agencies contain further details about the samples and the fieldwork. Code books and supplementary information concerning the data sets are provided by the SSRC Survey Archive for users of the data.

* * *

As a research project, the British Election Study has four general aims .

1. to collect data with a view to describing and explaining the outcome of General Elections,
2. to analyse long-term changes of political attitudes and behaviour from the early 1960s to the present,
3. to organise and make available these data in a form suitable for a wide range of research.

Among the more limited, substantive concerns of the investigators, may be mentioned the magnitude and causes of the erosion of enduring support for the two major parties, the changing relationship between social stratification and electoral behaviour, the pattern and sources of short-term voting change, the divisions of opinions over major political issues and their relationships to the party division of the vote, and a continuing interest in the methodological advancement of survey design and analysis.

2. THE SAMPLE COMPONENTS

The entire sequence of surveys has been conducted so as to yield data on representative cross-section samples of the electorate at each of the elections in 1974 and 1979 as well as a data basis for panel analysis comprising two or more elections.

An overview of the components in this survey series is provided by the Figure on the next page. Each of the surveys is described in the following sections

From the total data base, which includes more than 6000 individuals, the following analysis samples can be obtained ·

(1) A sample of the electorate eligible to vote in the general election of February 1974

(2) A sample of the electorate eligible to vote in the general election of October 1974.

(3) A sample of the electorate eligible to vote in the general election of May 1979.

(4) A sample of the Scottish electorate eligible to vote in the general election of October 1974.

(5) A panel of respondents originally interviewed following the general election of June 1970 and re-interviewed following the general election of February 1974.

(6) A panel of respondents originally interviewed following the general election of February 1974, and re-interviewed following the general election in October 1974.

(7) A panel of respondents interviewed following the general election of October 1974 who were contacted in a mail questionnaire survey after the referendum in 1975.

(8) A panel of respondents originally interviewed following the general election of February 1974 and re-interviewed following the general election of May 1979.

