Document Information	ReadMe dataset: 03_Treatment_Tracking_Table_Reengineering_Broken_Books_RBB. This dataset support the article published JAIC entitled, "REENGINEERING BROKEN BOOKS (RBB) A minimally invasive tissue repair technique for hollowback books". Authors: Jana L Dambrogio, Emily Hishta Cohen, Ayako Letizia, Mary Uthuppuru, Brien Beidler, Kate Beattie, Laura Bergemann and Jennifer Pellecchia
Column title	Explanation of column title
RBB #	An inventory number of a volume of a book repaired by the RBB for the MIT Libraries collection.
Title	A title of the book repaired by the RBB from 2014 to 2019 in MIT Libraries Wunsch conservation laboratory.
Author, Editor, or Publisher	A creator or originator of the book
Year Published	A year of publication of the book.
Call #	A call number of the book. The call number links to the data in our search engines that provides specific shelf mark location and the known data about the particular imprint. MIT Libraries uses the Library of Congress
Year of Repair	A year of the RBB research team repaired the book
2019 After Treatment RBB Condition Review	The RBB repair evaluation in 2019. "intact": both joints and hinges were in place and functioning, and the repair carrier had remained adhered to interior areas. "stable": the repair began to break down, but the book continued to function.
HxWxD in millimeters	Measurements of the book size in millimeters. "H": height (from top to bottom of the book cover). "W": width (from foredge of the book cover to the book spine). "D": depth (thickness of the book).
Weight After Treatment (with CoLibri or poly jacket)	Weight of the book in grams measured after the RBB repair performed. Total weight includes the book's original weight, repairing materials attached, and book jacket (Colibri or polyester) if provided.
Size + Weight Size: Small (S), Medium (Ms), Oversize (O) + Weight: Light (L), Medium (Mw), Heavy (H), Hefty (xxH)	A category of the book based on its size and weight. "Size" refers to a dimension measured in millimeters on the largest side of the book. (S) small size: <199mm, (Ms): medium size: 200-274mm and (O): oversize: >275mm. "Weight" refers to the weight measured in grams after RBB repair. (L) Lightweight: <500g, (Mw)Medium weight: 500-699g, (H) heavyweight: 700-2099g and (xxH) hefty weight: >2100g
# of Patron Requests	A frequency of a book being checked out for borrowing or requesed for viewing by the MIT Libraries patrons after the RBB repair.
Libraries Collection Code, circulating or non-circulating	Shelf location of the book based on a library and collection in the MIT Libraries. "LSA": Library Storage Annex, "Rotch": Rotch Library, "Science": Hayden Library, "Humanities": Hayden Library, "Dewey": Dewey Library, "DDC": Department of Distinctive Collections. "circulating": books that can be borrowed. "non-circulating" books that can be viewed only in DDC reading room.
Permalink for Record	An URL of a web page for the book in the MIT Libraries' Barton Catalog.

Document Information	ReadMe dataset: 03_Treatment_Tracking_Table_Reengineering_Broken_Books_RBB. This dataset support the article published JAIC entitled, "REENGINEERING BROKEN BOOKS (RBB) A minimally invasive tissue repair technique for hollowback books". Authors: Jana L Dambrogio, Emily Hishta Cohen, Ayako Letizia, Mary Uthuppuru, Brien Beidler, Kate Beattie, Laura Bergemann and Jennifer Pellecchia
Stored Horizontal (H)/ Vertical (V)	An orientation of the book stored on its bookshelf after the RBB repair. "V": a book stored vertically, standing upright on the bookshelf. "H": a book stored horizontally, laying flat on the bookshelf.
Protection/Enclosure: CoLibri jacket or polyester jacket; custom four-flap (four-flap), prefabricated four-flap	A protection or enclosure housing a book after the RBB repair. "CoLibri": CoLibri book cover, "Polyester jacket": a book jacket made of a polyester sheet, "Prefab": prefabricated four flap enclosure, "Four-flap": custom-made four-flap enclosure, "Box": custom-made 2-piece enclosure.
Point of Failure (point of access) which the treatment addressed	An area of structural damage occurred for the book cover to the textblock connection. The damage is often a cause for spine materials to be lifted, where creates an entering location for repairing materials to build a hollow and reconnect the connection structure.
Sewn Through Fold or Single Sheet Adhesive Bound	Sewn through the fold refers to either hand sewn books or machine sewn. Adhesive bound refers to single leaves secured together with glue or adhesive. We say sewn in the table when we were not able to differentiate between hand-sewn or machine-sewn.
Notes on Binding	Additional information of the book's description such as materials, techniques, fabrication methods, or old
Last updated	21 March 2021
Missing data codes	The RBB team assigned each book a treatment number. Approximately 11 books which were originally selected for RBB were later identified as not appropriate for this treatment. The following RBB# numbers have not been included in this table: 18, 19, 33, 45, 46, 47, 50, 52, 54, 57, 66. As a consequence, the table contains non-consecutive RBB numbers.
