Replication for: Twitter-sphere discourse tends to criticize the majority: An empirical analysis in Japan using deep learning

1) The uploaded file is the Twitter log data after the inference was conducted by BERT. By organizing this data, the numbers presented in the research note can be derived.

2) The program for running the analysis by BERT is based on the description and published code by Omi et al. (2021) (https://github.com/stockmarkteam/bert-book).

Omi, T, Kaneda, K, Morinaga, M and Emami, A (2021) *BERT ni yoru sizen gengo syori nyumon: Transformers wo tsukatta jissen programming.* (Introduction to Natural Language Processing with BERT: Practical Programming with Transformers.) Tokyo: Ohm-sha.
