Data and Programs

This folder contains four do files, and 10 data files (respondent and interval files from the NSFG 1973, 1976, 1982, 1988, 1995). In order to create the dataset and the tables in the paper, run the file Master.do. This will run the remainder of the do files in this folder. The programs were run on Stata MP with 4 processors.