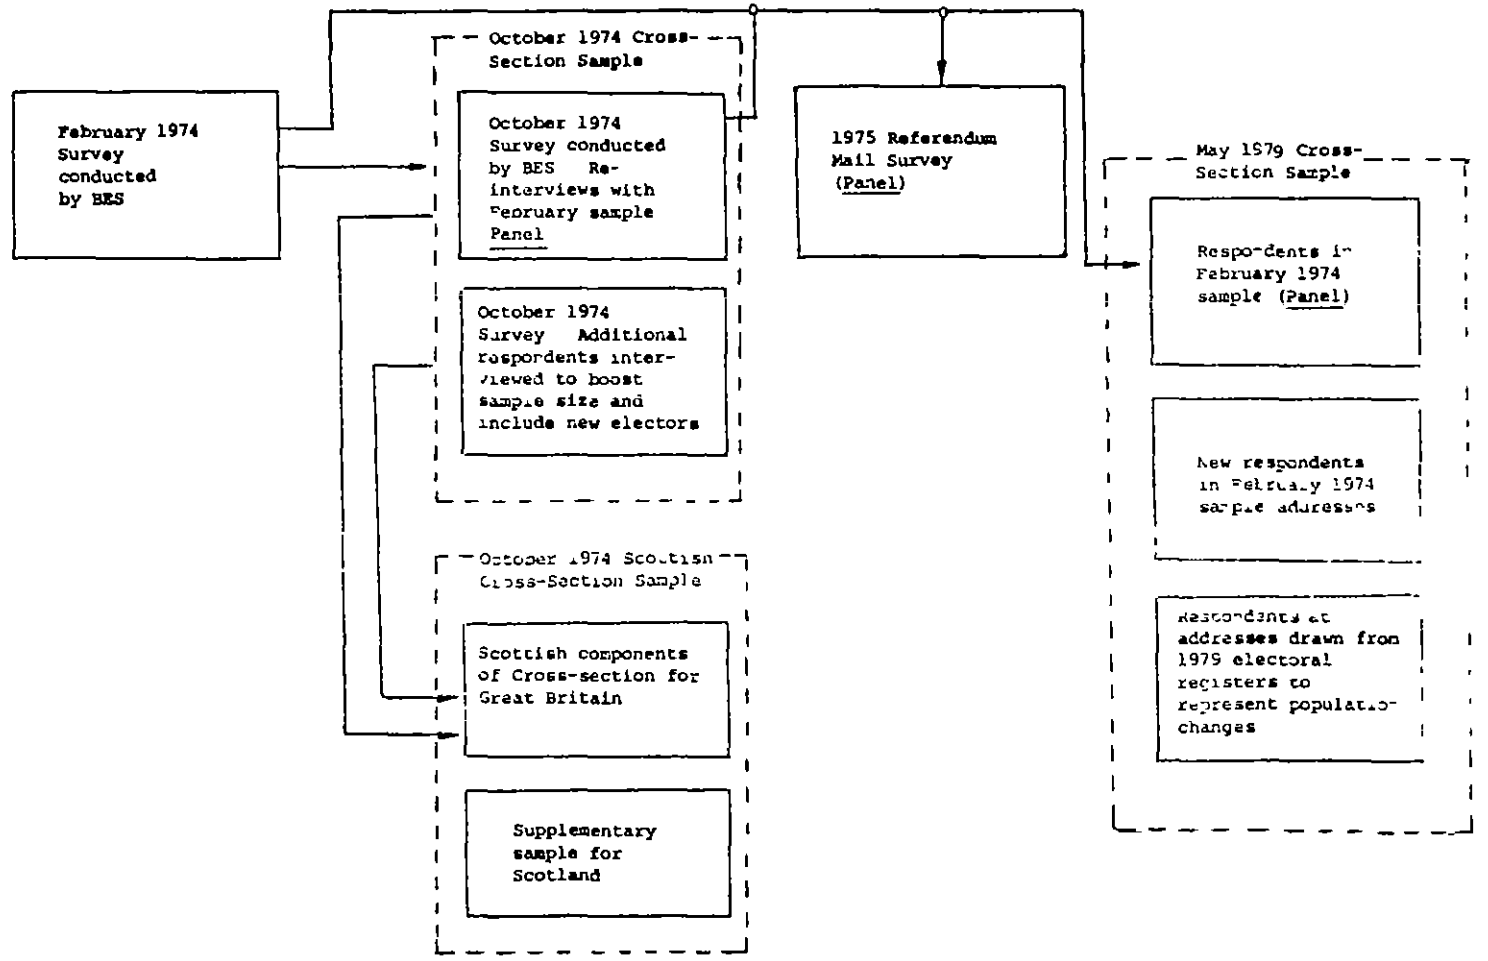
(9) A panel of respondents orignally interviewed following the general election of October 1974 and re-interviewed following the general election of May 1979.

(10) A panel of respondents interviewed following all three general elections in February and October 1974 and May 1979.

THE BRITISH ELECTION STUDY SURVEY COMPONENTS 1970 - 1979

THE 1970 - 1974 PANEL SURVEY

THE 1974 - 1979 COMBINED CROSS-SECTION AND PANEL SURVEY



3. THE 1970 - FEBRUARY 1974 PANEL SURVEY

The sample for this survey was inherited from the 1970 Butler and Stokes election study. Originally 80 constituencies had been selected with probability proportionate to size of electorate from a list of 613 constituencies throughout Great Britain (excluding Northern Ireland and constituencies north of the Caledonian Canal). The list was stratified by region and by whether the constituencies were in urban or rural areas. Electors' names and addresses were drawn from the 1969/70 electoral registers of each of the selected constituencies. The sample for the 1974 survey comprised respondents who were interviewed in 1970, of whom about half had also been interviewed in 1969, respondents who had been interviewed in 1969 and who had moved out of the constituency between then and the 1970 wave were excluded from the 1974 sample. The total sample issue list for this survey contained 1,816 names, of whom 1,246 named individuals were found to be living at their 1970 address. In addition, it was decided to contact and interview respondents who had moved locally. This raised the number of named individuals contacted to 1,414. Interviews were obtained with 1,096 respondents.

