Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U. S. totals are National Safety Council estimates.

*The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public non-motor-vehicle totals.

**Differences between the figures given above and those on pages 62 and 63 are due in most cases to the inclusion of nontraffic deaths in this table.

†Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

††**Work** death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases which are not compensable. For compensable cases only, see page 34.

§Includes late effects (deaths occurring more than one year after the accident).

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U. S. totals are National Safety Council estimates.

*The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public non-motor-vehicle totals.

**Differences between the figures given above and those on pages 62 and 63 are due in most cases to the inclusion of nontraffic deaths in this table.

†Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

††Work death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases which are not compensable. For compensable cases only, see page 34.

§Includes late effects (deaths occurring more than one year after the accident).

‡Not included in Total U.S.

‡‡See § footnote, upper table page 19.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

*The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

**Differences between the figures given above and those on pages 62 and 63 are due in most cases to the inclusion of nontraffic deaths in this table.

†Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

††Work death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases which are not compensable. For compensable cases only, see page 29.

§Includes late effects (deaths occurring more than one year after the accident).

‡Not included in Total U.S.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a]The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b]Differences between the figures given above and those on pages 62 and 63 are due in most cases to the inclusion of nontraffic deaths in this table.

[c]Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases which are not compensable. For compensable cases only, see page 39.

[d]Includes late effects (deaths occurring more than one year after the accident).

[e]Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

[f]Rate was less than 0.05.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a]The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b]Differences between the figures given above and those on pages 62 and 63 are due in most cases to the inclusion of nontraffic deaths in this table.

[c]Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases which are not compensable. For compensable cases only, see page 39.

[d]Includes late effects (deaths occurring more than one year after the accident).

[e]Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

[f]Not included in Total U.S.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a]The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b]Differences between the figures given above and those on pages 70 and 71 are due in most cases to the inclusion of nontraffic deaths in this table.

[c]Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases which are not compensable. For compensable cases only, see page 35.

[d]Includes late effects (deaths occurring more than one year after the accident).

[e]Deaths per 100,000 population, adjusted to annual basis where less than 12 months reported.

[f]Rate was less than 0.05.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a]The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b]Differences between the figures given above and those on pages 68 and 69 are due in most cases to the inclusion of nontraffic deaths in this table.

[c]Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases which are not compensable. For compensable cases only, see page 43.

[d]Includes late effects (deaths occurring more than one year after the accident).

[e]Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.

[f]Rate was less than 0.05.

[g]Not included in Total U.S.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a] The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b] Differences between the figures given above and those on pages 68 and 69 are due in most cases to the inclusion of nontraffic deaths in this table.

[c] Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases which are not compensable. For compensable cases only, see page 41.

[d] Includes late effects (deaths occurring more than one year after the accident).

[e] Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.

[f] Rate was less than 0.05.

[g] Not included in Total U.S.

Permanent Impairment Due to Injuries

Permanent impairment due to injuries accounted for 26.3 per cent of all impairments for the 3-year period 1985-1987. The estimated prevalence of selected impairments was 18.9 million. About 1 of every 4 selected impairments due to injuries occurred in moving motor-vehicle accidents, and more than 1 of every 5 occurred in accidents at home. Forty-five per cent of visual and 28 per cent of hearing impairments due to injuries occurred in accidents at home. Almost 2 of every 5 accidents causing paralysis of extremities or parts of extremities occurred on the street and highway. About 7 of every 10 accidents resulting in loss of entire finger(s) and/or thumb(s) occurred in industrial places or at home.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a] The all-class Total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the Work death totals as well as the Motor-Vehicle and Public Nonmotor-Vehicle totals.

[b] Differences between the figures given above and those on pages 98 and 99 are due in most cases to the inclusion of nontraffic deaths in this table.

[c] Work death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases that are not compensable. For compensable cases only, see page 57.

[d] Includes late effects (deaths occurring more than one year after the accident).

[e] Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.

