Country:	United States
Title:	National Election Pool Poll: 2020 Maine Election Day Exit Poll
Survey Organization(s):	Edison Research
Sponsor(s):	National Election Pool (ABC News, CBS, CNN, NBC)
Field Dates:	October 13 - November 3, 2020
Sample:	Exiting voters and absentee/early voters in Maine
Sample Size:	1439
Sample Notes:	None
Interview method:	Telephone Interview, Cell Phone; Telephone Interview, Landline; On-site Questionnaire
Weight Location:	Columns 11-28 (xx.xxxxxxxxxxxxxx) -- Varname: WEIGHT
No. of records per respondent:	1
Usage Notes:	This dataset contains a telephone survey and an election day exit poll. Use the variable TELEPOLL (Column 135) to determine the sample: 1=Telephone survey; 2=Election day exit poll. Numerical values for the PRECINCT variable do not correspond with actual precinct numbers. Data labels for this variable have been removed to ensure respondent confidentiality.

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

The Roper Center Transparency Score Project is intended to measure disclosure of key elements of survey research. The Transparency Score is not an indicator of data quality. Transparency Project scores are calculated as follows: (10 points for providing a dataset+2 points for every other applicable core item+1 point for every applicable additional item)/(total possible points) X 10. Studies with a score >=9 and <=10 greatly exceed Roper Center requirements; scores >=8 and <9 exceed requirements; and scores >=6 and <8 meet Roper Center requirements.

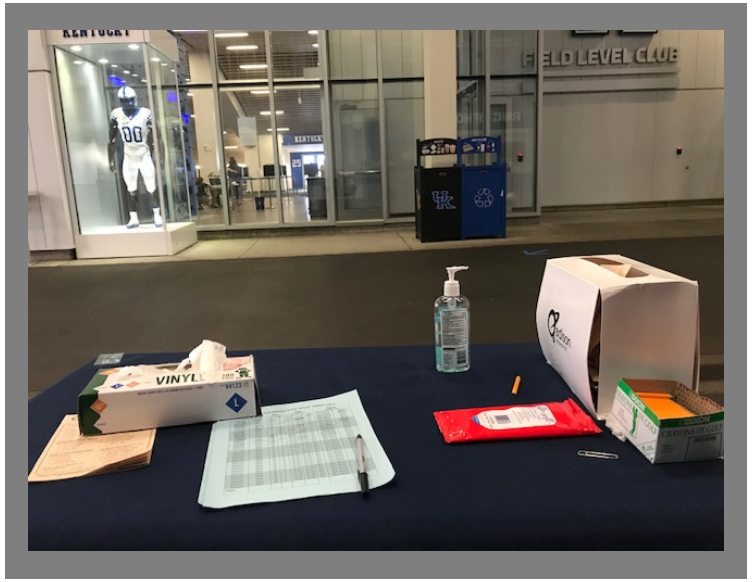
Procedural changes to exit poll interviewing tested in GA, KY, NJ and DE primaries in June and July and used in November

We maintained response rates by using the following interviewing procedures:	Exit Poll Interviewers were required to wear a mask at all times except during breaks	Exit poll materials were placed on a folding table	Gloves, hand sanitizer and sanitizing wipes were made available on the table for voters and the interviewer to use
Interviewers required to wipe down the folding table and use hand sanitizer before touching any exit poll materials	Interviewers approached voters from a 6 foot distance and invited them to participate in the exit	Willing participants were instructed to take a survey and single-use golf pencil from the table, fill out the survey, and place it in the ballot box	A garbage bag was provided for voters and interviewers to dispose of gloves, single-use golf pencils and sanitizing wipes

Procedural changes to exit poll interviewing



Survey methods used in the NEP Exit Poll

1. In-person exit poll interviews of election day voters at more than 700 polling locations – representing 33% of the vote

2. In-person exit poll interviews of early voters at more than 175 early voting centers – representing 24% of the vote

3. Telephone interviews of absentee/by-mail voters – representing 43% of the vote

Methodological Details

- Data collection dates: The field dates (10/13/2020-11/3/2020) cover the span that includes the timeframes for each of the three interviewing segments: early voter exit polls, telephone surveys, and election day exit polls.

- Sampling procedure (summary): Within-state sampling was used. Each state and its precincts were geographically stratified by region based on county, and precincts were chosen randomly based on past vote share.

- Sampling procedure (respondent selection stage): The telephone component was conducted using random-digit dialing (RDD) and registration-based sampling (RBS). In-person respondents were randomly selected based on every X exiting voter on the day of the poll.

- Weighting benchmark source: Data are weighted to the final vote count from the Federal Election Commission.

- Variable used for weighting calculations: The data is weighted by sex, age, race, education, and precinct-level vote returns

- Refusals are coded by estimated age/race/sex and additional adjustments made to the sample based on these variables to account for differential nonresponse.

- Exit Poll response rate: 42%

- The following states had a Spanish interview option: AZ, CA, CO, FL, GA, NV, PA, TX. The national RBS telephone poll offered Spanish to all respondents.

- External sample provider: None

- Use of incentives: None

Study Note

- This dataset includes respondents from the national exit poll. Use the variable QTYPE to determine the type of questionnaire received: 1=State questionnaire; 2=National questionnaire. The file 31119913_National2020.pdf (see https://doi.org/10.25940/ROPER-31119913) contains the national questionnaires.

- The file 31119913_National2020_recodesyntax.sps (see https://doi.org/10.25940/ROPER-31119913) contains the syntax that was used to code omitted responses for exit poll respondents. Full information regarding the coding of omitted responses for telephone poll respondents is not available, but it appears that:
    - For variables that include a code of 9 "Omit", 9 = DK/Refused and missing values = Not asked or (in the case of exit poll responses who didn't complete the backside) Not Answered.
    - For variables that do not include a code of 9 "Omit", missing values = Don't know/Refused/Not asked/Not answered because the backside was not completed.

- Exit poll interviewers call in data three times on election day. The variable CALL indicates if the data was Call 1, Call 2, or Call 3.

- The breaking news question (BREAK12) is left blank on purpose. The final wording for this question is decided after questionnaires have been printed and delivered to interviewers. The Sunday before the election, the NEP decides on the wording of this question and interviewers are instructed to print labels and attach them to the questionnaires in the blank spot to complete the question.

- Edison recoded the value of -1 in the version 2 questionnaire for the following variables to SYSMIS for some states, and to 9 for some other states. See the file 31119913_National2020_recodesyntax.sps (see https://doi.org/10.25940/ROPER-31119913) for more information.
