4. In Canada there are many people of British descent, that is, they themselves or their ancestors came from Scotland or England. Some have been here for many generations, some are more recent arrivals. For some jobs almost all who hold the job are of British descent. In other jobs almost none are. I am going to read you a list of jobs. Would you please tell me what proportion of those holding the jobs you think are people of British descent. Even if you are not sure, would you make a guess. We are talking about people from Scotland or England not the Irish.

The first job we are interested in is "steel mill worker". Would you say that almost all steel mill workers are of British descent, that more than half are British, about half, less than half, almost none? (ENTER ANSWER BELOW BY CIRCLING THE CODE)

Now, how about "longshoremen"? (IF NECESSARY READ OUT ALTERNATIVE ANSWERS AGAIN.)

DEPARTMENT OF SOCIOLOGY AND ANTHROPOLOGY

Professor Donald J. Treiman
Department of Sociology
Columbia University in the City of New York
New York, N.Y. 10027

Dear Don,

Your letter of September 11 has surfaced in the mess on my desk and I'll try an answer. I think you must be referring to the coding used in, for example, cols. 15-16 of deck 1. In fact the code extends into col. 17 as well, and is the 1961 Canadian Census three digit occupational code. We just used the first two digits in generating the marginals. In all instances the code extends in to the immediate next column.

I suppose you have by now a copy of the 1961 Canadian code books for industry and occupation. In any case, it is a pretty lousy code and I would assume you would take advantage of the fact that we have re-coded all occupations in the U.S. code in Deck IV and use it in preference to the Canadian one.

You will be pleased that the meeting you attended was successful in convincing Statistics Canada (after some further backroom work) to take on the fieldwork. If we can find some quarter million they will do it for us in July, 1973. So we are now looking for a quarter million. For this price they will do a drop off/pick up version so it can be about as extensive as OCG I. Thanks again for your help.

Best wishes,

Peter C. Pineo
Professor

In Canada there are many people of British descent, that is, they themselves or their ancestors came from Scotland or England. Some have been here for many generations, some are more recent arrivals. In some jobs almost all who hold the job are of British descent. In other jobs almost none are. I am going to read you a list of jobs. Would you please tell me what proportion of those holding the jobs you think are people of British descent. Even if you are not sure, would you make a guess. We are talking about people from Scotland or England not the Irish.
