Authors: Roman Senninger and Henrik B. Seeberg
Title: Which Information Do Politicians Pay Attention To? Evidence from a Field Experiment and Interviews
British Journal of Political Science
December 2023

All analyses were conducted in R. Please contact us at rsenninger@ps.au.dk if you have any questions.

Execute
You can execute the code by creating a .RProj file in the folder that contains the data and code and run the files in this R Project environment or by setting the working directory manually using setwd()

Required R Packages
You need to install and load the following R packages to run the replication materials. To install packages please use install.packages("insert package name here")

packages <- c("tidyverse","firatheme","estimatr","ggplot2", "prediction", "texreg", "visreg", "sandwich", "lmtest", "sampleSelection"

lapply(packages, library, character.only = TRUE)

Each replication file specifies which R packages to load.

Data files:

df_replication.RData

df_replication_A.RData

df_replication_bounded.RData

df_replication_votes.RData

Replication files:

0_replication_main.R – R script to replicate the figures and tables in the main text.

1_replication_A.R - R script to replicate the maps in Section A in the supplementary information.

1_replication_C.R - R script to replicate the tables and

figures in Section C in the supplementary information.

1_replication_D.R - R script to replicate the figures in Section D in the supplementary information.

1_replication_E.R - R script to replicate the tables and figures in Section E in the supplementary information.

1_replication_F.R - R script to replicate the tables and figures in Section F in the supplementary information.

1_replication_G.R - R script to replicate the figures in Section G in the supplementary information.

1_replication_H.R - R script to replicate the tables in Section H in the supplementary information.

1_replication_I.R - R script to replicate the tables in Section I in the supplementary information.

1_replication_J.R - R script to replicate the tables and figures in Section J in the supplementary information.

1_replication_K.R - R script to replicate the tables and figures in Section K in the supplementary information.