PRINCIPAL CLASSES BY STATE

The states listed below participate in the Accidental Death Summary reporting system. Reports from these states are used to make current year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 1995 represents a one percent increase over that for 1994. The estimated number of deaths for the Motor-Vehicle, Work, and Public Nonmotor-Vehicle classes showed similar increases of two, one, and two percent, respectively. The estimate for the Home class exhibited the only decline, a one percent decrease over that for 1994. The population death rates for the Total and the Motor-Vehicle and Work classes all increased fractionally by 0.2 or less, while the rate for the Home class decreased by a similar amount. The rate for the Public Nonmotor-Vehicle Class remained unchanged.

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a] The all-class total may not equal the sum of the separate class totals because motor-vehicle and other transportation deaths occurring to persons in the course of their employment are included in the work death totals as well as the motor-vehicle and public nonmotor-vehicle totals.

[b] Differences between the figures given above and those on pages 98 and 99 are due in most cases to the inclusion of nontraffic deaths in this table.

[c] Work death totals may be too low where incomplete information on death certificates results in the deaths being included in public or unclassified. The work totals may include some cases that are not compensable. For compensable cases only, see page 57.

[d] Includes late effects (deaths occurring more than one year after the accident).

[e] Deaths per 100,000 population.

PRINCIPAL CLASSES BY STATE

The states listed below participate in the Accidental Death Summary reporting system. Reports from these states are used to make current year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 1996 represents a less than 0.5% increase over that for 1995. The number of unintentional-injury deaths in the Public Nonmotor-Vehicle class also showed an increase of less than 0.5%, while the Motor-Vehicle class exhibited a decrease of similar magnitude. The estimate for the Work class decreased by 3%, while that for the Home class increased by 1%. The population death rates for the Total and the Motor-Vehicle class each declined by 1%, while that for the Work class declined 5%. The rates for the Home and Public Nonmotor-Vehicle classes remained unchanged.

PRINCIPAL CLASSES BY STATE

The states listed below participate in the Accidental Death Summary reporting system. Reports from these states are used to make current-year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 1997 decreased less than 0.5% from 1996. The number of unintentional-injury deaths in the Motor-Vehicle class also showed a decrease of less than 0.5%, while the Public Nonmotor-Vehicle class exhibited a 4% decrease. The estimate for the Work class increased by 2%, while that for the Home class increased by 3%. The population death rates for the Total and the Motor-Vehicle classes each declined by 1%, while that for the Public Nonmotor-Vehicle class declined 6%. The rates for the Home class increased 2%, while that for the Work class remained unchanged.

PRINCIPAL CLASSES BY STATE

The states listed below participate in the Accidental Death Summary reporting system. Reports from these states are used to make current year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 1998 remained unchanged from 1997. The number of unintentional-injury deaths in the Motor-Vehicle class showed a decrease of 3%, while the Work class exhibited a 1% decrease. The estimates for both the Home and Public Nonmotor-Vehicle classes showed a 3% increase. The population death rates for the Total and Motor-Vehicle classes declined by 1% and 4%, respectively. The rates for the Home and Public Nonmotor-Vehicle classes each increased 1%, while that for the Work class remained unchanged.

[c] Work death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases that are not compensable. For compensable cases only, see page 58.

[d] Includes late effects (deaths occurring more than one year after the accident).

[e] Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.

[f] Less than 0.05.

PRINCIPAL CLASSES BY STATE

The states listed below participate in the Accidental Death Summary reporting system. Reports from these states are used to make current year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 1999 increased 4% from 1998. The number of unintentional-injury deaths in the Motor-Vehicle class showed a decrease of 1%, while the Work class exhibited an increase of less than 0.5%. The estimates for the Home and Public Nonmotor-Vehicle classes showed increases of 5% and 13%, respectively. The population death rate for the Total class increased 3%, while the rate for the Motor-Vehicle class declined by 3%. The rates for the Home and Public Nonmotor-Vehicle classes increased 5% and 11%, respectively, while the rate for the Work class remained unchanged.