Because the sample consisted of persons who had previously been interviewed and because the main function of this part of the 1974 study was to provide information about how opinions and behaviour had changed since the 1970 election, the subject matter of the questionnaire was similar to that of the questionnaires used in the 1969 and 1970 waves. The questionnaire began with a short section of questions about newspaper readership, politics and the media,

followed by a series of open-ended questions concerning the political parties. Ten current political issues were covered · rising prices, strikes, and the miners' strike in particular, taxation, the Common Market, pensions and social sercurity, immigration, trade union power, big business power, nationalization, and control of wages and salaries. On the major issues, five aspects were examined : the respondent's own view of what should happen, his view of how the parties stood on the issue, the importance of the issue in his voting decision, his assessment of how well he understood the issue, and the party he preferred on the issue. On some issues, where there was thought to be a public consensus on what was desirable, for example, rising prices, only the last three aspects were examined. Other sections in the questionnaire covered voting behaviour at the general election, party identification and the respondents' overall assessment of the main political parties and the party leaders.

General questions were asked about the respondent's economic circumstances and expectations together with questions concerning trade union memebership and social class identification. The questionnaire was concluded with "social background" questions on occupation, marital status, income, etc. The interviews lasted on average some 45 to 50 minutes.

Fieldwork for this survey was conducted by Social and Community Planning Research. Interviewers were briefed by members of the Essex project group and SCPR executives jointly. The briefings were carried out in the week following the February election and interviewing commenced immediately thereafter. Most of the interviewing was completed within one month.

4. THE FEBRUARY 1974 CROSS-SECTION SURVEY

For the second February 1974 survey a new sample of electors was drawn from the electoral register published in that month. For this sample 200 parliamentary constituencies were selected with probability proportionate to the size of the 1973 electorate from a list of 618 constituencies throughout Great Britain (again excluding constituencies north of the Caledonian Canal) The constituencies were stratified into eleven regional strata using the Registrar General's standard regional definitions and treating Greater London as a separate region Within these strata, constituencies were divided into three groups those in conurbations, those in urban areas, and those in rural areas, according to the proportion of that constituency's population that lived in each of these types of local authority areas Finally, the constituencies in these strata were arranged in descending order of the percentage of the Labour vote at the 1970 general election. The 200 constituencies were selected systematically within strata with probability proportionate to the size of the 1973 electorate. Within each of the 200 selected constituencies one polling district was selected, again with probability proportionate to size. This yielded a set of 200 polling districts as sampling units. For the February cross-section study individual electors were drawn within polling districts, in each case using a random starting point and sampling fraction necessary to generate seventeen names This gave a sample of 3,400 names representative of the eligible electorate on 28 February 1974. If one of these individuals had moved since the compilation of the electoral register in October 1973, interviewers were instructed to try to obtain

the new address. Interviews were attempted with all those for whom new addresses were established within the 200 constituencies covered by the survey In all, 2,462 interviews were completed.

The questionnaire used for the February 1974 cross-section survey was similar in many respects to that used in the 1970-74 panel study. There were, however, important differences between the two since there was less concern with the cross-section study of repeating questions in precisely the same form or, indeed, on the same topics as for the panel study More attention could therefore be focussed on those issues which were especially important in February 1974. For example, detailed questions were asked about the miners' strike, rising prices, and devolution There were also open-ended questions about what changes would result from the election and about the relative power of groups within British society More attention was also focussed on respondents' images of the parties, together with their general satisfaction with the political and social environment. The questionnaire was rather longer than that used in the panel survey and the average time was 70 minutes

Fieldwork on the cross-section survey was carried out by the British Market Research Bureau Interviewers were briefed jointly by a BMRB executive and a member of the Essex project group. The main part of the fieldwork was carried out between 8 March and 13 April 1974.

