Replication Files and Instruction for "Information Frictions and Adverse Selection: Policy Interventions in Health Insurance Markets"

(1) Replication Files with Brief Descriptions

"1. Sample Simulation & Simulation Block.m"
This file contains code to replicate simulations presented in the theory section & Online Appendix D. Execution of these code do not require access to the proprietary data.

"2. Sample Empirical.m"
This file contains code to replicate the empirical and graphical components of the paper.

(2) Software Versions

Matlab 8.5

(3) Instructions for obtaining access to the data:

The data used were obtained under a Data Use Agreement with a private company that, under that agreement, must remain anonymous. Any inquiries about data access should be directed to the authors of the paper.