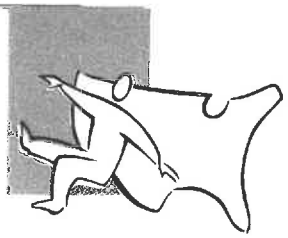
[b] *Differences between the figures given and those on pages 94 and 95 are due in most cases to the inclusion of nontraffic deaths in this table.*

[c] *Work death totals may be too low where incomplete information on death certificates results in the deaths being included in Public or Unclassified. The Work totals may include some cases that are not compensable. For compensable cases only, see page 51.*

[d] *Includes late effects (deaths occurring more than one year after the accident).*

[e] *Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.*



PRINCIPAL CLASSES BY STATE

The states listed below participate in the Injury Mortality Tabulations reporting system. Reports from these states are used to make current year estimates. See the Technical Appendix for more information.

The estimated total number of unintentional-injury deaths for 2000 was unchanged from 1999. The number of unintentional-injury deaths in the Public Nonmotor-Vehicle class was down 6%, while the Motor-Vehicle class was unchanged from 1999. The estimates for the Work and Home classes showed increases of 1% and 5%, respectively. The population death rate for the Public Nonmotor-Vehicle class decreased 7%, while the rates for the Total and the Motor-Vehicle class decreased 1% each. The rate for the Work class remained unchanged while the rate for the Home class increased 4%.

PRINCIPAL CLASSES OF UNINTENTIONAL-INJURY DEATHS BY STATE, 2000

State	Total[a]		Motor-Vehicle[b]		Work[c]		Home		Public Nonmotor-Vehicle	
	Deaths	Rate[d]	Deaths	Rate[d]	Deaths	Rate[d]	Deaths	Rate[d]	Deaths	Rate[d]
Total U.S.	**97,300**	**35.3**	**43,000**	**15.6**	**5,200**	**1.9**	**29,500**	**10.7**	**22,000**	**8.0**
Colorado	1,618	37.6	673	15.6	91	2.1	331	7.7	571	13.3
Delaware	227	29.0	136	17.4	5	0.6	73	9.3	13	1.7
Florida	6,137	38.4	2,393	15.0	223	1.4	1,350	8.4	2,253	14.1
Hawaii (8 mos.)	201	24.9	89	11.0	3	0.4	33	4.1	76	9.4
Idaho	522	40.3	287	22.2	13	1.0	123	9.5	94	7.3
Kansas	867	32.2	449	16.7	54	2.0	207	7.7	171	6.4
Missouri	2,505	44.8	1,238	22.1	72	1.3	585	10.5	583	10.4
New Jersey (10 mos.)	1,575	22.5	537	7.7	58	0.8	509	7.3	487	6.9
New Mexico	1,023	56.2	471	25.9	20	1.1	274	15.1	245	13.5
Oregon (7 mos.)	651	32.6	239	12.0	29	1.5	173	8.7	151	7.6
South Dakota	335	44.4	184	24.4	28	3.7	44	5.8	96	12.7

Source: Provisional reports of vital statistics registrars; deaths are by place of occurrence. U.S. totals are National Safety Council estimates.

[a] The all-class total may not equal the sum of the separate class totals because Motor-Vehicle and other transportation deaths occurring to persons in the course of their employment are included in the Work death totals as well as the Motor-Vehicle and Public Nonmotor-Vehicle totals and also because unclassified deaths are included in the total.

[b] Differences between the figures given above and those on pages 102 and 103 are due in most cases to the inclusion of nontraffic deaths in this table.

[c] Work death totals may be too low where incomplete information on death certificates results in the deaths being included in the Public class. The Work totals may include some cases that are not compensable. For compensable cases only, see page 51.

[d] Deaths per 100,000 population, adjusted to annual basis where less than 12 months were reported.