5. THE OCTOBER 1974 CROSS-SECTION SURVEY

The October 1974 sample was an enlarged version of that used in February Four further names were selected in each of the 200 polling districts by using a random starting point and deriving the appropriate sampling interval. The original seventeen names were retained In all, 4,200 names were provided in 200 polling districts In the February 1974 cross-section survey, contact had been attempted with 3,400 electors; 2,462 of these were interviewed and 938, for various reasons, were not. In generating the effective sample for the October study all the contact sheets for non-respondents were studied, and individuals with whom it was felt no interview was possible were excluded from further contacting during the fieldwork. Reasons for exclusion included death, migration, firm refusal to be interviewed, etc , 789 individuals were thus excluded, leaving 149 names of previous non-respondents for issue in the October sample In summary, the issued sample in October was made up of three groups of individuals, there were 2,462 electors who had been interviewed in the February study ('A' series), 800 new electors whose names had been freshly drawn for October ('B' series), 149 electors whose names had been drawn in February who had not been interviewed then, but who might be available in October ('B' series) This gave an effective sample of 3,411 electors in 200 constituencies, 3,208 of these were contacted and interviews were completed with 2,365

Two colour-coded versions of the questionnaire were used Series 'A' respondents, those who had been interviewed after the February election, were given a shorter version lasting, on average, 65 minutes Series 'B' respondents, those who had not been previously interviewed, were asked to answer a longer questionnaire, lasting

about 90 minutes. The shorter questionnaire omitted a number of background questions which had been asked of the 'A' series of respondents in the previous survey

The 'B' series questionnaire began with a short selection of questions about newspaper readership,politics and the media and the October election campaign. The next section in both the October versions consisted of open-ended questions probing the respondents' views about the political parties, including the Scottish National Party in Scotland. This was followed by a series of questions designed to tap by means of semantic differentials, respondents' images of the Conservative, Labour, and Liberal Parties. In the next section ten issues were covered. Eight issues were common to both the February and October election surveys : rising prices, strikes, pensions, membership of the Common Market, nationalization, social services, and wage controls. New issues in the October survey were unemployment, housing, and North Sea oil In general the five aspects of issues which had been covered in the February surveys were examined (see Section 2). The section on major issues was followed by two new series of questions. The first was concerned with respondents'reactions to changes that had been taking place in Britain, such as attempts to ensure equality for women and for coloured people, tighter police control of demonstrations, the reduction in Britain's military strength, etc. The second series, was concerned with respondents' views on a number of policy proposals such as the establishment of comprehensive schools and aid to developing countries. These two series of questions were followed by questions on the most important general aims of government and questions on how much confidence could be placed on the parties' general handling of the problems of governments.

A following section covered voting behaviour at the general election and political interest, together with a new series of questions pertaining to strategic voting. This led on to a section on general party support, followed by questions probing respondents' attitudes to coalitions as an issue in their voting choice, followed by assessments of the main political parties and their leaders, together with a section on political party membership, interest group involvement and awareness of the winning parties and candidates' names. These were followed by questions on the respondents' financial circumstances and expectations and a section on social indicators in which respondents were asked how satisfied they were with their lives, jobs and politicians in Britain today. Finally occupation, marital status, income and date of birth were asked on all respondents, together with new questions on religious affiliation and the number and age of children in the household.

Fieldwork for this survey was conducted by Social and Community Planning Research. Interviewer briefings chaired by SCPR researchers and members of the British Election Study project group, were conducted in the week following the general election. Interviewing began immediately after the briefing sessions. Throughout it was assumed that movers would be followed and interviewed where possible. Over 90% of all interviews had been conducted by 20 December 1974. Most of these took place in the first month after the election.

6. THE FEBRUARY - OCTOBER 1974 PANEL SAMPLE

The 1974 cross-section surveys continued the pattern established by the Michigan Studies in the United States and by Butler and Stokes in Britain of combining cross-section surveys with panel elements. Those interviewed in the February cross-section survey who were subsequently interviewed after the October election - that is, the October 'A' series of respondents, produced a new 1974 panel sample The details of sampling, questionnaire construction and fieldwork given for the cross-section survey also apply to the panel element. Of the 2,467 respondents interviewed in February, 2,359 were subsequently contacted after the October election, and of these, 1,830 were interviewed.

