README

This package contains the data and code used for the main analyses (Tables 2-5) reported in Vladasel et al. 2024, Revenue Drift, Incentives, and Effort Allocation in Social Enterprises, *Journal of Economics & Management Strategy*, forthcoming.

The sample included in the data file already applies all restrictions discussed in the paper. The paper also describes the variables included in the dataset in detail; the variables also include intuitive labels in the dataset.

For queries related to the data and analysis, please email Theodor Vladasel at theodor.vladasel@upf.edu.
