Comment

I strongly support the EPA's draft Interim Framework for Advancing Consideration of Cumulative Impacts, but please ensure that enforcement and accountability remain at the core of this policy. Without strict oversight, polluters will continue harming vulnerable communities with little to no consequence.

An environmental justice that protects public health can only be achieved when regulatory agencies have the authority and resources to hold polluters accountable and prevent industries from exploiting gaps in oversight, exploiting loopholes and greenwashing their operations.

I urge the EPA to strengthen enforcement measures within the Framework to ensure that environmental justice is not just an aspiration, but a reality. Thank you for considering my comments and for your commitment to protecting public health and the environment.

Sincerely,
Ms CC Halitsky
