Codebook for "Do transitional justice museums persuade visitors?

Evidence from a field experiment"

Laia Balcells, Valeria Palanza, Elsa Voytas

August 8, 2020

Note: There are two datasets included in our replication materials. The first ("replicationdata.csv") contains variables used in our experiment. The second ("baselineuc.csv") contains variables obtained from a baseline survey distributed to students at the Universidad Católica de Chile. Descriptions for raw variables in both datasets are below. Full survey instruments available upon request.

Codebook for "replicationdata.csv"

Variable	**Description**
treat	treatment assignment [1=assigned to treatment, 0=assigned to control]
date_diff	number of days between completing the pre-treatment survey and treatment take-up
pre_ideology_1	self-identification on a 1-10 scale, pre-treatment measurement
base_gender	baseline report of gender, [1=male, 2=female, 3=prefer not to specify]
v	indicates whether a subject's parent, grandparent, aunt, uncle, or cousin was a victim [1=yes, 0=no]
positive	additive index of all positive emotions included in the positive and negative affect schedule, 0-50 scale
negative	additive index of all negative emotions included in the positive and negative affect schedule, 0-50 scale
pol.inst.index	index of items included to evaluate political institutions hypothesis
tj.index	index of items included to evaluate transitional justice hypothesis
pre_democracy	level of satisfaction with democracy [0-3], pre-treatment measurement
democracy	level of satisfaction with democracy [0-3], post-treatment
democracy_f1	level of satisfaction with democracy [0-3], first follow-up
democracy_f2	level of satisfaction with democracy [0-3], second follow-up
democracy_f3	level of satisfaction with democracy [0-3], third follow-up
pre_military_gov	support for military government in lieu of a democratic one [1=yes, 0=no], pre-treatment measurement
military_gov	support for military government in lieu of a democratic one [1=yes, 0=no], post-treatment measurement

military_gov_f1	support for military government in lieu of a democratic one [1=yes, 0=no], first follow-up
military_gov_f2	support for military government in lieu of a democratic one [1=yes, 0=no], second follow-up
military_gov_f3	support for military government in lieu of a democratic one [1=yes, 0=no], third follow-up
ID	respondent ID
inst_gov	Level of satisfaction with functioning of the government [0-3]
pre_inst_gov	Level of satisfaction with functioning of the government [0-3], pre-treatment measurement
inst_gov_f1	Level of satisfaction with functioning of the government [0-3], first follow-up
inst_gov_f2	Level of satisfaction with functioning of the government [0-3], second follow-up
inst_gov_f3	Level of satisfaction with functioning of the government [0-3], third follow-up
inst_mil	Level of satisfaction with functioning of the military [0-3]
pre_inst_mil	Level of satisfaction with functioning of the military [0-3], pre-treatment measurement
inst_mil_f1	Level of satisfaction with functioning of the military [0-3], first follow-up
inst_mil_f2	Level of satisfaction with functioning of the military [0-3], second follow-up
inst_mil_f3	Level of satisfaction with functioning of the military [0-3], third follow-up
pre_inst_police	Level of satisfaction with functioning of the police [0-3], pre-treatment measurement
inst_police	Level of satisfaction with functioning of the police [0-3]
inst_police_f1	Level of satisfaction with functioning of the police [0-3], first follow-up
inst_police_f2	Level of satisfaction with functioning of the police [0-3], second follow-up
inst_police_f3	Level of satisfaction with functioning of the police [0-3], third follow-up
pre_conf_gov	Level of confidence in government [0-3], pre-treatment measurement
conf_gov	Level of confidence in government [0-3]
conf_gov_f1	Level of confidence in government [0-3], first follow-up
conf_gov_f2	Level of confidence in government [0-3], second follow-up
conf_gov_f3	Level of confidence in government [0-3], third follow-up
pre_conf_mil	Level of confidence in military [0-3], pre-treatment measurement

