Summary Report for 1% Manual Tally Process

Presidential General Election – November 3, 2020

Introduction

During the official canvass of every election in which a voting system is used, the elections official shall conduct a one-percent manual tally which is a hand count of a random sample of 1% of the precincts and 1% of the mail ballots cast in the election. The purpose of this procedure is to verify the accuracy of the automated machine count. ~ Elections Code §15360

Precinct Selection

- 1% of the precincts in the election will be chosen at random. If 1% of the precinct is less than a whole precinct, the tally will be conducted in that one randomly chosen precinct.
- If the initial selection of precincts does not include all contests in the election, the elections officials are required to select additional precincts. For these additional precincts, only votes for the contests not in the initial selection shall be counted.

Mail Ballot Batches Selection

- 1% of the mail ballots cast in the election. The batches will be randomly chosen and will include all mail ballots received no later than 17 days after Election Day.
- If the initial selection of mail ballot batches does not include all contests in the election, the elections officials are required to select additional mail ballot batches. For these additional batches, only votes for the contests not in the initial selection shall be counted.
