Dear Cliff Knopik,

The Department of Health received a public records request from you on July 29, 2021. You requested the following:

"As of 7/29/21 data on the WA DOH COVID Dashboard - For King County for the week of 7/18/21 there were 1287 confirmed COVID-19 cases, and 33 Hospitalizations, and an unknown number of deaths.
How many of these people have had 1 vaccination dose?
How many of these people are considered fully vaccinated?"

Staff provided the following as responsive to your request:
"As of 9/8/2021 there were 1296 confirmed cases (molecular positive) in King county with a specimen collection date between 7/18/2021 and 7/24/2021.

• 521 of these individuals were fully vaccinated at the time of specimen collection.
• 719 of these individuals were unvaccinated at the time of specimen collection.
• 56 of these individuals were partially vaccinated at the time of specimen collection.

A person is considered Fully vaccinated:
– 2 weeks after their second dose in a 2-dose series, such as the Pfizer or Moderna vaccines, or
– 2 weeks after a single-dose vaccine, such as Johnson & Johnson's Janssen vaccine
– Full protection from vaccination occurs about 2 weeks after receiving the final dose of an authorized COVID-19 vaccine because it typically takes that long for the body to build a high enough level of protection to fight the disease.
– This differs from 'breakthrough case' identified in Washington state in that 'fully vaccinated' is based on data exclusively from the Washington Immunization Information System (WA IIS) and does not require comprehensive information about the vaccination event such as manufacturer and lot number.

Partially vaccinated is defined as those who have received one or more doses of an authorized vaccine but have not reached the full 14 days after the final dose.
Unvaccinated is defined as those who have not received any dose of a COVID-19 vaccine."

Since all identified records have been provided to you, this request is considered closed.

Under RCW 42.56.520 you may appeal the decision to withhold information contained in the records via a request for review by the Department of Health's Public Records Officer. The request must be submitted in writing by one of the following methods:

1. Send an email request to PRRappeals@doh.wa.gov
2. Mail your request to:
   Public Records Officer
   Washington State Department of Health
   P.O. Box 47890
   Olympia, WA 98504-7890

If you have any questions or need additional information, please feel free to respond directly to this email.

Sincerely,

Washington State Department of Health
Disease Control and Health Statistics

Dear Cliff Knopik,

The Department of Health received a public records request from you on July 29, 2021. You requested the following:

"As of 7/29/21 data on the WA DOH COVID Dashboard - For King County for the week of 7/18/21 there were 1287 confirmed COVID-19 cases, and 33 Hospitalizations, and an unknown number of deaths.
How many of these people have had 1 vaccination dose?
How many of these people are considered fully vaccinated?"

While we are locating and assembling records responsive to your request, we are delivering records to you from a similar request as **installment #1**, copies of which are now available to you. These records have been uploaded to the DOH Public Records Center. You will need to log into your portal account to access your requested records. Your file(s) will be available for 60 days, after which they will be no longer accessible.

The healthcare data included was provided by local health jurisdictions, state investigators, and healthcare professionals. Records provided are current as of the date of the request, however, the records may retrospectively change over time as case and outbreak investigations gather more information. The Washington Disease Reporting System is a dynamic surveillance system that changes as investigations progress, thus cases and outbreaks may change in classification over time. As DOH staff reviews and assesses the data, future changes may occur that would affect/alter/change the records included in this report.

You can also view the SARS-CoV-2 Vaccine Breakthrough Surveillance and Case Information Resource report which is updated weekly at https://www.doh.wa.gov/Portals/1/Documents/1600/coronavirus/data-tables/420-339-VaccineBreakthroughReport.pdf.

You will receive the next installment on or before January 27, 2022 and will continue to receive installments until your request has been fulfilled.

Should you no longer need this information, please contact our office by responding directly to this email.

Sincerely,

Washington State Department of Health

Dear Cliff Knopik,

The Department of Health received your public records request on July 29, 2021 for the following records:

"As of 7/29/21 data on the WA DOH COVID Dashboard - For King County for the week of 7/18/21 there were 1287 confirmed COVID-19 cases, and 33 Hospitalizations, and an unknown number of deaths.
How many of these people have had 1 vaccination dose?
How many of these people are considered fully vaccinated?"

The Department of Health is in the process of identifying, gathering, and reviewing the records responsive to your request. We anticipate providing records responsive to this request on or before 01/27/2022.

WAC 246-08-990 (RCW 42.56.120) authorizes the Department of Health to collect fees for providing copies either electronically or in paper format. After we have determined the number of records responsive to your request, we will give you a cost estimate for production of the records. Here is a link to the public records fee schedule.

If you wish to limit your request, or if you have any questions, please feel free respond directly to this email.

Sincerely,

Washington State Department of Health
