Cavazza, Corbetta, The Political Meaning of Dining Out: Testing the Link Between Lifestyle and Political Choice in Italy

Files related to the paper

1. ITA2013_(itvers2013_11_29).sav	Data set, system file Spss
2. Stili_Compute base x RISP.sps	Variables construction, including Factor analysis and Cluster analysis (Table 1)
3. Anova Crosstabs x RISP.sps	Socio-demographic profiles of clusters (Table 2, 3)
4. Nomreg_4 x RISP.sps	Logistic multinomial regression (Table 4, 5)
5. Margins cluster-voto.do	Margins with Stata (Table 6)

Procedure to replicate the results
1. ITA2013_(itvers2013_11_29).sav is the dataset

2. Running <Stili_Compute base.sps> on the dastaset produces the construction of the variables needed for the following analyses and moreover the Factor analysis and the Cluster analysis (table 1)

3. Running <Anova Crosstabs x RISP.sps> on the dastaset generated in the step 2 produces Socio-demographic profiles of clusters (Table 2, 3)

4. Running <Nomreg_4 x RISP.sps> on the dastaset generated in the step 2 produces Logistic multinomial regression (Table 4, 5)

5. Running <Margins cluster-voto.do> with STATA on the dastaset generated in the step 2 and converted in STATA file, produces Margins with Stata (Table 6)
