Supplementary Material

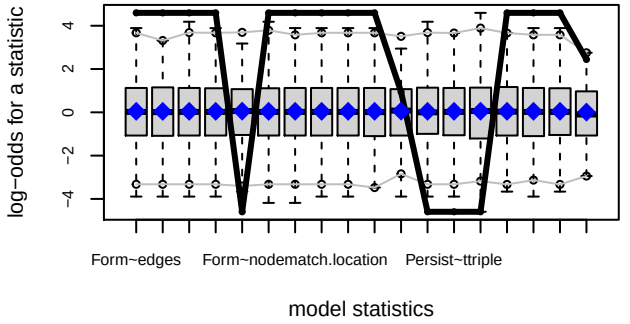
Determinants of Alliance Formation and Dissolution Among International Health Organizations: The Influence of Homophily and Institutional Power in Affinity Communication Networks (MCQ-22-029)

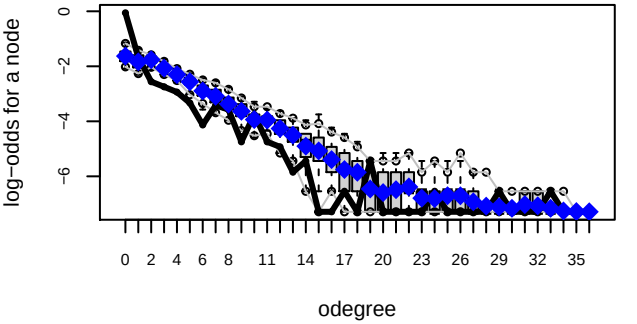
Section 1: Goodness of fit plotting

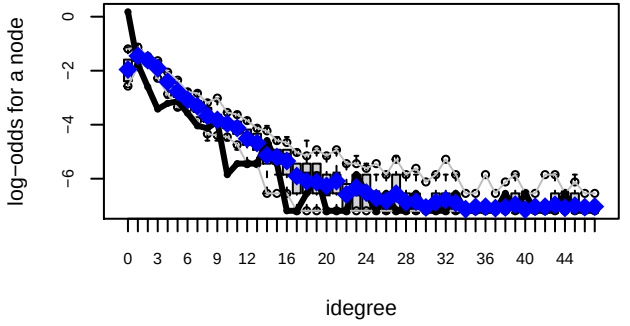
Section 2:Network visualizations in color

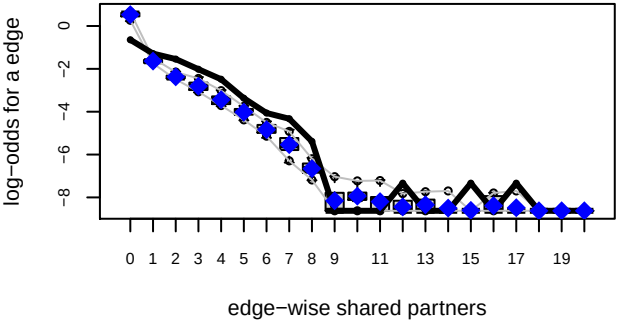
Section 3: Network visualizations in black and white

