This file discusses the steps needed to replicate the analyses reported in "High-Profile Criminal Violence. Why Drug Cartels Murder Government Officials and Party Candidates in Mexico"

Replication of Tables

1. Download "Dataset_HighProfileCriminalViolence.dta"
2. Run code from "Tables_HighProfileCriminalViolence.do"

Coding and description of variables is available in
"Codebook_HighProfileCriminalViolence.pdf"

Replication of Figures

The dataverse includes the separate .dta files that reproduce each figure.

1. Open code from "Figures_HighProfileCriminalViolence.do"
2. Follow instructions on which .dta file is required for each figure and run the corresponding code.

Maps were created using QGIS using the .dta file "Dataset_HighProfileCriminalViolence.dta"