7. THE SCOTTISH STUDY

The October 1974 Scottish Survey was undertaken in order to make possible a more detailed study of the special and fast-changing pattern of Scottish electoral politics. Seven seats were won by the SNP in the February 1974 election, six for the first time, the SNP's average poll was 22 per cent, slightly above that of the Liberals even in England alone, the Conservative and Labour parties secured their lowest proportion of the poll in Scotland since 1918 and 1931 respectively and they failed to come first and second in thirty-one out of seventy-one constituencies Dr William Miller of the University of Strathclyede joined the project as a co-director for the Scottish survey

To avoid having to draw a sample of constituencies and polling districts in Scotland completely independent of the Scottish element of the British cross-section sample, a sample design was sought that would allow the latter to provide data for both the British cross-section sample and for a Scottish cross-section sample, even if the data had to be weighted. The design adopted was as follows all seventy-one Scottish constituencies (including on this occasion those north of the Caledonian Canal) were divided into three main strata according to area type. Conurbation constituencies (including those twenty contiguous constituencies forming the Clydeside conurbation), rural constituencies (those twenty that lacked a substantial urban settlement), and the remaining thirty-one constituencies, which were treated as urban. The conurbation and rural constituencies were then each divided into two strata according to the relative strength of the Labour vote at the February 1974 election. The urban consituencies were divided into three groups using the same criterion Within each of the seven strata constituencies were listed in order of the proportion voting Liberal or Nationalist at the previous election Electorates

were accumulated within each stratum and a sampling interval calculated so as to provide five constituencies per stratum A starting point was selected such that all Scottish constituencies already in the British cross-section sample were included in this booster sample. Constituencies were then drawn with probability proportionate to size. The selected thirty-five constituencies consisted of eighteen constituencies in the British cross-section sample and seventeen additional constituencies. In the original eighteen constituencies the ward containing the polling district sampled in February was used as a base and a second polling district in that ward was chosen with probability proportionate to size Thus a total of seventy secondary sampling units were derived, eighteen of which lay in the British cross-section sample.

An additional 1,390 electors were chosen by selecting five further names at random in each of the eighteen polling districts belonging to the cross-section sample and twenty-five names at random in the other fifty-two polling districts. These electors were asked a third version of the October questionnaire (the 'C' series).

In summary, the effective overall sample in Scotland was 1,704 electors whose names had been freshly drawn for the October study as part of the British cross-section sample ('B' series), seven electors whose names were drawn in February but had not been interviewed, but who might have been available in October ('B' series), and 1,390 of the additional Scottish sample ('C' series)

Because the seven strata contained different numbers of electors and because an equal number of constituencies was selected in each, the final sample design was a disproportionate stratified clustered sample When analysing this data, weights need to be applied to off-set the effect of differing sampling fractions in drawing primary sampling points in each of the seven master strata, weights are also required to

compensate for differing probabilities of selection between the two types of polling district described. Of the 1,704 names issued, 1,542 individuals were contacted and completed interviews obtained with 1,170 respondents.

For 'A' and 'B' series respondents in Scotland the same questionnaires were used as in the rest of the British cross-section study. The third version of the questionnaire, used for the 'C' sample, was similar in content to that used for 'B' series respondents. However, it included a number of questions of special relevance to Scottish issues, for example on devolution, North Sea oil, religious segregation in schools and the Scottish Assmebly, which were either not covered in the other two versions of the questionnaire or were dealt with less fully For reasons of space certain other issues had to be excluded from the 'C' series questionnaire. Fieldwork for the Scottish Study was organised alongside the main cross-section survey and was conducted by Social and Community Planning Research.

8. THE REFERENDUM SURVEY, JUNE 1975

The Referendum study sample consisted of all those individuals previously interviewed after the October 1974 election The survey thus formed a second or third panel wave for all respondents, depending on whether they had been interviewed after the February 1974 election.

The mail questionnaire used was very brief. In addition to questions relating to voting in the Referendum it contained questions which were directly or indirectly linked to opinion questions about the EEC asked in previous election studies. Questionnaires were mailed on the day of the Referendum. Two subsequesnt reminder letters were sent to non-respondents Finally an interview follow-up employing the same questionnaire was used to contact those who had still not responded. The mail survey was administered by the project group at Essex. The Social Science Unit of National Opinion Polls Market Research Limited conducted the interview follow-up. Eighty per cent of the sample responded by mail, a further ten per cent were interviewed (using the mail questionnaire) by telephone or through contact visits.

