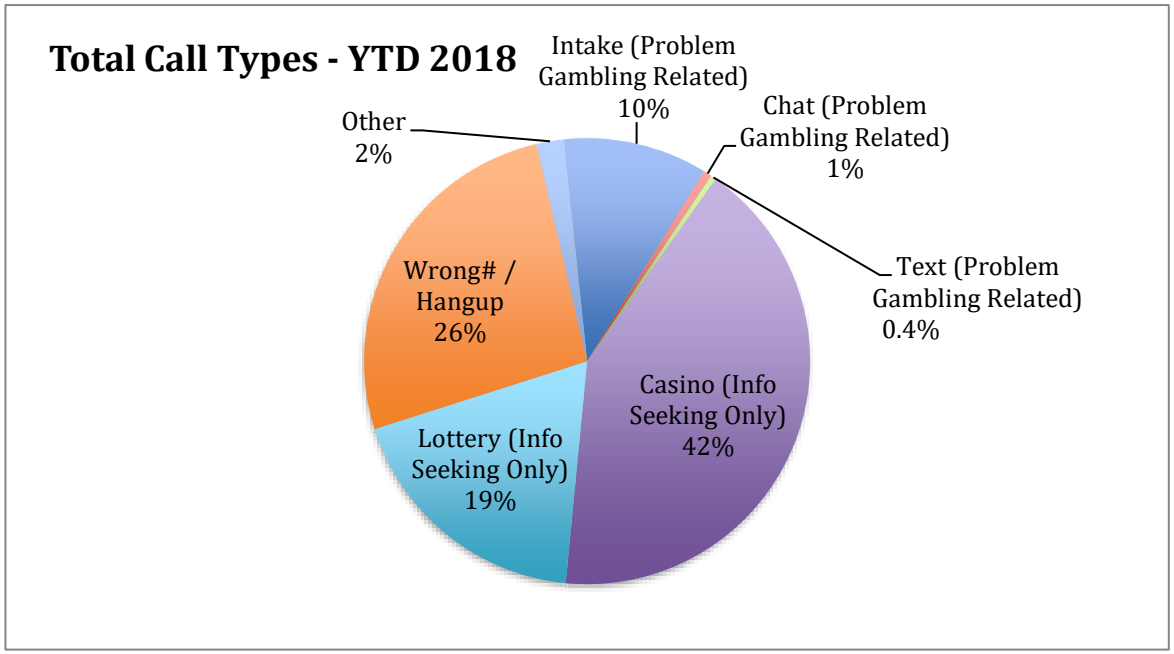
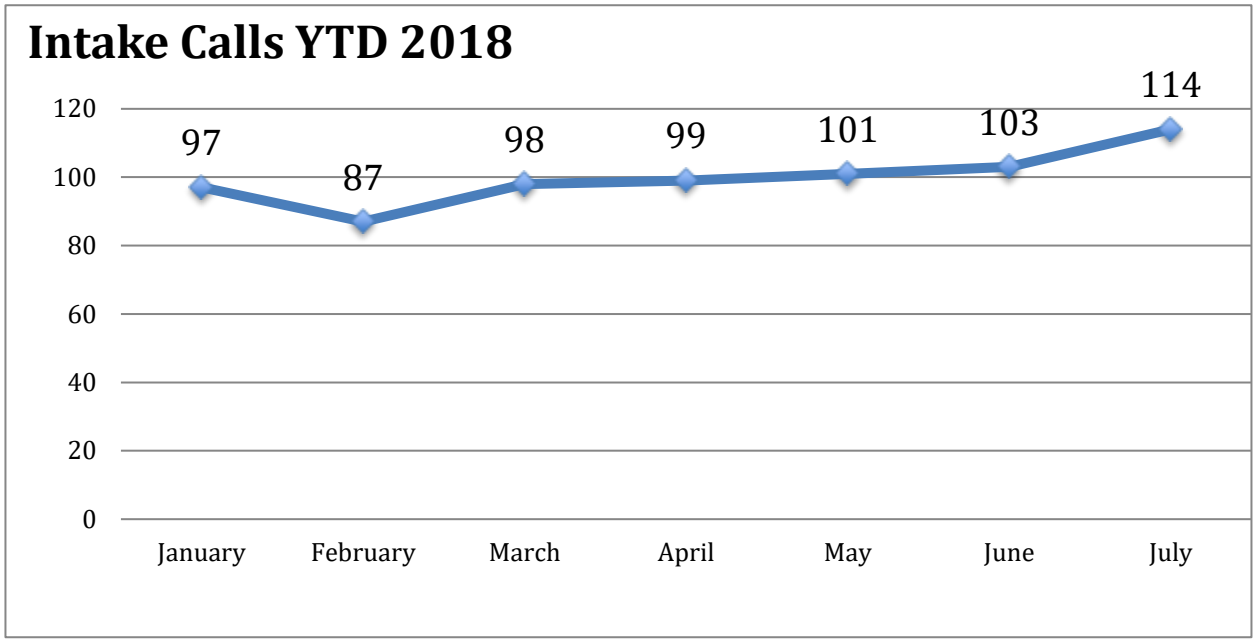
Figure 1



Every call that is made to the Helpline Center is tracked and noted by type (fig. 2). A majority of calls received are information inquiries (last night's lottery drawing, room reservations, etc.).

