Don't Look Back in Anger: Complete Results

Andrew H. Kydd and Yoshiko M. Herrera*

October 18, 2023

This document provides additional material for "Don't Look Back in Anger: Cooperation Despite Conflicting Historical Narratives," published in the *American Political Science Review.* It contains the round robin table and evolutionary graph for every value of implementation error and divergent perception from 1 to 15. At the end are the tables of winners at the 1000th round and overall. The program file, CDCHN, produces the data and writes the main body of the latex file. We have edited the introduction of this version.