9. THE MAY 1979 CROSS-SECTION SURVEY

The May 1979 election survey was similar to its October 1974 predecessor in that it was a combined cross-section and panel survey

The basic sample of respondents was the same as that drawn prior to the February 1974 election survey and consisted of 3,400 names in 200 sample constituencies. By 1979, a sample of names drawn from electoral registers in 1974 was obviously out of date as a representative cross-section of the electorate It was therefore necessary to combine the panel component of individuals in the original 1974 sample with an additional component of individuals selected so as to ensure that the 1979 sample as a whole would form a representative cross-section of the electorate in that year

In order to take account of any changes in the electorate due to mortality, residential mobility and new housing, a sample design for long running panels which had already been employed by Research Services Limited was adopted with modifications.* The end result of this procedure was to generate a self-weighted cross-section sample of the 1979 electorate which included a panel component of electors who were still contactable at their 1974 addresses.

The total effective sample comprised 3,107 individuals, 1893 of whom were interviewed. The 1979 sample design did not provide for

---

* The basic procedures in this sampling design are described in W G Blyth and L J Marchant, "A self-weighting random sampling technique", Journal of the Market Research Society, Vol 15, No 3 Mr Blyth devised the adapted version of this sampling method which was used for the 1979 election survey Further details on these adaptations can be found in the technical appendix to I M Crewe, D Robertson and B Särlvik A New Conservative Electorate? A Survey Research Report on the British Election of 1979.

following up those persons previously interviewed but who had moved since 1974.

Further details concerning the representatives of the sample can be found in the British Election Study's Technical Paper 1980 1 A Comparison of Respondents' Characteristics with Known Population Paremeters. Additional Technical Papers concerned with the sample design, fieldwork and response rate, etc in the 1979 study are forthcoming

* * * *

The design of the 1979 questionnaire sought to carry over questions from the two 1974 studies, in keeping with panel design of the sample, while at the same time introducing as many new questions as constraints of length and format allowed

The questionnaire began with a short series of questions about attention to the media and contact with the political parties during the campaign. Although these questions were substantively equivalent to those in the October and February 1974 studies, they were newly designed to elicit more information, while being more compact in design than previous formats. The next section was comprised of open-ended questions probing the respondents' views about the three major parties.

One of the following questions pertained to information about leading politicians (it has no equivalent in earlier studies). The respondents were asked to identify the photographs and party affiliations of twelve politicans. Further into the questionnaire, respondents were asked to place on a scale of one to ten their liking of some of these politicians as well as their parties A new format for asking questions about political issues was used throughout the questionnaire. These questions dealt with several issues of the need for

change in the political system, the level of taxation and government services, methods of creating employment, Britain's EEC policy, ways of improving race relations, how wage levels should be settled and whether trade union activities should be more strictly regulated. The questions were designed so that the respondents could agree in varying intensity with one of two opposing positions, or take a neutral position, on a given issue. As a result a 7-point scale of issue positions was obtained. Respondents were then asked where each of the two major parties stood on the issue. In follow-up questions, respondents were asked which party (if any) they preferred on the issue and how important the issue had been when they decided how to vote

A number of questions were naturally carried over from the 1974 Election Study. The issues dealt with in this series included prices, unemployment, law and order and strikes. In each case, the respondents were asked to evaluate how Labour had handled the issue and how the Conservative party would have handled the issue, as well as how important the issue had been in their voting decision.

Questions about the issues of nationalization and social services were asked in the same format as in 1974 (a 4-point "position scale") Respondents were again asked to indicate where the Conservative and Labour party stood on the issue and were also asked both the issue's importance in their voting decision and their party preference on that issue.

The section on major issues was followed by two series of questions designed in 1974. The first was concerned with respondents' reactions to a number of changes taking place in Britain, such as people challenging authority and attempts to ensure equality for women and coloured people

The second series was also similar to that used in October 1974 It was concerned with a range of policy proposals and respondents were asked both whether they were for or against each proposal and how important they considered it to be Questions in this series not previously asked included bringing back the death penalty, stiffer criminal sentences, giving council house tenants the right to buy their houses, expansion of the nuclear industry, reducing the power of the Lords, and withdrawing British troops from Northern Ireland.