conf_mil	Level of confidence in military [0-3]
conf_mil_f1	Level of confidence in military [0-3], first follow-up
conf_mil_f2	Level of confidence in military [0-3], second follow-up
conf_mil_f3	Level of confidence in military [0-3], third follow-up
pre_conf_police	Level of confidence in police [0-3], pre-treatment measurement
conf_police	Level of confidence in police [0-3]
conf_police_f1	Level of confidence in police [0-3], first follow-up
conf_police_f2	Level of confidence in police [0-3], second follow-up
conf_police_f3	Level of confidence in police [0-3], third follow-up
pre_conf_church	Level of confidence in church [0-3], pre-treatment measurement
conf_church	Level of confidence in church [0-3]
conf_church_f1	Level of confidence in church [0-3], first follow-up
conf_church_f2	Level of confidence in church [0-3], second follow-up
conf_church_f3	Level of confidence in church [0-3], third follow-up
justice_advance	Level of agreement with the statement: “Obsession with the past makes it difficult for Chile to advance and become strong” [0-4]
justice_advance_f1	Level of agreement with the statement: “Obsession with the past makes it difficult for Chile to advance and become strong” [0-4], first follow-up
justice_advance_f2	Level of agreement with the statement: “Obsession with the past makes it difficult for Chile to advance and become strong” [0-4], second follow-up
justice_advance_f3	Level of agreement with the statement: “Obsession with the past makes it difficult for Chile to advance and become strong” [0-4], third follow-up
justice_account	Level of agreement with the statement: “Those responsible for human rights crimes from the Pinochet regime have not been held accountable for their actions” [0-4]
pre_current_recomp	Level of agreement with the statement: “The relatives of people that went missing during the dictatorship should be compensated” [0-3], pre-treatment measurement
current_recomp	Level of agreement with the statement: “The relatives of people that went missing during the dictatorship should be compensated” [0-3], post-treatment measurement
current_recomp_f1	Level of agreement with the statement: “The relatives of people that went missing during the dictatorship should be compensated” [0-3], first follow-up

current_recomp_f2	Level of agreement with the statement: “The relatives of people that went missing during the dictatorship should be compensated” [0-3], second follow-up
current_recomp_f3	Level of agreement with the statement: “The relatives of people that went missing during the dictatorship should be compensated” [0-3], third follow-up
tj_judicial	Level of agreement with the statement: “Chilean judicial system should investigate and condemn those who participated in the military dictatorship” [0-3]
tj_apology	Level of agreement with the statement: “The military as an institution should show remorse and apologize broadly for their crimes” [0-3]
tj_apology_f1	Level of agreement with the statement: “The military as an institution should show remorse and apologize broadly for their crimes” [0-3], first follow-up
tj_apology_f2	Level of agreement with the statement: “The military as an institution should show remorse and apologize broadly for their crimes” [0-3], second follow-up
tj_apology_f3	Level of agreement with the statement: “The military as an institution should show remorse and apologize broadly for their crimes” [0-3], third follow-up
policies_apologize	Level of support for policy “Forcing the military to apologize for what they did” [0-3], post treatment measurement
policies_apologize_f1	Level of support for policy “Forcing the military to apologize for what they did” [0-3], first follow-up
policies_apologize_f2	Level of support for policy “Forcing the military to apologize for what they did” [0-3], second follow-up
policies_apologize_f3	Level of support for policy “Forcing the military to apologize for what they did” [0-3], third follow-up
policies_compensate	Level of support for policy “Forcing the military to compensate victims with money” [0-3], post treatment measurement
mm_new	How new were the materials presented at the museum to you? [0 = not new, 1= some were new, 2 = new]
mm_obj	Is information presented by the museum biased? [0=biased, 1=objective]
mm_views_like	Level of agreement with statement: “I liked the museum. It exceeded my expectations” [0-3]
mm_views_content	Level of agreement with statement: “The museum content had an emotional impact on me” [0-3]
mm_views_inhibit	Level of agreement with statement: “Museums like this one inhibit Chile’s advancement. The past is past” [0-3]
mm_views_important	Level of agreement with statement: “It is important for other Chilean’s to visit this museum” [0-3]
interested	Extent to which the respondent reported feeling interested [0-4]
stimulated	Extent to which the respondent reported feeling stimulated [0-4]

enthusiastic	Extent to which the respondent reported feeling enthusiastic [0-4]
energetic	Extent to which the respondent reported feeling energetic [0-4]
proud	Extent to which the respondent reported feeling proud [0-4]
alert	Extent to which the respondent reported feeling alert [0-4]
inspired	Extent to which the respondent reported feeling inspired [0-4]
decided	Extent to which the respondent reported feeling decided [0-4]
attentive	Extent to which the respondent reported feeling attentive [0-4]
active	Extent to which the respondent reported feeling active [0-4]
pre_interested	Extent to which the respondent reported feeling interested [0-4], pre-treatment measurement
pre_stimulated	Extent to which the respondent reported feeling stimulated [0-4], pre-treatment measurement
pre_enthusiastic	Extent to which the respondent reported feeling enthusiastic [0-4], pre-treatment measurement
pre_energetic	Extent to which the respondent reported feeling energetic [0-4], pre-treatment measurement
pre_proud	Extent to which the respondent reported feeling proud [0-4], pre-treatment measurement
pre_alert	Extent to which the respondent reported feeling alert [0-4], pre-treatment measurement
pre_inspired	Extent to which the respondent reported feeling inspired [0-4], pre-treatment measurement
pre_decided	], pre-treatment measurement Extent to which the respondent reported feeling decided [0-4]
pre_attentive	Extent to which the respondent reported feeling attentive [0-4], pre-treatment measurement
pre_active	Extent to which the respondent reported feeling active [0-4], pre-treatment measurement
tense	Extent to which the respondent reported feeling tense [0-4]
scared	Extent to which the respondent reported feeling scared [0-4]
guilty	Extent to which the respondent reported feeling guilty [0-4]
hostile	Extent to which the respondent reported feeling hostile [0-4]
irritable	Extent to which the respondent reported feeling irritable [0-4]
nervous	Extent to which the respondent reported feeling nervous [0-4]
fearful	Extent to which the respondent reported feeling fearful [0-4]
disgusted	Extent to which the respondent reported feeling disgusted [0-4]
afraid	Extent to which the respondent reported feeling afraid [0-4]

