ReadMeFile – CEDAW ROCS – Kreutzer

These files include data and estimation code for:

Willow Kreutzer. Introducing the CEDAW ROCS Dataset: A dataset on the United Nations Treaty the Convention on the Elimination of All Forms of Discrimination Against Women – Reservations and Objections of Committed States. Foreign Policy Analysis. 2024

Compiled on July 15, 2024, by Dr. Willow Kreutzer (willow.kreutzer@gmail.com)

INCLUDED:

5 STATA Datasets:

CEDAW_ROCS_DATASET.dta
This is the final version of the dataset.
This is the dataset that creates the tables in the research note.

WB_countries_Admin0_10m_ccode.dta
This is one of the datasets that helps create the CEDAW commitment map in the research note.

WB_countries_Admin0_10m_shp.dta
This is one of the datasets that helps create the CEDAW commitment map in the research note.

CEDAW_Reservation_Removal_DataONLY2021.dta
This is one of the datasets that helps create the CEDAW commitment map in the research note.

CEDAW_CIRI_DATA_10232023.dta
This is the dataset that creates the time series graphs in the research note.

1 STATA do File:
CEDAW_ROCS_Dataset.do
The file used to create all the tables and graphs in the research note.

1 Excel File:
CEDAW_ROCS_Dataset.xlxs
This is the final version of the dataset.
There are two sheets in the Excel file, the first has article reservations, and the second has objections.

1 Read Me File:

README File-CEDAWROCS.pdf

Describes the included data and files

1 Codebook:

CEDAW ROCS Codebook.pdf

Describes the coding mechanisms, decisions, and variables for the CEDAW ROCS dataset.

Notes:

1. The CEDAW ROCS data set was hand-coded by Dr. Willow Kreutzer, Dr. Sara Mitchell, and two research assistants Payton Riley, and Caleb Slater.
2. The two other datasets were pulled from a previous paper Kreutzer and Mitchell 2024, and the other was created for the map. I do not include all of the constitutive data sets to recreate it these other datasets from scratch. The inclusion of the files is intended to clarify my coding decisions, variable creation, or variable modification schemes. The data set included here has only the relevant variables for replicating my results discussed in the research note.
3. The programs are written for STATA version 19, though they may run in previous versions.

Variables:

Here are the descriptions for all the variables included in the CEDAW ROCS dataset. See the research article for additional details.

Observations: 8,081
Variables: 95

Variable name	Storage type	Display format	Value label
ccode	int	%10.0g	COW Country Code
year	int	%10.0g	year
abbrev	str3	%9s	COW Alpha Country Code
objection1	byte	%10.0g	Objection 1