A number of other issues were also probed These issues included whether sex was a factor in the suitability of an MP or Prime Minister, devolution, a short series of questions on Britain's economy in terms of how the respondent had been affected in the past and how he/she might be affected in the future, and whether trade unions or big business had too much power A new set of questions measured the extent to which respondents perceived that parties were willing to listen to the views of various sectors of the economy, (eg small business and trade unions). As might be expected, the role of the trade unions was explored in further depth, especially in relation to how they were performing for the country as a whole, and for their own members more specifically. The question of pay differentials was also examined in the 1979 questionnaire. These questions invited respondents to compare their own wages with those better and less well paid than themselves

Two batteries of questions, again asked for the first time in 1979, concluded the issue section of the questionnaire. The first of these was designed to measure the potential for protest by asking respondents how likely it would be that they would engage in various legal and illegal forms of protest in response to a government decision with which they strongly disagreed The second battery

probed expectations about future economic and political developments in Britain Respondents were asked whether they thought it likely that there would be a general strike, an increase in terrorism or serious race riots among other scenarios in the next ten years

The concluding part of the questionnaire covered various social background factors . eg respondent's and spouse's occupation, income and other measures of wealth Education measures, while having equivalents in previous studies, were far more precise as to qualifications. Perceptions of social class were also probed more thoroughly than in previous surveys. Questions concerning the respondent's religious denomination, father's social status, etc., were also included in this part of the questionnaire. One section of the questionnaire recorded past voting behaviour at both general and local elections, as well as party identification.*

Interviews in the May 1979 survey lasted for about seventy minutes.

Fieldwork for the May 1979 study was conducted by Research Services Limited. Interviewer briefings were conducted jointly by RSL Management and British Election Study investigators in the week prior to the general election Interviewing began immediately after polling day, and 92 per cent of all successful interviews were completed by the end of June 1979.

---

* The complete text of the 1979 questionnaire can be found in the British Election Study in Technical Paper 1980.2 The May 1979 General Election Study Questionnaire.

10. THE 1974-1979 PANEL SAMPLES

The 1979 election survey formed the third wave of the panel begun in February 1974. Because not all individuals were interviewed at all three time points in February 1974, October 1974 and May 1979, the concluding wave resulted in three overlapping panels . those individuals interviewed following all three general elections, those interviewed in February 1974 and reinterviewed in May 1979, and those interviewed in October 1974 and reinterviewed in May 1979 (the February 1974-October 1974 panel has already been described).

The number of persons in the February 1974 - May 1979 panel totalled 866 out of the 2462 originally interviewed in February 1974, those in the October 1974 - May 1979 panel numbered 765 of the 2365 individuals interviewed in October 1974. The three wave February 1974 - October 1974 - May 1979 panel comprises 756 individuals from amongst the 2462 interviewed following the February 1974 general election.

Details about questionnaires can be found in the relevant descriptions of the cross-section samples contained in this document.

INTRODUCTION

This technical paper contains basic demographic and voting data concerning the cross-section and panel samples of persons interviewed following the May 1979 general election.

The panel study comprises the general elections of February 1974, October 1974 and May 1979 The total sample described in this paper is intended to form a representative cross-section of the 1979 electorate As explained on the following pages, one component of this sample was interviewed only in 1979 while another component consists of persons who were interviewed in at least one of the interviewer surveys that followed the February 1974 and October 1974 general elections In addition to the cross-section sample, the data-base therefore comprises, as subsets, three overlapped yet analytically distinct panel samples the three-election panel, the February 1974 and May 1979 panel and the October 1974 and May 1979 panel (We do not deal in this paper with the February 1974 and October 1974 panel This panel is described in the technical document for the October 1974 election survey)

For comparison with the entire electorate the tables relating to our sample are accompanied by tables for the population in the appropriate age groups Furthermore, the paper contains tables describing the party division of the vote and corresponding tables for the electorate An analysis of electoral participation in the sample and comparisons with the entire electorate will be presented in a separate document.

