README

This is a replication package for the following paper: Exley, Christine L., Nils H. Lehr, and Stephen J. Terry "Nonprofits in Good Times and Bad Times," *Journal of Political Economy* Microeconomics, accepted in 2022.

The data are contained in the following four STATA files: REGDATA_SOI.dta, REGDATA_EIN.dta, REGDATA_COMPUSTAT.dta, FINAL_classifications.dta.

To create the map, we provide a shape file for US Commuting Zones contained in two files: cz1990.shp, cz1990.dbf.

To replicate the results in this paper, please run ANALYSIS.do in STATA with all files saved in the same working file directory. For the code to run in STATA, you may need to download some packages including: sxpose,mhtexp, reghdfe, spmap, and shp2dta.

If you have questions, please contact Nils H. Lehr at nilslehr@bu.edu.