embarrassed	Extent to which the respondent reported feeling embarrassed [0-4]
pre_tense	Extent to which the respondent reported feeling tense [0-4], pre-treatment measurement
pre_scared	Extent to which the respondent reported feeling scared [0-4], pre-treatment measurement
pre_guilty	Extent to which the respondent reported feeling guilty [0-4], pre-treatment measurement
pre_hostile	Extent to which the respondent reported feeling hostile [0-4], pre-treatment measurement
pre_irritable	Extent to which the respondent reported feeling irritable [0-4], pre-treatment measurement
pre_nervous	Extent to which the respondent reported feeling nervous [0-4], pre-treatment measurement
pre_fearful	Extent to which the respondent reported feeling fearful [0-4], pre-treatment measurement
pre_disgusted	Extent to which the respondent reported feeling disgusted [0-4], pre-treatment measurement
pre_afraid	Extent to which the respondent reported feeling afraid [0-4], pre-treatment measurement
pre_embarrassed	Extent to which the respondent reported feeling embarrassed [0-4], pre-treatment measurement
age	Respondent's age at the time of… the baseline survey
itt.d	Intention-to-treat, reflecting the rate at which treatment was actually administered
right	Indicator variable indicating if individual's ideological scale value is on the right or let [1=right, 0=left]
policies_pardon	Level of support for pardoning the military officials responsible for crimes against human rights during the Pinochet regime [0-3]
policies_pardon_f1	Level of support for pardoning the military officials responsible for crimes against human rights during the Pinochet regime [0-3], first follow-up
policies_pardon_f2	Level of support for pardoning the military officials responsible for crimes against human rights during the Pinochet regime [0-3], second follow-up
policies_pardon_f3	Level of support for pardoning the military officials responsible for crimes against human rights during the Pinochet regime [0-3], third follow-up
pre.pol.inst.index	Additive index of items included to evaluate political institutions hypothesis, pre-treatment measurement
current_ineq	Level of agreement with the statement "Inequality is a problem in Chilean society" [0-3]
pre_current_ineq	Level of agreement with the statement "Inequality is a problem in Chilean society" [0-3], pre-treatment measurement
f1	Indicator variable for response to first follow-up [1=completed, 0=not completed]

f2	Indicator variable for response to second follow-up
f3	Indicator variable for response to third follow-up
pre_party_id	Do you feel close to any particular political party? [1=yes, 0=no], pre-treatment measurement
pre_political_interest	Level of political interest [0-3], pre-treatment measurement
pre_religion_importance	How important is religion in your life? [0-3], pre-treatment measurement
totalmuseums	Index variable capturing the total number of museums individual visited, out of a possible 15 museums
observerd	Indicator variable corresponding to whether treatment was observed
pre_economic_situation	

Codebook for "baselineuc.csv"

Variable	**Description**
ID	Respondent ID
ideology	self-identification on a 1-10 scale
pinochet	Level of agreement with statement "Pinochet was a leader that brought prosperity and order to Chilean society" [1=strongly agree, 2= somewhat agree, 3=neither agree nor disagree, 4=somewhat disagree, 5=strongly disagree]
pinochet_london	Assessment of impact on Chile of the detention in London of General Pinochet, in 1998 [1=very negative for Chile, 2=somewhat negative for Chile, 3=neither negative nor positive for Chile, 4=somewhat positive for Chile, 5=very positive for Chile]
prosecution	Assessment of impact on Chile of the prosecution of military tied to humans rights violations during the dictatorship [1=very negative for Chile, 2=somewhat negative for Chile, 3=neither negative nor positive for Chile, 4=somewhat positive for Chile, 5=very positive for Chile]
female	Indicator variable =1 if self-declared gender is female, 0 otherwise