Section I compares the distribution of those respondents interviewed following the May 1979 general election, those respondents comprising a panel of individuals first interviewed following the February 1974 general election and reinterviewed following the May 1979 general election, those respondents comprising a panel of individuals first interviewed following the October 1974 general election and reinterviewed following the May 1979 general election and those respondents comprising a panel of individuals interviewed following all three general elections with known population parameters on age, sex, region and vote

Sections II through V present comparisons of cross-tabulations of age by sex, age by sex and region and vote by region amongst the population and with the various analysis samples.

ANALYSIS SAMPLES

At the close of interviewing following the general election of May 1979, the British Election Study completed a series of panel and cross-sectional studies of electoral behaviour which began after the general election of February 1974 The three waves of interviews yielded seven overlapping yet analytically distinct samples The overlapping occurs because some individuals qualified for inclusion in more than one panel. The following samples can be extracted for analysis.

A. A sample of the electorate eligible to vote in the general election of February 1974

B. A sample of the electorate eligible to vote in the general election of October 1974

C A sample of the electorate eligible to vote in the general election of May 1979

D. A panel of respondents originally interviewed following the general election of February 1974 and reinterviewed following the general election of October 1974.

E. A panel of respondents originally interviewed following the general election of February 1974 and reinterviewed following the general election of May 1979

F. A panel of respondents originally interviewed following the general election of October 1974 and reinterviewed following the general election of May 1979

G A panel of respondents interviewed following all three general elections

Figure A presents the structure of the cross-sectional and panel samples in diagramatical form

The present technical paper is concerned with samples C, E, F, G.

A NOTE ON THE TABLE DESIGN

Most of the tables give row-wise and column-wise percentage distributions as well as 'cell percentages' as illustrated in the table layout in Figure II (on page 10)

1 Row Percentages The top entry in each cell (A_{11}, A_{12}, A_{21}, A_{22}) represents the number of observations within that cell expressed as a percentage of the total observations within the given row

In Figure 1 $A_{11} + A_{12} = 100.0\%$

2. Column Percentages . The second entry in each cell (B_{11}, B_{12}, B_{21}, B_{22}) represents the number of observations within that cell expressed as a percentage of the total observations within the given row

In Figure 1 $B_{11} + B_{21} = 100\ 0\%$

3. Cell Percentages . The bottom entry in each cell (C_{11}, C_{12}, C_{21}, C_{22}) represents the number of observations within that cell as a percentage of the total observations appearing within the table

In Figure 1 $C_{11} + C_{12} + C_{21} + C_{22} = 100\ 0\%$

4 Total Sample In Figure 1, D_1 and D_2 represent the total number of observations within a given column expressed as percentage of the total number of observations appearing within the table, such that

$$D_1 + D_2 = 100\ 0\% = \text{Total no. of observations} = (N^T)$$

5 Total Column and Cell In Figure 1, E_1 and E_2 represent the total number of observations appearing within a given row expressed as a percentage of the total number of observations appearing within the table, such that

$$E_1 + E_2 = 100.0\% = \text{total no. of observations} = (N^T)$$

6. Number of Respondents (Percentage base). All actual numbers of observations occurring within rows, columns or tables are given in parentheses.

In Figure 1

(N^{C}_{1}) represents the total number of observations within column 1

(N^{C}_{2}) represents the total number of observations within column 2

(N^{r}_{1}) represents the total number of observations within row 1

(N^{r}_{2}) represents the total number of observations within row 2

(N^{T}) represents the total number of observations within the table

Therefore .

$$(N^{C}_{1}) + (N^{C}_{2}) = (N^{C}_{2}) = (N^{T}) \text{ and } (N^{r}_{1}) + (N^{r}_{2}) = (N^{T})$$

7 Rounding Error Cell percentages may not sum exactly to row or column percentages due to rounding error.

Row % Column % Cell %	Category 1	Category 2	Totals Row % Column & Cell%	Number of Respondents
Attribute 1	A_{11} B_{11} C_{11}	A_{12} B_{12} C_{12}	100.0 E_1	(N^r_1)
Attribute 2	A_{21} B_{21} C_{21}	A_{22} B_{22} C_{22}	100.0 E_2	(N^r_2)
Total Columnwise Total: Sample	100 0 D_1	100.0 D_2	100.0	
Number of Respondents	(N^c_1)	$(^c_2)$	(N^T)
