REPLICATION FILES FOR
"RATIO BIAS AND POLICY PREFERENCES: HOW EQUIVALENCY FRAMING OF NUMBERS CAN AFFECT ATTITUDES"

Rasmus T. Pedersen

November 2017

This document describes the files needed to reproduce the results reported in Pedersen, Rasmus T. (2016). Ratio Bias and Policy Preferences: How Equivalency Framing of Numbers Can Affect Attitudes. *Political Psychology* (Early View).

The replication files are as follows:

1. **Ratio_bias_and_policy_preferences_main_exp.dta**: Survey data from the survey conducted by YouGov, February 2014. Identifying variables and open-ended comments have been deleted to ensure anonymity (.dta).
2. **Ratio_bias_and_policy_preferences_main_exp.do**: A Stata do-file, used to produce the results reported in the paper. Written for Stata 14 (.do)

To reproduce the results:

1. Download and save all replication files in C:\Ratio_bias_and_policy_preferences\ (if saved elsewhere, minor adjustments are needed in the two Stata do-files)
2. Run the Stata do-file *Ratio_bias_and_policy_preferences_main_exp.do*
