README

This repository contains the replication code for "Loopholes and the Incidence of Public Services: Evidence from Funding Career & Technical Education."

All of the code is available in the code folder. Files in the “clean” folder build analysis files. Files in the “analyze” folder create the tables, figures, and appendix exhibits.

Most of the data are private and personally identifiable and available for application from MEDC. Publicly available data can be found in the public_data folder (note that the code does not distinguish this directory).
