INDEPENDENT ACCOUNTANT'S REPORT ON APPLYING AGREED-UPON PROCEDURES

The Honorable Maggie Toulouse Oliver
Secretary of State
State of New Mexico
Santa Fe, New Mexico

We have performed the procedures enumerated below, which were agreed to by the State of New Mexico, Secretary of State, solely to assist you in evaluating the accuracy of voting system machine tabulators used in the conduct of the 2020 general election held on November 3, 2020. This agreed-upon procedures engagement was conducted in accordance with attestation standards established by the American Institute of Certified Public Accountants. The sufficiency of these procedures is solely the responsibility of those parties specified in this report. Consequently, we make no representation regarding the sufficiency of the procedures described below either for the purpose for which this report has been requested or for any other purpose.

Section 1-14-13.2 NMSA 1978 and 1.10.23.9A NMAC requires a voting system check for all federal offices, the office of the governor and the statewide elective office, other than the office of the governor, for which the winning candidate won by the smallest percentage margin of all candidates for statewide office in New Mexico. If any of the contests resulted in a winning percent margin greater than fifteen percent (15%), a voting system check in that contest is not required. The winning percent margin in the Federal contests for the United States Representative – District 1 and for the United States Representative – District 3 was greater than fifteen percent (15%). The winning percent margin in the Federal contests for the United States President and Vice-President, United States Senator and the United States Representative – District 2 was less than fifteen percent (15%). The statewide elective office in New Mexico with the smallest winning percentage margin of all candidates for statewide office was the contest for Judge of the Court of Appeals – Position 3. Therefore, we performed the procedures enumerated below for (1) United States President and Vice-President, (2) United States Senator, (3) United States Representative – District 2, and (4) New Mexico Judge of the Court of Appeals – Position 3.

Our procedures and findings were as follows:

VOTING SYSTEM CHECK

1. Selection of precincts for the voting system check.

Procedure - A list of all voting precincts in the State of New Mexico showing total registered voters for each precinct was obtained from the Office of Secretary of State. A spreadsheet showing the voting precinct, congressional district, total registered voters for each precinct and a cumulative number of registered voters beginning alphabetically with the first Bernalillo County precinct, and ending with the last Valencia County precinct was developed. The county-reported election results were obtained from the Office of the Secretary of State. The required sample of precincts to be tested as provided pursuant to Section 1-14-13.2(B), was randomly selected using a "dice roll" method whereby seven ten-sided dice were rolled and the resulting number normalized so that a particular voter (un-named) could be identified within all the voting precincts in the state. A total of 35 rolls of the dice were needed to select the required number of precincts to be tested.

VOTING SYSTEM CHECK (Cont'd)

1. **Selection of precincts for the voting system check (cont'd)**

   Procedure (cont'd)
   An analysis of the reported election results determined that six (6) precincts be selected for United States President and Vice-President, ten (10) precincts be selected for United States Senator, nine (9) precincts be selected for United States Representative – District 2, and eighteen (18) precincts be selected for the New Mexico Judge of the Court of Appeals – Position 3. (See Appendix A-2). A public meeting was held in the NM State Capitol Building, Room 307 at 10:00 a.m. on November 19, 2020, to select the precincts to be included in the voting system check. A copy of the instrument used to capture the selected precincts is included in Appendix A-3 of this report.

2. **Notification of county clerks of the precincts selected for the voting system check.**

   Procedure - We notified each county clerk of the precincts which were selected within their county that would be subjected to a hand recount. We also provided the methods for reporting the recount back to the auditors and provided tally sheets to be used by the county clerks to report the hand recount. (See Appendix A-2).

3. **Receipt of hand recounts from the selected counties.**

   Procedure - We received hand recount results from the selected counties.

   All results were either e-mailed or hand delivered to us by the county clerks.

   Finding - All counties selected for the voting system check provided us with hand recounts for the precinct and races selected.

4. **Analysis of the results of the hand recounts.**

   Procedure - As the results of the hand recounts were provided to us from the counties, we recorded the results for each precinct separately for election day voting, early in-person voting, and absentee by mail voting. We recorded the voting machine tabulator results for each precinct separately for election day voting, early in-person voting, and absentee by mail voting. We obtained the voting machine tabulator results from each selected county's precinct report provided by the Office of the Secretary of State. We accumulated the results for all selected counties and precincts by contest and analyzed the differences between the hand recounts and voting machine tabulator counts.

   Finding - We found that there were differences in hand recounts and voting machine tabulator counts resulting in an error rate of -0.128% for the United States President and Vice-President contest, 0.015% for the United States Senator contest, -0.002% for the United States Representative – District 2 contest, and 0.134% for the New Mexico Judge of the Court of Appeals – Position 3 contest. The reason(s) for the errors appear to be the result of unlocated ballots, errors in the actual hand recounts and/or errors in markings on the tally sheets by county clerk personnel. The error rates are considered to be acceptable. A copy of the analysis is included in Appendix B-1 to this report.

5. **Determination of whether additional hand counts are required.**

   Procedure - We analyzed the results of the hand recounts and voting machine tabulator counts to determine whether further hand recounts were necessary as required by Section 1-14-13.2D NMSA 1978 and 1.10.23.9A (3) NMAC.

   Finding - Section 1-14-13.2D requires a hand recount of additional precincts for an office if the error rate determined from the original hand recounts is greater than ninety percent of the reported voting machine tabulator contest margin. The analysis included in Appendix B-1 to this report shows that the error rate did

VOTING SYSTEM CHECK (Cont'd)

5. Determination of whether additional hand counts are required (cont'd)

Finding (cont'd)
not exceed the ninety percent test in any of the contests audited. Therefore, no additional recounts are required.

Other Matters Noted

Included in Appendix C to this report are documents that report the results of the voting system check by precinct and mode of voting.

* * * * * *

We were not engaged to and did not perform an examination, the objective of which would be the expression of an opinion on the accuracy of voting system machine tabulators used in the conduct of the 2020 general election held on November 3, 2020. Accordingly, we do not express such an opinion. Had we performed additional procedures; other matters might have come to our attention that would have been reported to you.

This report is intended solely for the use of the State of New Mexico, Secretary of State, and should not be used by those who have not agreed to the procedures and taken responsibility for the sufficiency of the procedures for their purposes.

Robert J. Rivera, CPA, PC
Santa Fe, New Mexico
