Guide to Updated LEAD data

If you are interested in using the LEAD dataset, we recommend using the most updated version of the data, WhyLeadersFightLEADDataset_updated.dta. This is organized in leader-year format.

If you have any questions about the data or using the data, find errors, or want any other information, please contact Michael C. Horowitz at horom (at) sas.upenn.edu

Dataset Update (12/1/2015): Since we continued gathering data on leader background experiences after *Why Leaders Fight* went to press, we also include replication datasets with the most updated coding.
