Moderator

Welcome and thank you for joining us! You are going to play a serious game called New Shores, it is a simulation of an island that you are going to develop collectively by taking actions and within the game, we would like you to treat it as if it is your local neighbourhood and think about what choices would you make for living in this space. Please note that New Shores is not a regular game, as it does not have one defined goal. Therefore, we encourage you initially to think what would be your personal goal in the game and keep a note of it. Please note the following housekeeping rules: • We only communicate through chat so please interact with the moderator and other participants as much as possible • we treat each other with respect and give constructive criticism if needed • if any of you have problems viewing the game interface please refresh your webpage • if the above does not work please log out and log in again • for any other emergency please contact me and Zoe via email/reply to the one send earlier today with your login details

Imagine that you live on a mysterious island covered with a beautiful forest full of green trees and tasty berries. Soon you discover also that the ground is rich with coal

deposits. You and other inhabitants of New Shores will try to organize your life in a way that suits you and other members of the community. To do so you can use the island's natural resources, such as wood, coal and berries. They will bring you money needed for private and public investments. With money you can raise your standard of living by investing in e.g. a private library or a swimming pool with jacuzzi. You may also contribute to public buildings, which add to the community statistics, such as education, health and culture. It's up to you to decide on your priorities. Bear in mind, however, that your actions always entail consequences. Excessive use of the island's resources may increase the possibility of climate disasters...

Betula
Agree with last 2 comments
19:05:01

Castanea
I charge reasonable rent
19:05:02

Fraxinus
planning the islands developemnt is key 5 year plan
19:05:07

Moderator
Was it difficult in terms of now knowing who the other players were?
19:05:19

Ulmus
It's always a balance between personal v communal. Guess it's a balance and the balance is a very personal judgement
19:05:23

Castanea
very difficult with other players; no sound or visual cues
19:05:40

Sorbus
its an island that we all need to protect our key aspects in life
19:05:43

Fraxinus
without the community personal is irrelevant really
19:05:47

Sorbus
education and health
19:05:49

Castanea
you need to add avatars of some kind
19:05:56

Moderator
What does it mean to win in this game?
19:06:10

Citrus
Its a trade off - need to compromise
19:06:14

Fraxinus
we all needs each others strengths and knowledge to thrive
19:06:15

Sorbus
i dont think anyone has won
19:06:26

Fraxinus
commuication
19:06:32

Sorbus
it stems from desires in life
19:06:32

Fraxinus
effective communication
19:06:37

Betula
Agree no one wins
19:06:43

Moderator
Do you think it would be easier for you to talk to other players rather than texting?
19:06:54

Fraxinus
there are few winners as not everyone will be happy
19:07:00

Fraxinus
yes definite;y
19:07:07

Sorbus
of course
19:07:11

Citrus
Probably
19:07:13

P3
yep
19:07:13

Fraxinus
its a bit clumsy in some ways not natural
19:07:30

Castanea
it would also affect the decision making
19:07:32

Ulmus
Happiness comes from within - it's personal. This determines self v community and depends on each individual
19:07:39

Citrus
Its a lot easier to brainstorm
19:07:52

Castanea
you are less likely to strip mine the island if people can see your face...
19:07:54

Moderator
How did your goals change during the game?
19:08:10

Fraxinus
happiness definitely comes from within and also from without helping others and working together
19:08:11

Fraxinus
lockdown has shown us that
19:08:17

Sorbus
i think the main goals are what one wants to achieve, working together sooner would have been key and we could have dealt more sanctions.
19:08:18

Sorbus
fraxinus has a key point
19:08:29

Citrus
I definitely tried to help with the hospital building which wasn't obvious at first
19:08:55

Ulmus
You must have Castaneda (stripped mines) to get that cash or not supported community investments
19:09:11

Fraxinus
i think even by helping each other we are helping ourselves no man is an isalnd and all that.
19:09:31

Citrus
But is he happy?

19:09:32

Citrus

Castaneda that is

19:09:55

Castanea

yep...

19:10:03

Castanea

...in my very nice private library

19:10:15

Moderator

What do you think would have happened to the island if you had continued playing the game?

19:10:28

Sorbus

castanea seems to have sat and accumulated wealth, someone once told me the richest man in the graveyard means nothing ultimately

19:10:39

Fraxinus

gone down hill

19:10:40

Ulmus

I don't think any of us lent money to anyone else

19:10:48

Fraxinus

slowly got worse until people learned

19:10:49

Betula

Down hill quickly

19:10:59

Citrus

We would have had nice buildings but worse conditions overall

19:11:05

Fraxinus

or people wpuld leave as quality of life diminishes

19:11:07

Castanea

wasn't going to lend money without interest or a contract

19:11:15

Sorbus

we werent all pulling together, if kept on playing, more CO2 raising, more disasters and more individual wealth building

19:11:17

Fraxinus
yes i agree
19:11:35

Sorbus
probably persona of today's society
19:11:36

Moderator
Was there any specific barrier to achieving your goals you would like to mention?
19:11:56

Fraxinus
its difficult
19:11:56

Fraxinus
different priorities
19:12:06

Castanea
steep learning curve
19:12:08

P3
we each have our goals and hiding behind these aliases allows us to show our traits

Sorbus
sorbus - we each have our goals and hiding behind these aliases allows us to show our traits
19:12:44

P3
Agree with Sorbus
19:13:03

Sorbus
unfair to comment on what is right and wrong we are all build differently
19:13:04

Citrus
Not enough opportunity to improve island enviroment
19:13:10

Fraxinus
i guess its about listening to different opinions and see who has most expertise and be guided by them
19:13:23

Moderator
Thank you for these great insights!Could you describe the community you have created in this game? How did it feel to be its part?
19:13:24

Ulmus
Castanea - still don't see you taking responsibility for how you got so much cash? Public ally you were trying to take a different view to the actions you appear to have taken in the game
19:13:28

P3
for me for 3-4 rounds we didnt interact and was on our own road until we realised things wouldnt be built/protected without communicating
19:14:06

P3?
19:14:10

Castanea
its not a crime to make money!
19:14:13

Fraxinus
no blaming.
19:14:18

Sorbus
p3 sorbus sorry
19:14:24

Fraxinus
no it isnt and this is the pint of the game. public v community
19:14:32

Ulmus
No blame - just an observation
19:14:43

Citrus
I agree with Sorbus
19:14:49

Moderator
is there anything else you would like to share?
19:15:19

Betula
Individual wins over community

19:15:19

Citrus

Its possible that with a bit more time things might have improved
19:15:32

Ulmus

The seemed to be a slow start to work together- some did and some appeared not to want to support common goals
19:15:37

Sorbus

once we realised it was working together some of us didnt and a few saw their wealth increasing and like what they saw..
19:15:38

Fraxinus

lets hope ity's not a reflection of present life and its not oo late to change
19:16:30

Sorbus

interesting though and how the cast were selected based on vital stats provided in the beginning maybe moulding what would happen here
19:16:36

Ulmus

I'm not aware that anyone used the watch function
19:16:40

Citrus

Yes might have done if game had gone on
19:17:15

Fraxinus

i couldnt was too distracting
