List of Files

The following are the list of necessary files to replicate the results of *Cuadros-Menaca and Gaduh* (forthcoming at EDCC), "Remittances, Child Labor, and Schooling: Evidence from Colombia".

1. **Do.do:** is the Stata code to generate the main tables of the document.

2. ***Remit_Child_School.dta***: is the working data file. This working data set is constructed from the microdata files of **Gran Encuesta Integrada de Hogares (GEIH)** from 2008–2010 available at http://microdatos.dane.gov.co/index.php/catalog/MICRODATOS.

3. **Tables.tex**: contains the LaTeX code to reproduce the tables in the paper.

How to Run The Codes

1. Place all files in a working directory.

2. Edit the working directory of the Do.do by modifying line 9 – *.global d_user "your directory"*. Please note that usually, PCs use "\" while Macs "/".

3. Run the do file.

4. Compile the LaTeX file *Tables.tex*.
