Audit Summary Report

General Election 2020

During the comparison of the votes cast on the ballots and the Cast Vote Record (CVR), one ballot was identified with an incorrect CVR in one race in which a vote was counted in the CRV that was not marked by the voter. In investigating the cause of this discrepancy, it was determined that the ballot had been folded with the fold crossing the oval next to the candidate's name. This fold created a shadow when the ballot was scanned and was detected as a mark for that candidate. The voter had not cast a vote for any other candidate in that race. It was determined that this vote did not have an impact on the outcome of the race.
