B20 Australia Summit

Results from Prioritisation of B20 Recommendations

Executive Summary

The B20 leads official engagement with G20 governments on behalf of the international business community. In 2014 the B20 has developed a comprehensive policy program calling for structural reform in the global economy. These are based on 20 mutually reinforcing recommendations from the B20 to the G20. The full list of B20 recommendations can be found here[1]

All 20 recommendations represent clear priorities for the B20. On Thursday 17 July 2014, participants in the B20 Australia Summit were presented final recommendations from each B20 taskforce and working group:

- Financing Growth
- Human Capital
- Infrastructure & Investment
- Trade
- Anti-Corruption Working Group

Summit attendees – a subsection of the entire B20 community – were asked to select their top recommendation in each taskforce and working group. The results of the voting are found in this document

B20 conducted the voting to understand the top priorities of Summit participants and assist in the focus of the advocacy period. The results do not represent a comprehensive survey of the international business community or the entire B20 membership

Voting was conducted using a tablet-based application developed for the B20 by Accenture. The IT infrastructure was hosted by Accenture Cloud Platform and Amazon Web Services
