Audit of Voting Machines used in the 2020 General Election

State Election Commissioner Albence, County Director Dixon, Deputy County Director Sholl and 2 Department of Elections staff conducted the Phase 1 audit of machines used in the November 3, 2020 General Election.

County Director Dixon drew slips that randomly selected machines used at East Side Charter School and A. I. duPont High School for the Phase 1 audit.

The auditors manually recounted the ballots cast on machines NCC-0035 and NCC-0036 used at East Side Charter School and NCC-0313 and NCC-0314 used at A I duPont High School. The votes reported on the voting machine tapes and the number of votes hand counted for every candidate for every office were the same. This concluded another successful audit of the Expressvote XL machines used in Delaware.

Respectfully submitted,

Howard G. Sholl Jr.