July 2018 saw an increase in intake calls, from 103 in June to 114 in July. *The calls received by the HelpLine Center labeled "Lottery" and "Casino" are from individuals seeking general information specific to those activities, not seeking help for a gambling problem as a result of participating in them.*

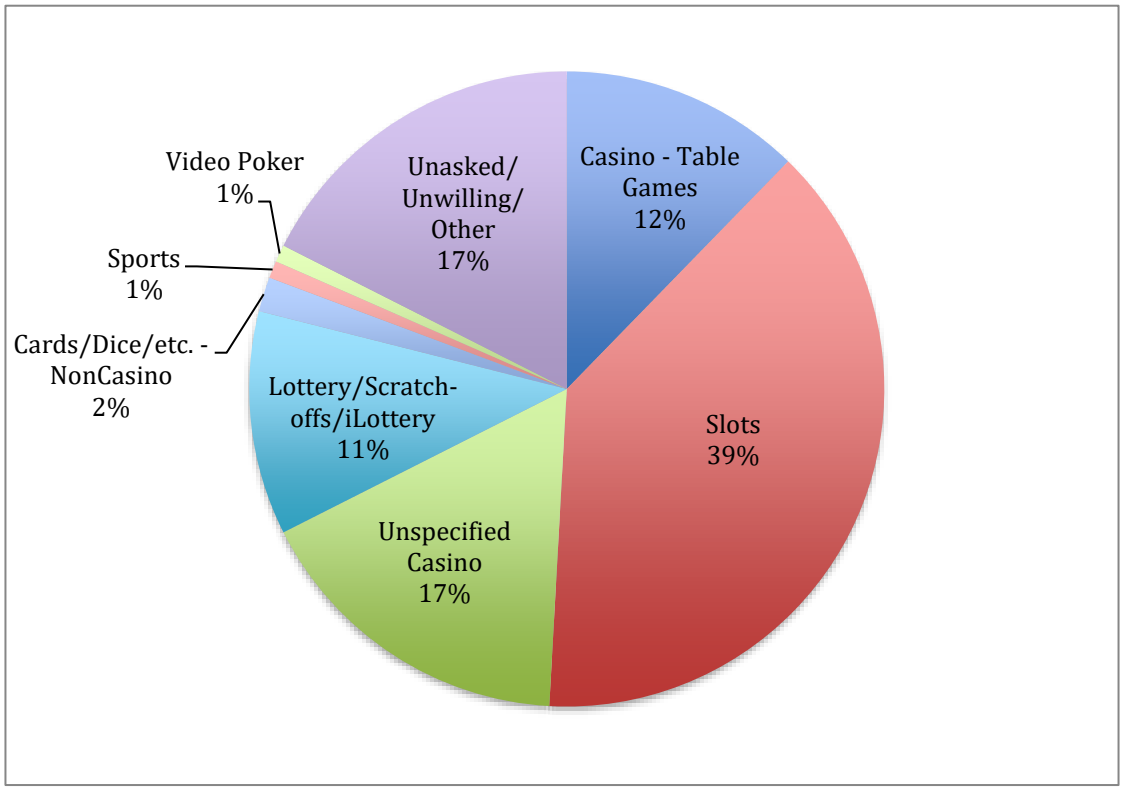
Figure 2



Intake calls represent the calls made by individuals who are suffering from a problem gambling issue, have relapsed, or who know someone with a gambling problem. Callers are provided resources, such as Gamblers Anonymous (GA) meeting information and/or trained counselor contact information. **For the month of July 2018, the total number of intake calls was 114 (fig. 3).**

The Council has received 67 chat and text requests for help to date in 2018. This is in addition to the 699 phone calls requesting help so far in 2018.

Figure 3



One of the primary pieces of information collected from our Helpline Specialists during intake calls is the most problematic form of gambling that a caller, or subject, is engaging in. Slots and other casino based games were the activity named during the majority of calls in June 2018 (fig. 4). This can likely be explained by the promotion and high visibility of the Helpline number throughout each of the 12 casinos that currently operate in Pennsylvania.

Figure 4

Pennsylvania Helpline for Compulsive Gamblers

This month, Philadelphia and Allegheny counties accounted for just over 26% of intake calls. In July 2018, the Helpline saw Luzerne, Bucks and Chester counties make up an additional 13% of intake calls.

In November 2015, the Council on Compulsive Gambling implemented a 'chatline' and 'text for help' option into the existing Helpline Services. Like the Helpline, the chatline and text options are available 24/7 and provide an additional level of anonymity for those who may not be ready to physically verbalize the issues they are experiencing. Since the program began, we have seen continued use of these services and are pleased to offer another available resource for individuals seeking assistance.
