Wii U

New Xenoblade Chronicles X censorship found! Removed religious/philosophical ref

HellsingOrg 1 day ago #1

references removed from the game.
Certain names and things have been tone down.

https://www.youtube.com/watch?v=BEDB9yBBIec

Nintendo PROMISED yes NoA promised they would not alter the game from the original Japanese vision like 1 year ago and what do they do? They censor a ton of shit.
What a bunch of liars!

The bird of Hermes is my name eating my wings to make me tame.

OMG

the outfits at the 22 second mark, are those removed from the english version for Elma and the the other older girls?

If they are, I'm importing and will use an english strategy guide to play XCX after cancelling my preorder for the LE Censored Edition at BB.

"Removed religious/philosophical ref"

That's actually an improvement. You know how heavy-handed these JRPGS tend to be about these kinda things. Now all they need to do is remove the silly " power of friendship" aspects and we good.

It was to be expected. It sucks, but Nintendo seems bent on staying on this path, and this path is one that I don't want to support in any way.

I liked the first Xenoblade and put more than 150 hours into it, so I was really looking forward to this title, too.

I like how the NDF intends to blame this whole debacle on Xenoblade fans, while giving the devs that made those costumes and underage characters a free pass.

So instead of Xenoblade Chronicles X from Monolith Soft, you want to play Puritan Meme Chronicles Y from NoA/E.

Yea, the world loves that shit. Its why a game such as The Last of Us is considered so good because of its story (very simple and easily told).
Games from japan usually end up a convoluted mess. Look at Metal Gear Solid and Kingdom Hearts. Hell, Xenogears and Xenosaga were really convoluted as well.

The worst part isn't even the localization job; it's fans criticizing & disregarding their fellow fans for being upset about all this (the alteration of an M-rated game included). Yes, the competitors' fans will jump at any opportunity to shove bad news in Nintendo fans' faces, but being unhappy with negative news doesn't mean other Nintendo fans hate Nintendo. The black & white, total devotion mentality is obviously not exclusive to the console wars, but it sure leaves this board with no side to root for.

... Uhh, I should sleep. I expect to wake up with my bones picked clean. Or my post is so lame, it kills the thread... That's what usually happens.

The NDF is pro censorship (since Nintendo censored XBCX. They were obviously against censorship before).

I'm sure they are recruiting, just PM Maverick_Reznor or R_Hunter.

Koi_Tenchi 1 day ago #40

I'm confused, did TC link to the wrong video? I couldn't find anything that had any effect whatsoever on the gameplay or even on the main storyline.

Is he basically just insulted that they translated the game instead of leaving it in Japanese?

It's a secret to everybody.

report · quote

Shinstrike 1 day ago #41

Ahh finally got to see the video and i actually wish to make a female now instead of a male :p.

That said, ehh the censorship indeed sucks but... i mean i bought a Nintendo console. The wii U and 3DS come with Region lock. so i more or less agreed upon every crappy choice they decide to make upon purchase. it sucks, but everything something goes exclusive to nintendo we ultimately lose. that said, both my Wii U and 3DS have been starved for games , moreso the 3DS. so im picking Xenoblade X up. I feel like everyone else here should do the same. and if possible, avoid buying a Nintendo NX unless you know for sure Region locking isnt a thing.

About the only significant religious reference removed that I could find was that Logos word. And hell, I think they did that because most people don't even know what the heck that word is.

Them "removing all other religious and philosophical references" is just conjecture. The person who made the video just assumes that happened with no actual evidence.

Logos means "word" or "logic" in Greek.

The only relation to God is that God is the source of both words and logic.

Well there we go then. The video made it seem like the word directly referenced God. Guess I should expect something like that when it uses "dank memes lel".