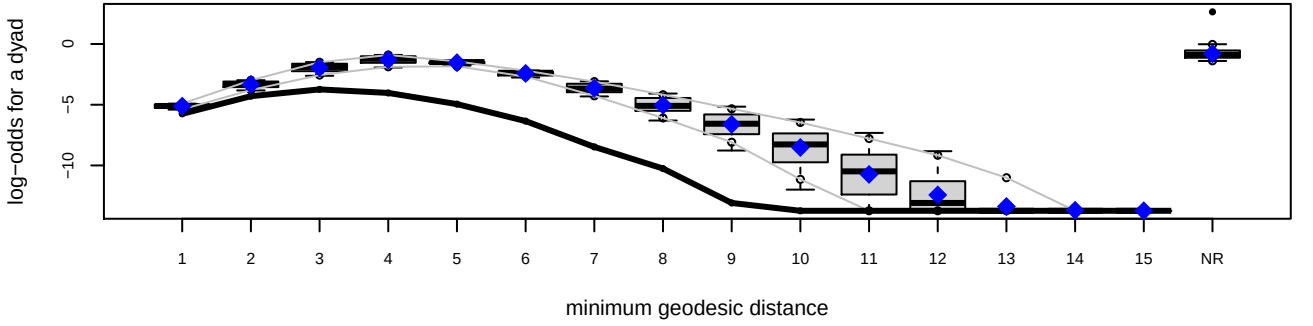
Goodness−of−fit diagnostics



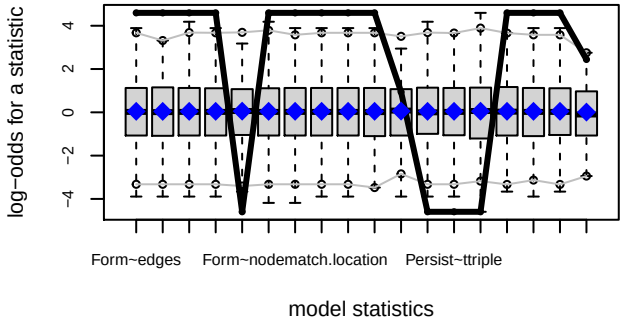


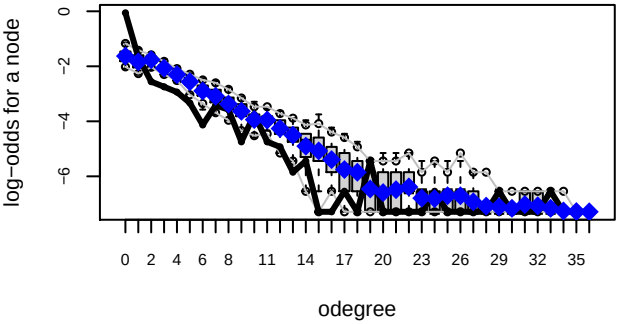


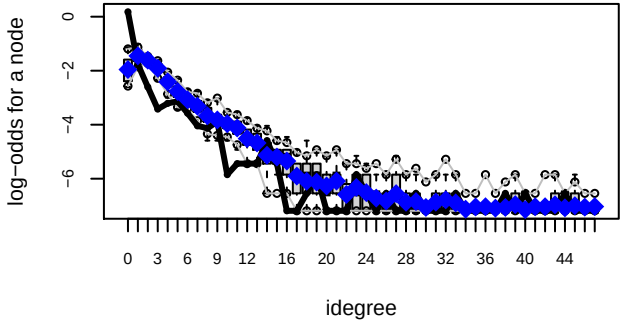


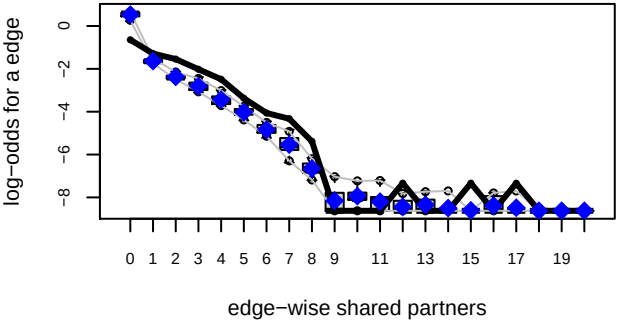


Goodness−of−fit diagnostics









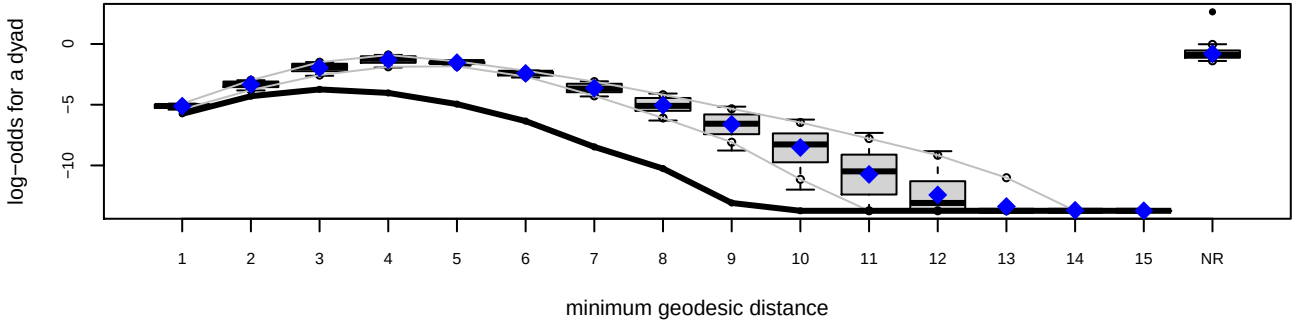


Figure 1

2005 Network Visualization

Note. Nodes were sized by their degree centrality scores. Bigger nodes had higher centrality scores. Color indicates health topic area: AIDS = pink; Drug = blue; Tobacco = light blue; Alcohol = green; General = orange. Nodes with the highest degree centrality scores are labeled with their names.
