Replication archive for John D. Griffin, Brian Newman, and Patrick Buhr, "Class War in the Voting Booth: Bias Against High-Income Congressional Candidates." *Legislative Studies Quarterly*.

This archive contains data files and STATA code to replicate analysis reported in the article (Figures 1 and 2). We report results from three experiments. Consequently, we provide here three datasets and corresponding code for each of the three experiments.

The first experiment was conducted within the 2014 Cooperative Congressional Election Survey (citation below). The second and third experiments were conducted by the authors through Mturk.

Experiment 1

Data: Experiment 1 CCES for replication.dta (this dataset is the original dataset purged of identifying information such as ipaddress and geolocation codes)

Do file: Replication code experiment 1 CCES.do

Experiment 2

Data: Experiment 2 Mturk.dta (this dataset is the original dataset purged of identifying information such as ipaddress and geolocation codes)

Do file: Replication code experiment 2 Mturk.do

Experiment 3

Data: Experiment 3 Mturk for replication.dta (this dataset is the original dataset purged of identifying information such as ipaddress and geolocation codes)

Do file: Replication code experiment 3 Mturk.do
